

(January 7, 2019)— John F. Murray, Jr, of Mount Airy, MD USA, has joined Crisis Prevention and Recovery LLC (DBA SoftwareCPR<sup>®</sup>) as a partner. John retired from the US Food and Drug Administration in December 2018 after 32 years of federal service.

For 25 years at FDA, John focused on FDA regulated software and computer systems. John is an expert in FDA software regulation, software policy and software guidance. He participated extensively in national and international software standards development. John started his FDA career in the Office of Science and Technology, then he spent 15 years in the Office of Compliance finally completing his FDA career as a “startup” member of the FDA’s Digital Health Unit.

As a partner at SoftwareCPR, he looks forward to continuing to share his expertise with industry through consulting and training. For more information, click [softwarecpr.com](https://softwarecpr.com) or call 781-721-2921.

### **About Software CPR**

Crisis Prevention and Recovery, LLC (dba SoftwareCPR<sup>®</sup>) specializes in FDA regulation, representation, and negotiation for medical device, pharmaceutical, and biologics manufacturers. SoftwareCPR<sup>®</sup> partners participate in standards and software policy development as well as training with FDA’s internal software experts. They provide consulting services related to quality systems compliance, MDR reporting, premarket submissions, design control, risk analysis, software validation, recalls, 21 CFR Part 11, usability studies, cybersecurity, project management, and process improvement. SoftwareCPR<sup>®</sup> also provides a software regulatory information and educational subscription service with newsletters, procedural documents, and checklist examples, training aids and reference manuals.
