Dear Colleagues,

You have been invited to participate in this survey to assist The American College of Clinical Engineering (ACCE) with developing the scope of practice and knowledge for clinical engineers during their day-to-day work.

The results will be compiled and analyzed by ACCE for use by the United States and Canadian Board of Examiners for Certification in Clinical Engineering in designing the Certification in Clinical Engineering exam. The participation in this survey by Clinical Engineering Practitioners, such as yourself, is critical to identify how clinical engineering is practiced today.

The results will be used to ensure the certification exam closely matches the body of knowledge clinical engineers need to function in their jobs.

We urge you to please give us 10 minutes of your time and complete this 10-minutes survey by October 7, 2015, to enable your experience to be considered. Your input will help the BOK Committee collect data to define the Body of Knowledge on which the Clinical Engineering profession is based.

Click here to participate

On behalf of the BOK Committee, we thank you for your participation!

Suly Chi
