Acoustic Fencing & Gates

From
£110 per
metre*

*per straight linear metre - 2m high

To combat today's increased noise pollution, Jackson's Fencing has developed Jakoustic, a revolutionary acoustic fencing system. With its unique construction, unwanted noise can be reduced by more than half, restoring peace and quiet into your life.

Jakoustic comes with a 25 year guarantee and is available in a wide range of heights starting at 1.8m.

We are happy to advise the optimum height for your location.

For a totally integrated acoustic barrier solution, we offer matching Jakoustic timber or galvanised steel framed gates up to 2.5m wide per leaf and 2.5m high, configured as singles or pairs, hung on timber or galvanised steel posts dependent on size, with optional lintels.

Also available as a slider gate.

All of our gates are suitable for automation via remote control.

Key points:

 50% heavier than standard acoustic fencing.

 Special profile interlocking "vee" eliminates gaps.

 Available heights from 2.0m to 6.0m

 Over 10dB sound level reduction. (70dB motorway traffic, 60dB conversational speech)

Distance from noise source	2.0m high fence	2.5m high fence	3.0m high fence
Sound Reduction			
5m	13.6 dB	16.5 dB	17.4 dB
10m	11.3 dB	13.5 dB	14.1 dB
15m	10.3 dB	12.5 dB	12.9 dB
20m	9.2 dB	11.9 dB	12.4 dB

Beautiful, Inventive Timber

From
under
£20

“A beautiful alternative that is more cost effective than bricks and mortar”

Jakwall is a highly unusual grooved, brick wall effect landscape timber system. It comes in three options; one with a 90mm grooved face towards the front, this option is ideal for creating retaining walls or raised flower beds. Another option is to have the 140mm grooved face to the front, this larger “brick” effect front is more suitable for creating a wall or fence by building single timbers up on top of each other to create any height wall/fence that you require.

A further option is to have the timbers grooved all round, so every face shows the brick effect grooves.

The timbers are fixed together with a timberlock system without any need for pre-drilling, available in two lengths. Jakwall Planed all round and Jakcured - which means you receive a 25 year guarantee.

From
£749

The **Haven's** looks are unusual, it has a modern, quirky feel that would easily be at home in the 'urban garden'. Featuring 'air flow' panels of Jakcured softwood and a clear polycarbonate roof to maximise light and create a sense of space. In profile the double curving roof looks funky enough to make it the Chill Zone and it is ideal for housing your barbecue as the polycarbonate roof is perfectly safe with at least 1 metre distance from the griddle.

A stylish shelter for workplaces, restaurants, or pubs. It is compact, taking up less than one car parking space, and will easily accommodate ten people standing. Its design has been approved for compliance with UK Smoke Free legislation.

So stand it on a deck, furnish it with state of the art wood and aluminium garden furniture and you have a garden room that will look sleek, contemporary and definitely un-stuffy.

Haven	Width	Length	Height
Standard Unit	2040mm	2960mm	2616mm
Demi Unit	2040mm	1170mm	2616mm
