

Product Details

Panels are shipped with base covers that have receptacle knockouts.

Base covers have one standard size opening on the left and a larger-size opening on the right. Exceptions: 24"W and 30"W base covers don't have enough space for two receptacles on each face, so they have a standard size opening on one side of the panel and a larger size opening on the reverse side. 18"W panels accommodate pass-through power only, so their base covers do not have receptacle knockouts.

Knockouts cannot be accidentally removed by kicking them or striking them with a vacuum cleaner because the pressure to remove the knockout must be applied from the back of the panel. Please note: once removed, knockout cannot be replaced.

Reusable filler plates are available to replace the knockout or to fill in the gap that results when you use a standard size receptacle in an oversize opening. Filler plates are available through Service Parts.

Duplex receptacles are one of two sizes. Standard-size receptacles fit in the smaller size openings (2-3/4"W x 1-3/8"H) of the base cover. The standard

size receptacles will also fit in the larger-size (5-1/4"W x 1-3/8"H) openings with a filler. Shown left: Standard size.

Oversized duplex receptacles with two outlets will only fit in the larger-size opening of the base cover (5-1/4"W x

1-2/8"H) in 36"W through 60"W panels. Shown left: Larger size.

Receptacles are ordered separately and installed in the field in knockout opening.

Openings for receptacles are visually unnoticeable until the knockout is removed.

Knockout can be removed in the field to allow receptacle to be installed.

Tip: Once removed, knockout cannot be replaced; a filler plate must be ordered from Service Parts.

Actual Dimensions

BASE COVER

Width 17 3/32", 23 3/32", 29 3/32", 41 3/32", 47 3/32", or 59 21/64"
