

LPT KEY-PAK

**"V" SERIES
SINGLE TUBE
VERTICAL FORM/FILL/SEAL MACHINE**

**MODELS
V-200 / V-250 / V-300 / V-350 / V-400**

**CANTILEVERED DESIGN
PLC BASED CONTROLS
with Color Touch Screen Interface
STEPPER MOTOR FILM ADVANCE
TOOL-LESS BAG WIDTH & ROLL CHANGING**

The "V" Series machines are **KEY-PAK'S** signature design. Unique among Vertical Form/Fill/Seal Machines, they feature a cantilevered design, whereby the entire film path, from roll to former is completely accessible to the operator. This makes the machines extremely simple to work on, and reduces down time considerably over other designs.

Models are available for maximum bag widths of 4, 8, and 12 inches at speeds up to 100 per minute. The 16 inch non-cantilevered machine is not shown. All "V" models feature PLC controls with dual stepper motor film drives for maximum flexibility and user-friendly operation.

The "V" Series machines produce standard **PILLOW POUCHES**, as well as optional **STAND-UP GUSSETED BAGS** and **3-SIDED SEAL POUCHES**.

Available product filling systems, include Linear and Combinational Scales, Augers, Volumetric Fillers, Liquid Fillers and even Parts Counters. Other options that can be added include **PRODUCT TAKEAWAY CONVEYOR**, **PRINTED FILM REGISTRATION**, **THERMAL AND INK PRINTING**, **BAG NOTCHING**, **NITROGEN GAS FLUSH**, **FILM SPLICING TABLE** and **CODE DATING**.
