

“With its new AccuPoint®, Trijicon has raised the bar on the innovations and features I’ve come to rely on. The new reticle options are highly effective in any light condition and the housing is as rugged as the environments in which I make my living.”

Craig Boddington
Professional hunter and author

Trijicon AccuPoint® Series

The Trijicon AccuPoint® is updated with new, advanced fiber optics and several intelligent features that make this scope the right choice for all light conditions and even the harshest environments.

ADVANCED

The latest riflescopes in the AccuPoint Series combine advanced, self-luminous aiming technologies and superb clarity with the added precision of the reticle most preferred by hunters — a crosshair.

Of course, AccuPoint continues to offer the original triangle reticle, which has the additional benefit of the Bindon Aiming Concept™ (BAC), allowing you to keep both eyes open while tracking, taking aim, and shooting.

EFFECTIVE

All models in the AccuPoint Series operate battery free — eliminating the potential for failure during

critical moments in the field. They also feature Trijicon's Improved Manual Brightness Adjustment Override, which allows you to control the light output of the fiber optics during daylight.

AccuPoint riflescopes are loaded with other advanced optical elements like multilayer coated lenses for superior light transmission with no distortion. There's also a quick-focus eyepiece, long-eye relief, and precise windage and elevation adjustments.

TOUGH

The AccuPoint's rugged construction protects it from the toughest elements. It's crafted from aircraft-quality, hard-anodized aluminum

with a tube that's nitrogen-filled to prevent corrosion and eliminate fogging. A solid, black-matte finish eliminates glare and light reflection, which could spook game. The AccuPoint is the hunter's clear choice for even the most challenging conditions.

Assembled in the U.S.A.

Offers Big Game Hunters Big Time Features

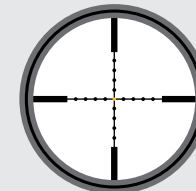

Combining Trijicon's exclusive dual-illumination technology with the clarity of a multilayer coated lens and durability of a hard-anodized aluminum body, Trijicon AccuPoint® riflescopes rival the performance of scopes at twice their price.

Aiming is believing: Once you place its dual-illuminated reticle on your target, you will never go back to a sight with standard black crosshairs. Game acquisition and aiming is enhanced with the Bindon Aiming Concept™.

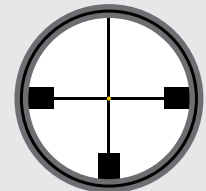

Trijicon AccuPoint® Reticle Options:

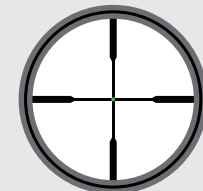

Red Triangle

Mil-Dot

German #4

Standard Duplex

Reticle Color Options:

Crosshairs are currently not available in red. Reticles not to scale.

Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the Trijicon Aiming Point reticle to available light conditions.

Manual Brightness Override

Easily adjust the Trijicon Aiming Point brightness to your personal preference.

Easy-Focus Eyepiece

Ensures unsurpassed edge-to-edge optical clarity.

Longer Eye Relief

Provides unparalleled eye relief and protects against high-impact recoil from larger caliber rifles.

Solid, Black-Matte Finish

Eliminates glare and light reflection.

Scope Body is Crafted from Aircraft-Quality, Hard-Anodized Aluminum

All-weather rugged construction protects against the toughest elements.

Multilayer Coated Lenses

Superior clarity and light gathering capabilities with zero distortion.

Assembled in the U.S.A.

Model TR20

Trijicon Tritium-Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition — with no batteries to fail.
