How did the PILOT experience go?

How *prepared* did I feel? What else might I have done?

In what ways did I *identify* the school's point of view? What strategies did I use to overcome the school's limitations?

How well did I *listen*? What did I do to create an atmosphere of respect? What did I do to show I was listening?

What challenges did I *overcome*? Which strategies worked? Why?

Think reflectively of a meeting from the past that went poorly. How would I handle it differently today? What else might I have done?

Additional reflections?
