

NEW LEAF

Opaque

New Leaf Opaque was the first 100% post-consumer, white opaque paper available in North America. This paper is manufactured using biogas energy, sourced from the decomposition of waste in a local landfill. Capturing landfill emissions, converts a potent greenhouse gas into an energy source.

NEW LEAF OPAQUE

Text & Cover

Smooth

Demand for New Leaf Opaque is high as customers discover its great print surface and affordable price, not to mention its leading environmental specifications.

USES: Excellent for catalogs, newsletters, mailers, books, corporate literature, direct mail and brochures.
