

Assembly Instructions

Step 1:

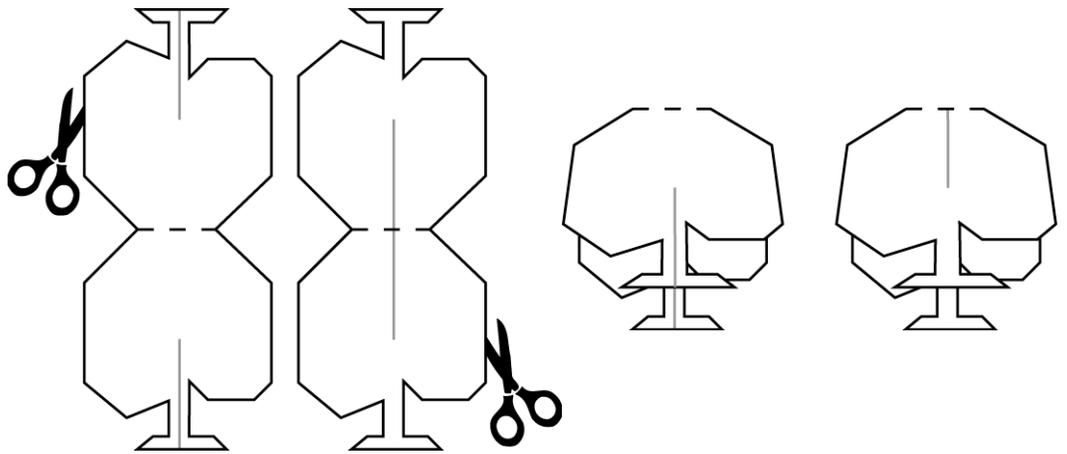

Start by printing out the trees onto heavy paper or cardstock. #65 weight paper or heavier is recommended.

Step 2:

Each Tree comes as a group of four images. Cut along the solid black lines to get two pieces with two images on each piece.

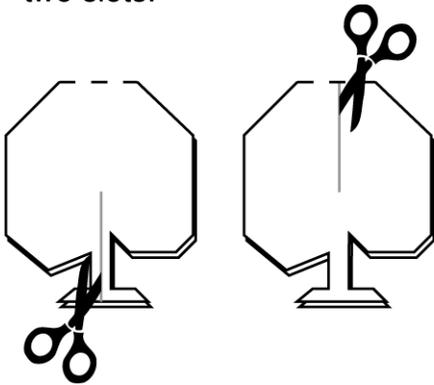

Step 3:

Put glue or paste along the back side of each piece. Fold each piece along the dashed line and press the piece together so the glued sides stick together.

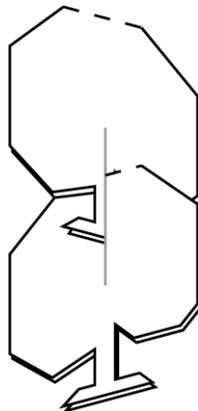

Step 4:

Once the glue has dried, cut along the grey lines, creating two slots.

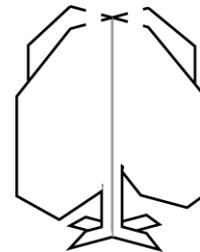

Step 5:

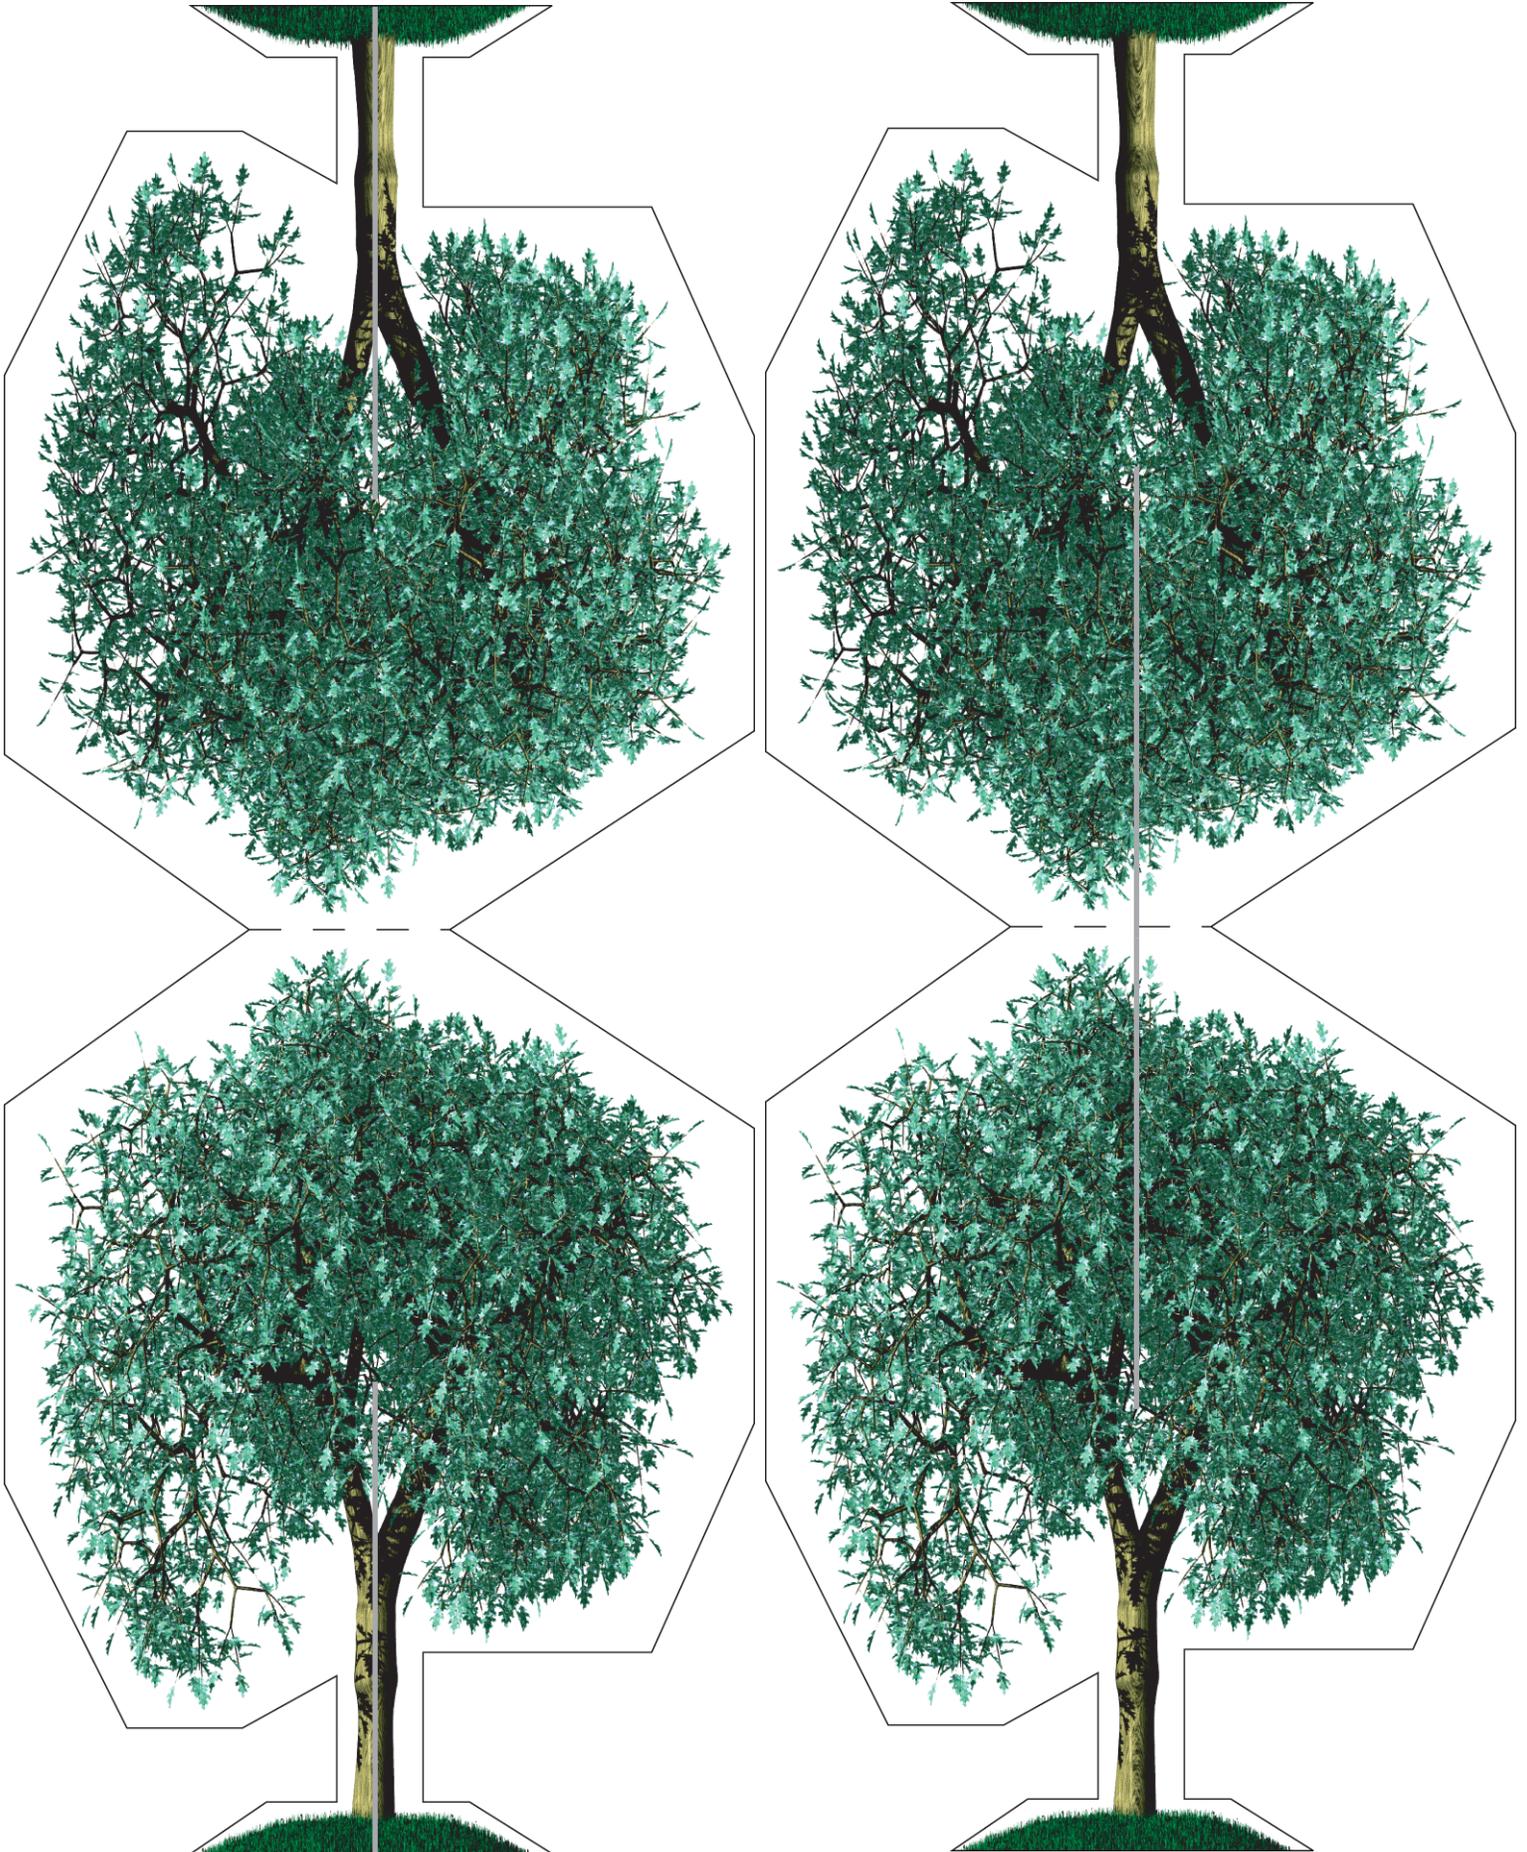

Slide the slots into each other.

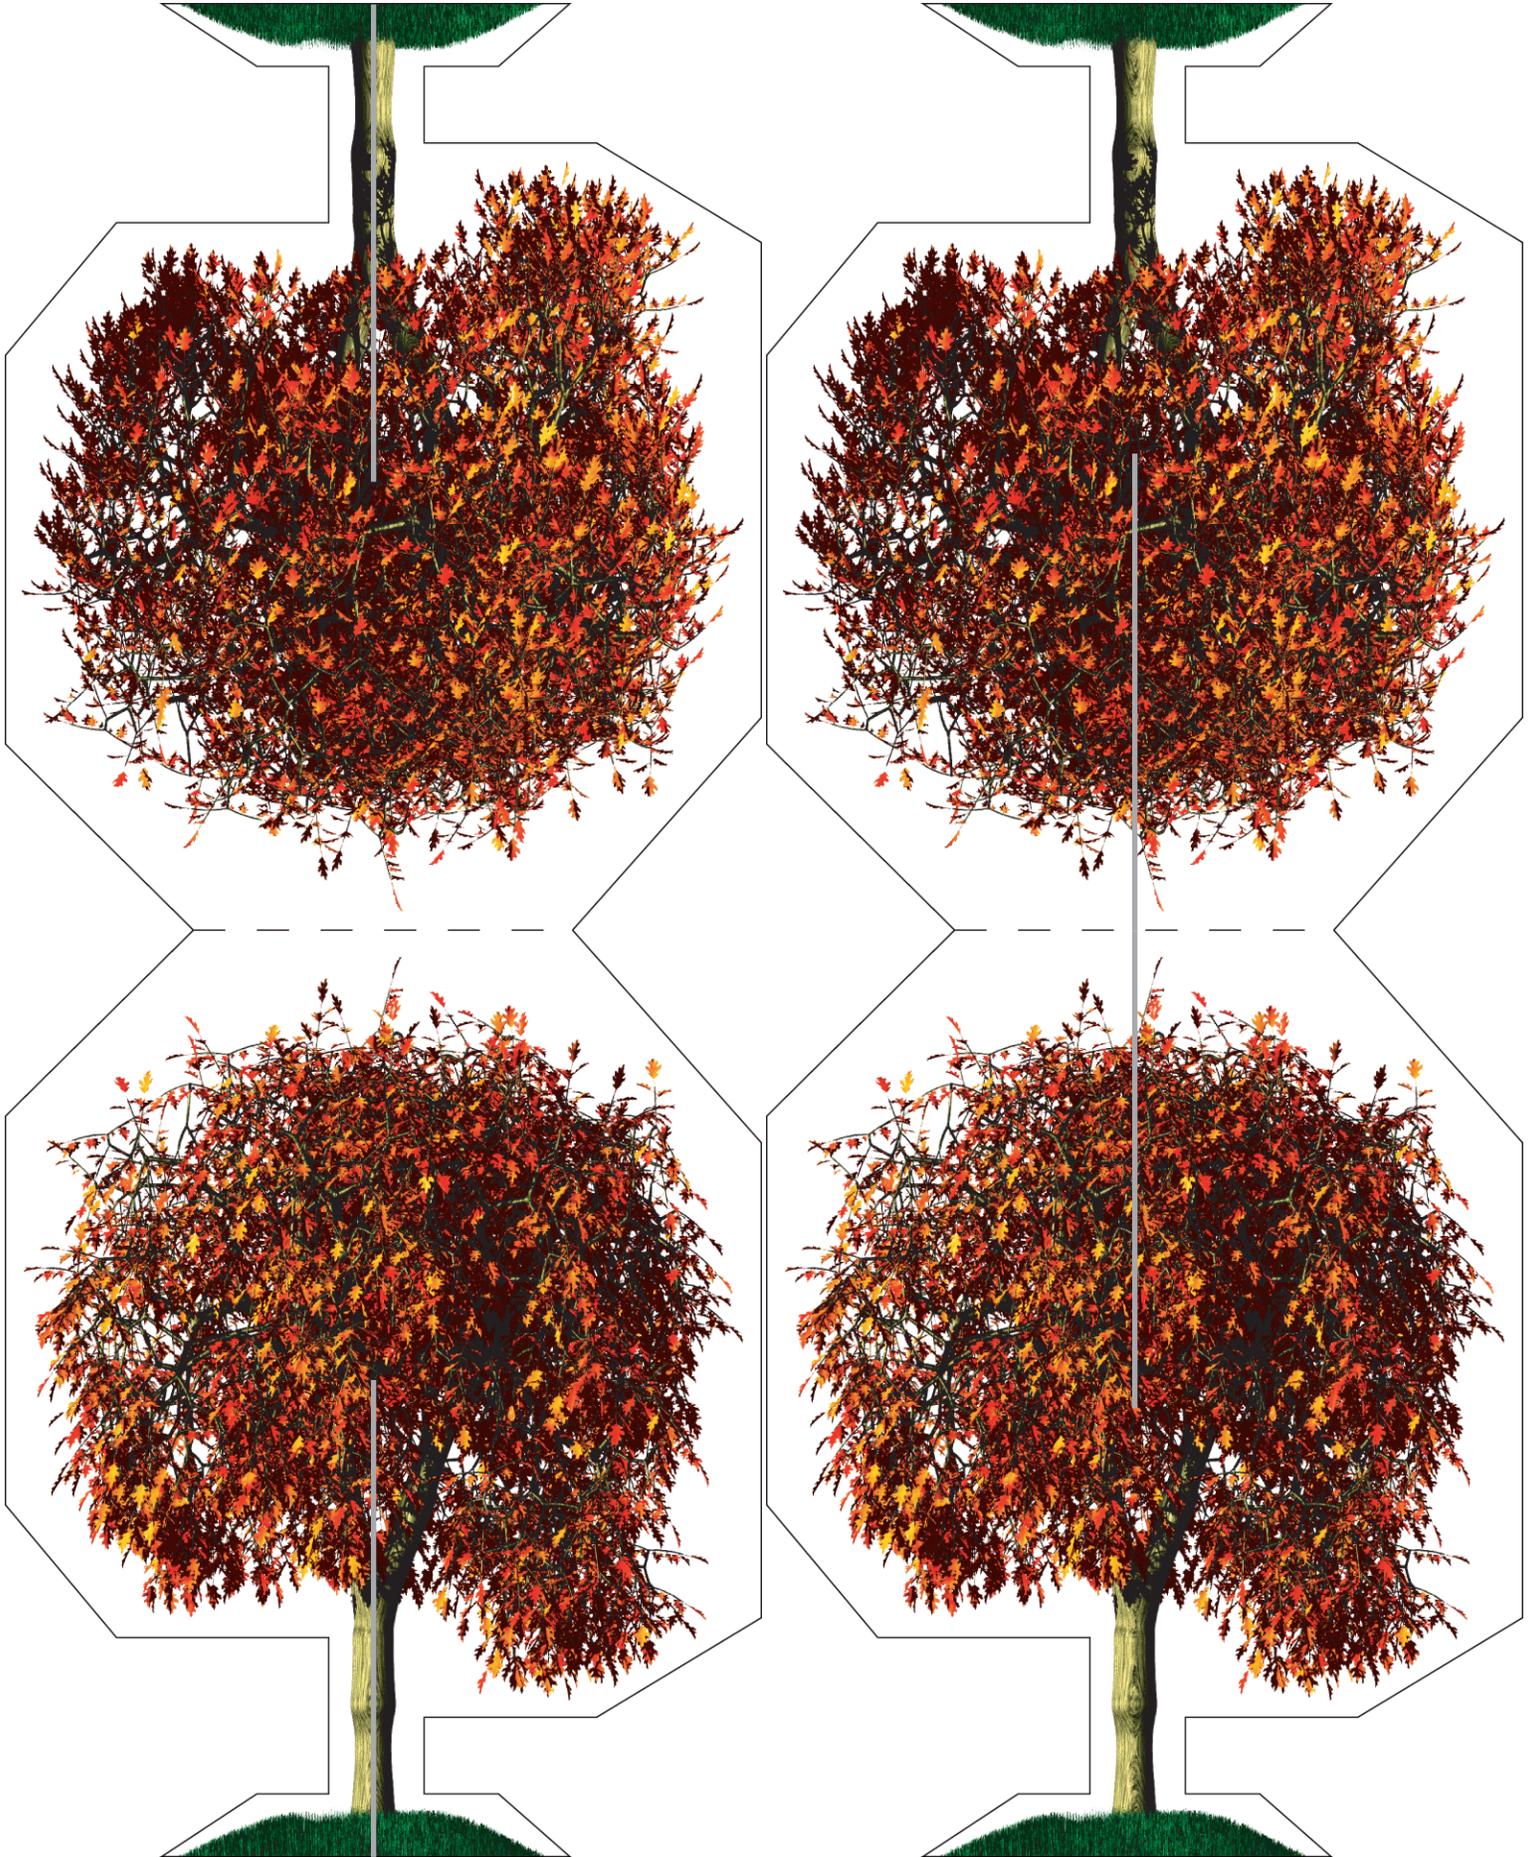

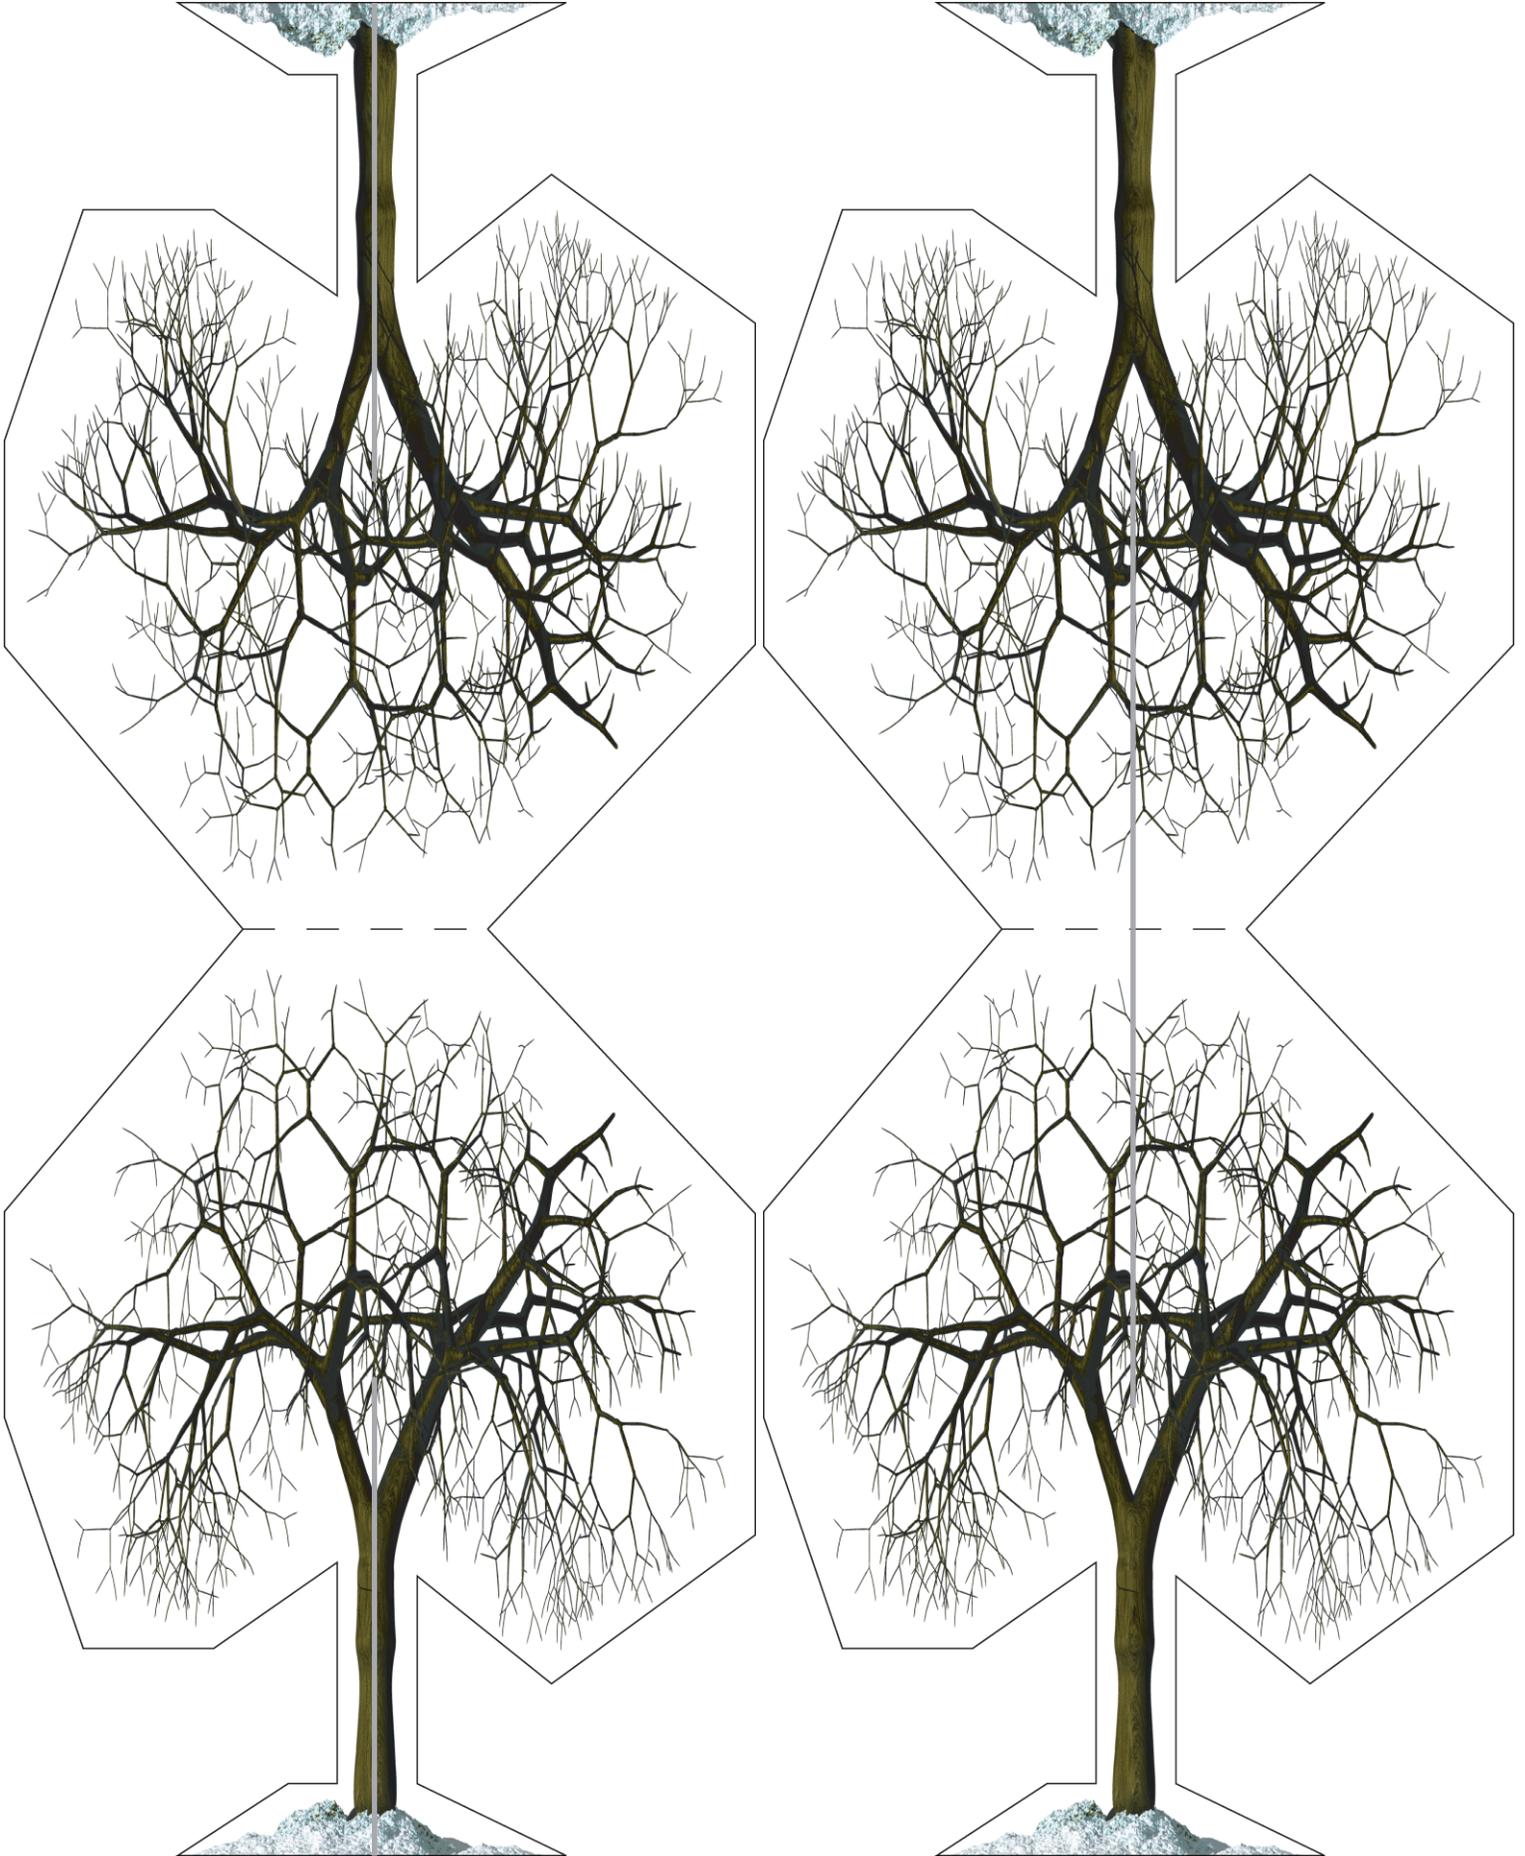

Step 6:

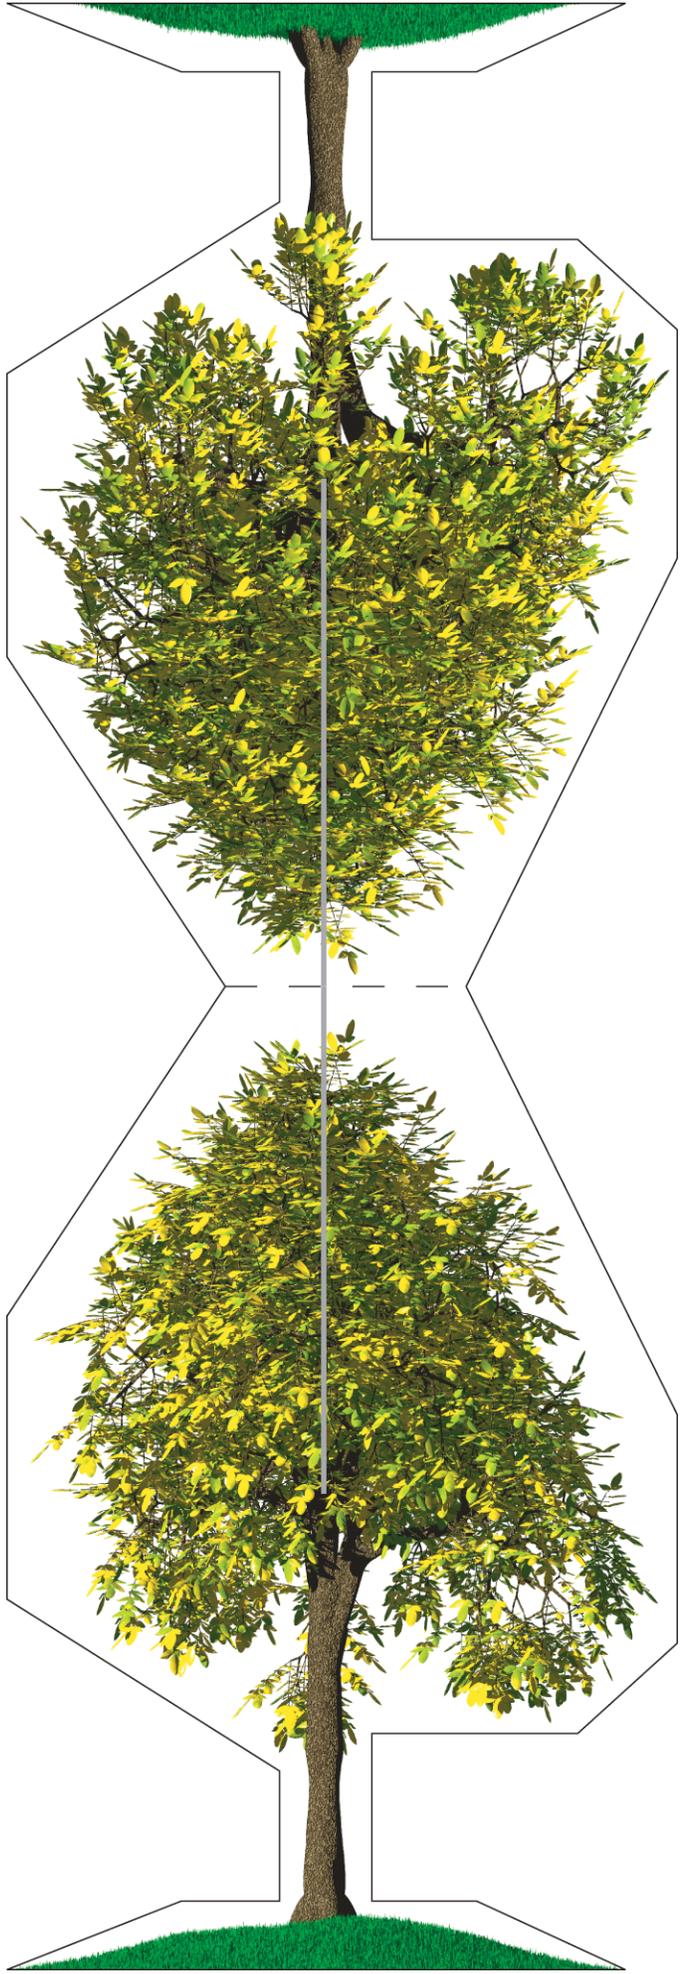

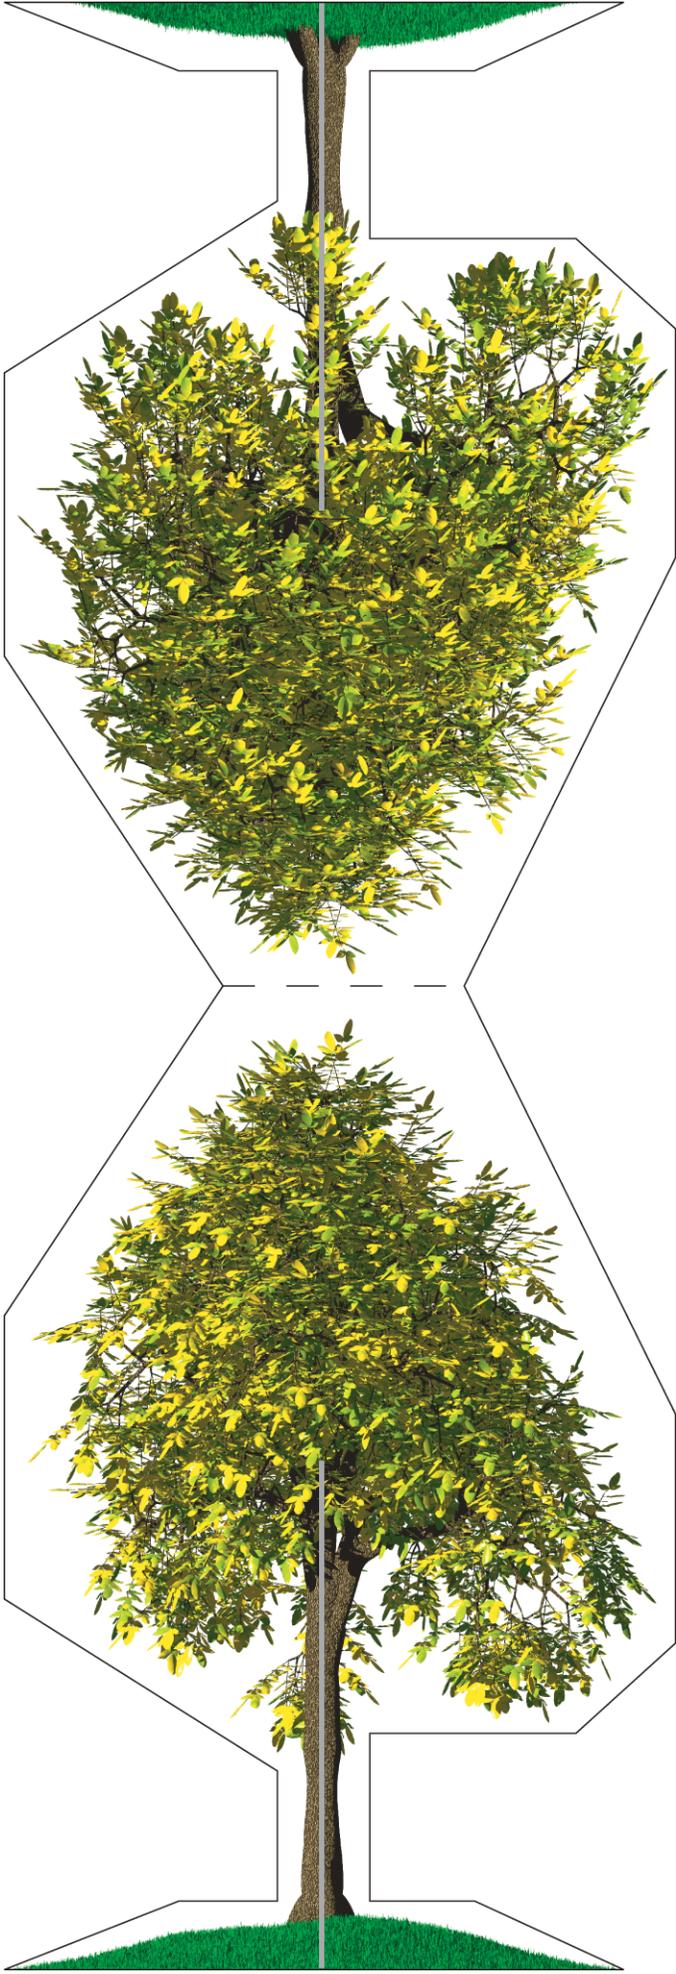

Position the pieces so they are at right angles to one another and stand up your tree!
