

## RECENT NEWS

Our parts department has just announced the August sale. This month, we focus on S3B seats, surge tanks, windshield washer fluid reservoirs, defrost fans, booster pumps, and C2 wiper blades. Let us know if we can help you take care of any last-minute parts needs before school starts!

Speaking of parts sales, our Outside Parts Sales Rep, Jason Neal, has been working his way around Pennsylvania. He has an extensive selection of parts with him in his vehicle. Please take advantage of him for any parts needs that you have.

We have a number of stock units available, ready to go for the start of school. If you need a bus for the start of school, we would love the opportunity to help.

# MYERS EQUIPMENT MONTHLY

The latest from Myers Equipment and Thomas Built Buses

August 2017

## HIGHLIGHTS FROM OUR JULY SERVICE CLASS

On July 25-26, we hosted mechanics from all over Ohio and Western Pennsylvania for a two day service training class at our place. Topics included but weren't limited to: Cummins, multiplex wiring, coolant specs, new product offerings, and Service Link.

In addition to classroom time, we hosted Ride and Drive sessions, as well. One bus was our telematics bus with BusWise technology. They got the opportunity to experiment with the turn signal-activated side view cameras, lane departure warning system, and following distance warning system. The other available bus was our CNG Saf-T-Liner C2. Additionally, they were able to drive our TCI Mobility van, with bus-style door.

We were especially proud to show off the recent improvements to our parts department and service department. We opened up our building and property for people to check out and see what we have been up to and how far we have come. We aren't done yet, but we are very confident about the direction in which we are heading.
