Vocational Rehabilitation Resources for Teens Transitioning into Adulthood

Transition into Adulthood

If a child is 16 or older, their Individual Education Plan (IEP) will include transition services that are intended to help them prepare to move from the world of school to adulthood. As part of transition planning, the IEP team will consider post-secondary education, vocational training or employment.

Often, the school’s IEP team is joined by a vocational rehabilitation counselor from the state. By planning the transition process, teens will be prepared to move onto the next phase of their life and supports will be in place.

Every state has a federally funded agency that administers vocational rehabilitation (VR), and supported employment. VR assists people in finding jobs through local searches and
by promoting self-employment and telecommuting opportunities. VR services vary widely depending on the state but typically include medical, psychological and vocational assessments; counseling and guidance; vocational and other types of training; interpreter and reader services; services to family members; rehabilitation technology; placement; post-employment services; and/or other goods and services necessary to achieve rehab objectives and secure employment. In some cases, VR may pay for transportation and vehicle modification.

The services are different in each state based on their funding. To find your state visit the Job Accommodation Network: http://askjan.org/cgi-win/TypeQuery.exe?902.

The Center for Parent Information and Resources (CPIR)
35 Halsey St., Fourth Floor
Newark, NJ 07102
Email: malizo@spannj.org
(CPIR) serves as a central resource of information and products to the community of Parent Training Information (PTI) Centers and the Community Parent Resource Centers (CPRCs), so that they can focus their efforts on serving families of children with disabilities. Every state has at least one Parent Training and Information Center (PTI) to offer families just this kind of information. Many states also have a Community Parent Resource Center (CPRC), which offers the same type of support and training to parents of children with disabilities. This website offers a map locator by state, click on your state to find the centers in it.

U.S. Department of Education: Students with Disabilities Preparing for Postsecondary Education – Know Your Rights and Responsibilities
The information in this pamphlet, provided by the USDE’s Office for Civil Rights and updated in September 2011, explains the rights and responsibilities of students with disabilities who are preparing to attend postsecondary schools. This pamphlet also explains the obligations of a postsecondary school to provide academic adjustments, including auxiliary aids and services, to ensure the school does not discriminate on the basis of disability.

http://www.ed.gov/print/about/offices/list/ocr/transitionguide.html
U.S. Department of Education: Transition of Students with Disabilities to Postsecondary Education – A Guide for High School Educators
This guide developed by the USDE’s Office for Civil Rights and updated in March 2011 highlights the significant differences between the rights and responsibilities of students with disabilities in the high school setting and the rights and responsibilities these students will have once they are in the postsecondary education setting. It provides answers to frequently asked questions and some practical suggestions that high school educators can share with students to facilitate their successful transition to postsecondary education.
For more information on education for people with disabilities or employment for people with disabilities, please see the Reeve Foundation’s fact sheets on those topics. You may also want to see the Vocational Rehabilitation factsheet (for adults).
