Do not initiate any testing until we give the OK. While I agree that we should conduct testing we should not do so until we are fully prepared to respond to the results. Once you get results and should they indicate some problem, the clock is running on our duty to respond to them.

Rick/Jordan,

Please see the email from Kevin below -- you weren't copied so I didn't know if you had seen it

Thanks.

This came up at the Senate. Has the Agency conducted our own testing of the units?

If not, we need to do so ASAP and put this issue to rest or remove people from harm. I don't want to rely on non-fed testing.

We also need an information campaign on what we are doing about the potential issue and our eventual findings to include temporary and permanent remedies.
