

# PDC Laboratories, Inc. – St. Louis

3278 N. Hwy 67 / Florissant, MO 63033  
Phone (314) 432-0550 / Fax (314) 432-4977

## PCB SAMPLING INSTRUCTIONS

A small glass vial is provided for you to ship the oil sample to the laboratory. The major concern in taking the sample is to assure that the sample you take (and ship to us for analysis) is representative of the entire bulk sample. It is preferable that the bulk sample be mixed thoroughly before the sample is taken. If this is not possible, remove one gallon of oil and then take the sample. Place the sample in the glass vial, tighten the cap securely, and wipe the vial clean with a cloth or paper towel. Place the vial in the protective box. (Don't forget to copy the vial number onto the sample information sheet!) Fill out the information required below, and return this sheet along with the sample can/vial to our laboratory. Your sample will be analyzed for PCB content and you will receive a formal laboratory analysis report.

### SAMPLE INFORMATION:

1. Vial #		Location
ID #
