1. Real interoperability will be a highly desirable feature in your next pump purchase.

![Graph showing audience polling results for real interoperability.]

2. What percentage of infusions do you believe have accurate start and stop times?

![Graph showing audience polling results for accurate start and stop times.]

- 0-20%: 18%
- 21-40%: 33%
- 41-60%: 27%
- 61-80%: 9%
- 81-100%: 4%
3. Discrepancies and errors associated with pump programming and infusion management can be addressed through:

- Better training of healthcare providers in CPOE
- Improved training in the manual programming of devices
- A closed loop infusion system—including pump/eMAR/alarm management
- Governing Board involvement in determining infusion practice

4. How soon will your facility start an EHR infusion pump integration project?

- 1-3 years: 50%
- 4-6 years: 35%
- 7-9 years: 9%
- 10 or more years: 6%
5. Of the benefits offered by a “smart” pump, which has the highest impact on patient safety?

- High utilization/compliance to the drug library: 57%
- Auto documentation of infusion data: 22%
- Data analytics: 16%
- Ease of use: 3%

6. Who is responsible for drug library maintenance at your facility or system?

- Pharmacy: 74%
- A facility team: 11%
- Unknown: 11%
- Vendor: 5%
7. How do you get feedback from nurses?

- 42% Nursing
- 6% Dedicated email
- 45% No system is in place
- 2% Pharmacists
- 0.06% Council
