

Benchmarking Solutions— Sterile Processing

Product Demo

Welcome!

Today's Speakers

- Michelle Bush, AAMI Product Marketing Manager
- Damien Berg, BA, BS, CRCST, currently at Centura Health in Colorado, and an AAMI Volunteer
- Betsy Delfosse, COO, Dynamic Benchmarking

Benefits of Using SPB

Includes over 130 benchmarking metrics. Measure your:

- Practices & policies
- Financial metrics
- Personnel needs
- Developed by leading sterilization and software experts
- Annually reviewed by a joint AAMI and IAHCSSMM task force – last year we added a new section on IUSS, this year we are refining and revising the questions.

Benefits of Using SPB

Compare yourself to “like” facilities (apples to apples)

- Type of hospital: urban, rural, etc
- Type of department: sterile processing, endoscopy, ambulatory service center, etc.
- Type of work load: orthopedics, trauma, robotics, etc

Benefits of Using SPB

See how other facilities are dedicating their time/resources:

- Is your department cleaning pumps or ancillary equipment? Are you getting “credit” for that work?
- How many sterilizers, washers, sonics, etc do you have to help with processing - and how does that play into time and resources?

Benefits of Using SPB

Get your department running as efficiently as possible:

- What time of day demands the most staff?
- How do your staffing metrics compare to other “like” hospitals? (Shift staffing, time staffing, demand staffing.) Can you make the case for hiring more staff?

Benefits of Using SPB

Get useful data you can present to your management

- Number of sets or items you're processing
- Level of set complexity
- Through put of items based on equipment you have
- Staff skill mix
- Staff training

What Makes SPB Unique?

- Other systems compare productivity data, but miss the quality data in SPB
- Other systems are not as comprehensive
- Developed by AAMI and IAHC SMM
- Enables comparisons of similar facilities at a global level
- Hands-on customer service
- Access to SMEs and community of benchmarking users

Leverage the Data to Improve Your Department

Quality improvement: set goals, establish a baseline and measure improvement

- Enter data and track over time
- Establish areas where improvement needed and where things are going well
- Re-enter data at specified intervals and compare to previous results

Leverage the Data to Improve Your Department

Need resources but aren't sure how to ask?

- Provide benchmarking data to your administrators to support your case for more funding and smarter budgeting.

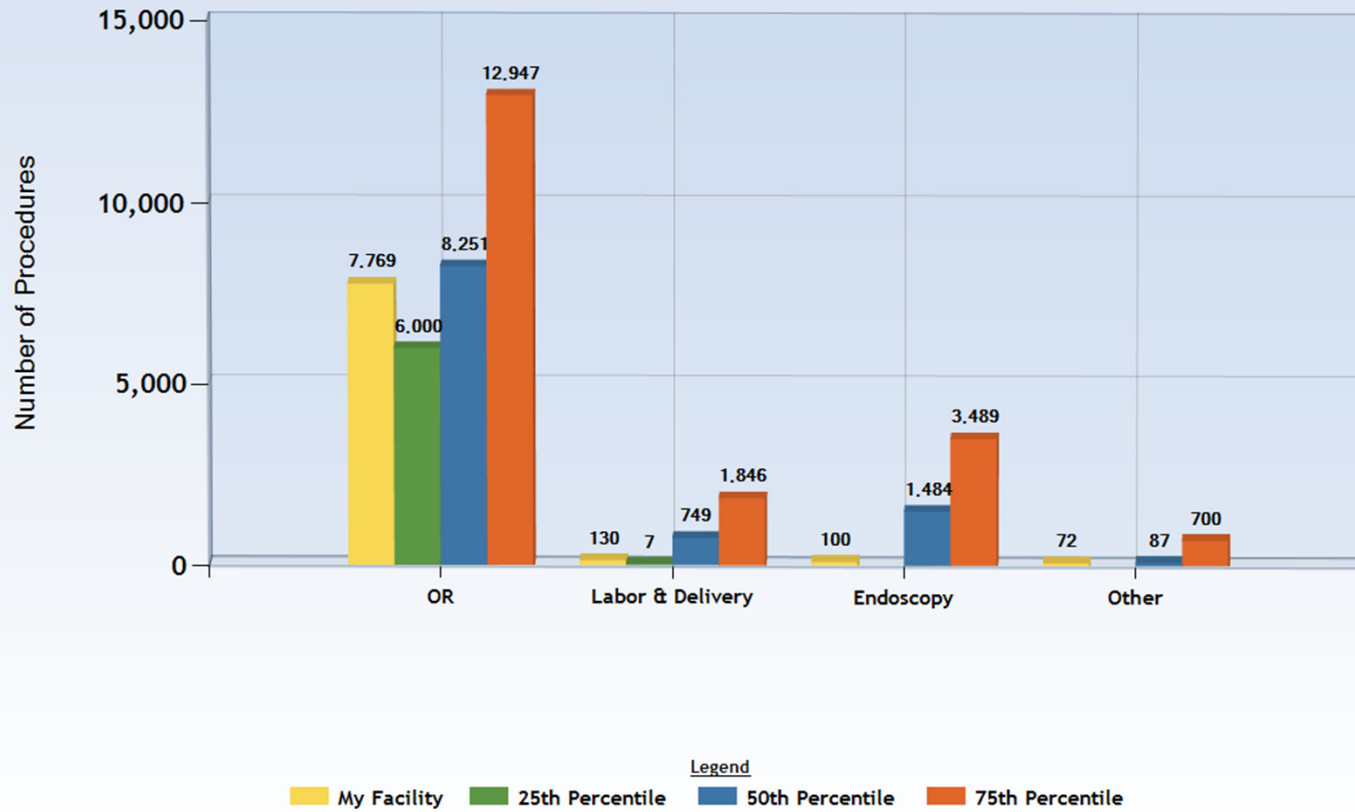

Leverage the Data to Improve Your Department

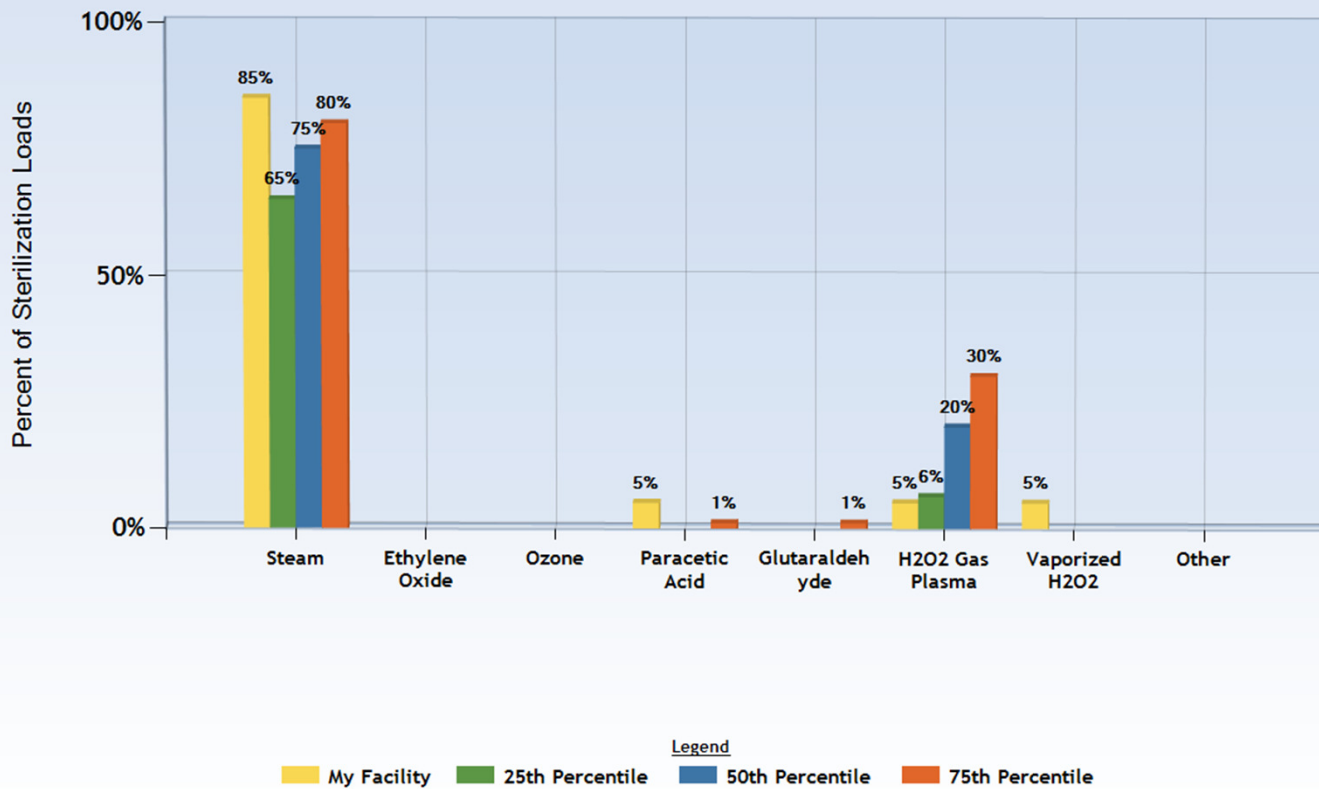

The Joint Commission

- TJC surveyors started training on ST79 in 2011.
 - More knowledgeable of sterilization standards and practices
 - Prepare for TJC with SPB
- Make action plans based on SPB to ensure compliance with standards

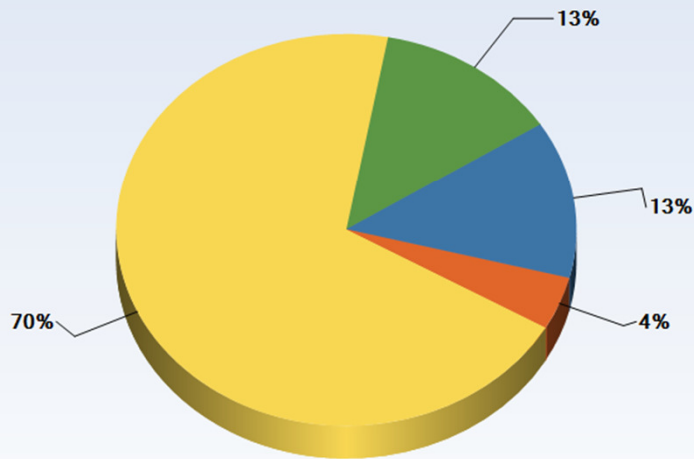

Allocation of Total Surgical Procedures by Department

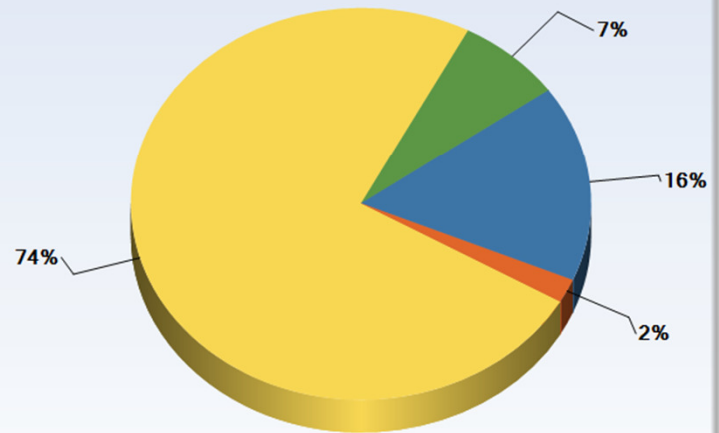

Allocation of Sterilization Processes

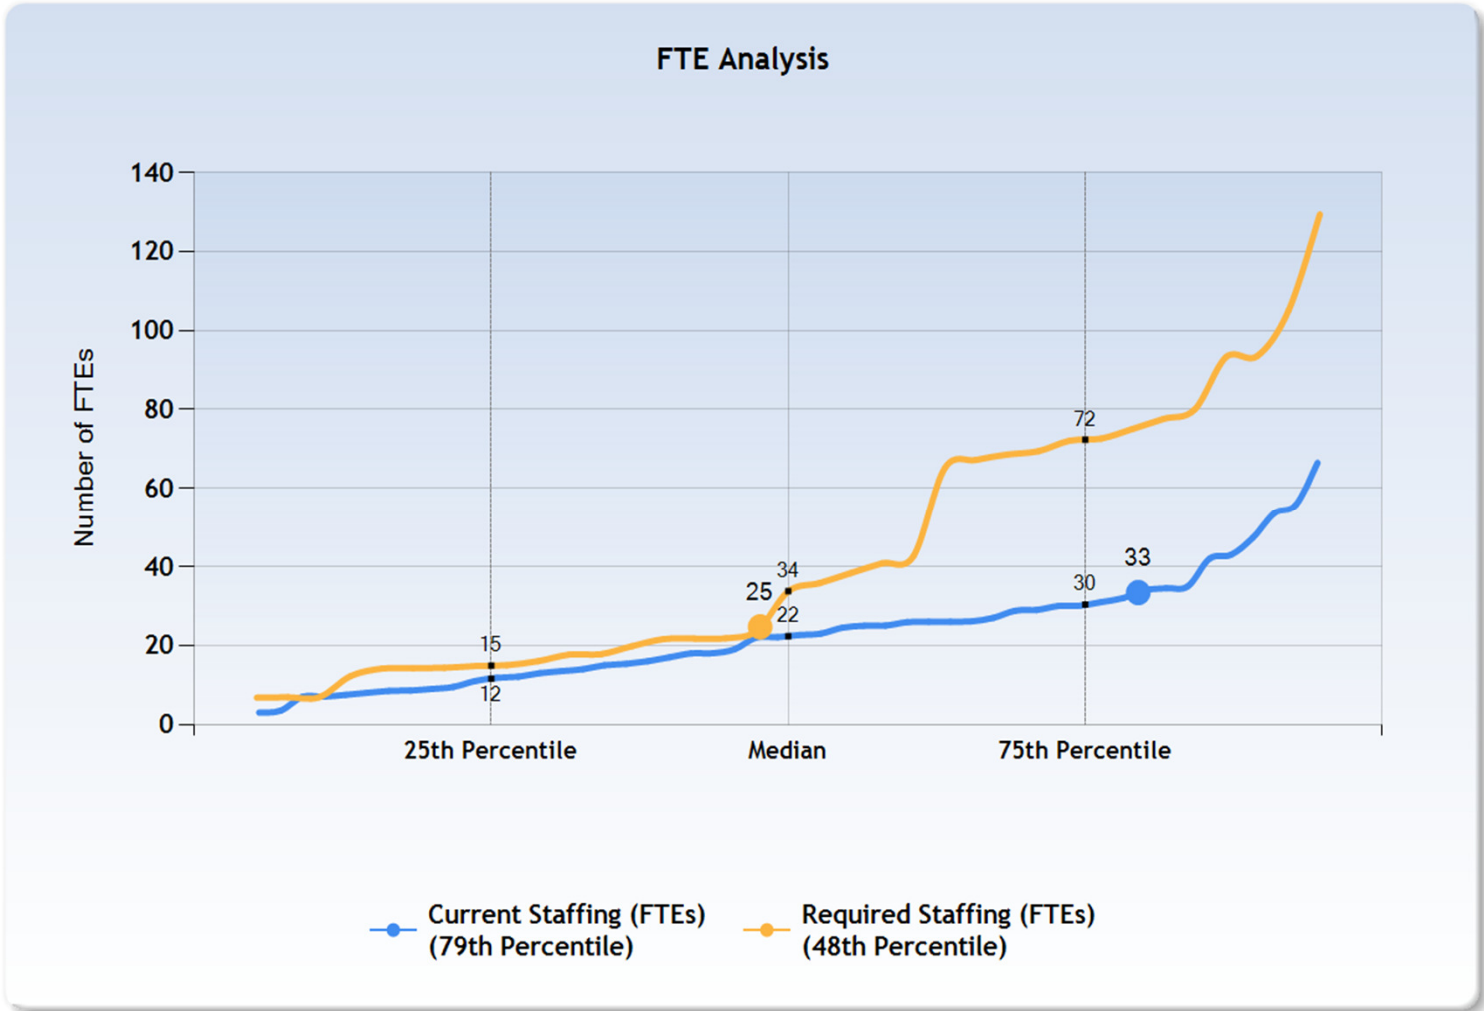

**Allocation of SPD and Non-SPD Employees
 My Facility**

**Allocation of SPD and Non-SPD Employees
 Average Facility**

■ Full-time SPD Staff
 ■ Part-time SPD Staff
 ■ Full-time Non-SPD Staff
 ■ Part-time Non-SPD Staff

Here's What You Get With Your Subscription

- Welcome kit with detailed instructions on how to use the platform
- Annual Report with analysis of benchmarking data and the trends shaping sterile processing
- Access to annual subscriber meeting at IAHCSSMM conference, benchmarking webinars, and more
- Year round access to customer support, SMEs, and online subscriber community

Do you Manage Multiple SPDs?

- We know that some people manage multiple hospitals or even multiple departments in one hospital (Outpatient and Inpatient).
- AAMI offers special pricing for bulk accounts based on the quantity you need, so please call 877-249-8226 for details.

How To Order

- One Year Subscription: \$850 (\$750 for AAMI and IAHCSSM Members)
- To order online, visit www.aami.org/benchmarking

Other questions? Contact Michelle Bush at
mbush@aami.org.

**SPECIAL OFFER: \$100 OFF FOR NEW SUBSCRIBERS.
SIGN UP BY JULY 31, 2016**
