

For: Excavators

Type: Grapples

Applications: General Recycling Waste Handling

## Features At-A-Glance

- Unique Pemberton design, custom engineered for optimum performance.
- Ideal for use in transfer stations.
- Evenly distributes and maximizes load amount for transport vehicles.
- All cylinders and hoses are completely guarded from possible damage during operation.
- Includes 360° continuous power rotation with a heavy duty slew ring rotator.
- Heat treated pins, bushings and grease fittings at all hinge points.
- Can be either pin-on or coupler mounted.
- Various out-of-position and hanging options available with custom widths and capacities.
- Note: requires two extra functions on machine to operate: (1) open/close and (2) rotate.

Machine Class	Height Closed <sup>1</sup>	Width	Opening	Weight
E-35 (30-45K)	52"	30"	57"	3,800 lbs

<sup>1</sup> Dimensions measured without rotation/connecting links.
