Overview

Q-Gold Resources Ltd. is a mineral exploration company focused on exploring for precious metals and base metals in North America.

Properties

Mine Centre, Ontario - Gold (100% owned) 32,000 acres - Located 65 kilometres east of Fort Frances, Ontario, 5 km south of Mine Centre and the Trans-Canada Highway. The Company's prospective precious and base metal claims are situated in the historic (1890s) Gold Camp at Mine Centre.

- Includes 5 old gold mines, 2 of which were producers
- Historic Foley Gold Mine being de-watered
- 2,520 acres of PGE and Cu/Ni prospects at Iron Ridge on western shore of Bad Vermilion Lake

Rainy River, Ontario – Gold – Prospects covering 7,600+ acres SW of major new gold discovery being explored in Greenstone volcanic sequence

Highlights

➤ **100% Owned Property.** The Company owns over **32,000 contiguous acres** of Archean-Greenstone Belt gold mining claims and leases. Greenstone belts in Archean Age rocks of the Canadian Shield are known to contain ore deposits of gold, silver, copper, zinc and lead.

➤ **Under-explored properties.** Five historic gold mines are located within the area, two of which were producing gold mines. The Foley and Golden Star Mines produced 16,000+ ounces combined in the 1890's and 1930's. The remaining three other mines, Decca, Ferguson and Manhattan never reached production status, however the Company plans on exploring these mines in 2008. Q-Gold owns all five mines.

➤ **Historical Resource and Reserve Estimates – Foley Mine** - Potential reserves of up to **238,000 ounces of gold**. Q-Gold must first confirm the above reserves in future diamond core drilling programs. [Note: The above listed resource and reserve estimate does not qualify under the Canadian Institute of Mining's definitions required by National Instrument 43-101.]

➤ **Rich in various mineral commodities.** The Mine Centre area is known to encompass the following mineral commodities; precious metals, copper-nickel, iron-titanium deposits and volcanogenic copper-zinc. **100+ Gold-Bearing Quartz Veins.**

➤ **Good Infrastructure.** Highway, rail, power and water allow for year-round operations and help to lower exploration costs

Foley Mine - New construction on collar of North Shaft to permit underground exploration.
