

# THE DIFFERENCE IS IN THE DETAILS.

## CRANK LIFT WITH AUTOMATIC TILT

This unique patented design allows you to automatically tilt the umbrella with a simple turn of the handle.

## HANDLES

Our crank handles are made of precision die-cast zinc. They are chrome plated and polished for beauty and a longer life span. But best of all, they are safe to use with no risk of backlash at any umbrella position.

## CRANK LIFT WITH 360 ROTATION AUTO TILT

This unique patented design allows you to automatically tilt your umbrella with the simple turn of the handle. With a turn of the collar you are able to turn the tilted umbrella 360 degrees. Stop and lock in place at any point.

## CORDS

Our cord is virtually indestructible and is made from a single braided nylon sheath covering a core of tightly twisted 5 ply nylon cables. The entire cord is nylon coated to resist abrasion.

## CRANK LIFT WITH COLLAR AUTO TILT

Automatically tilt your umbrella by simply rotating the collar.

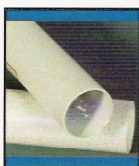

## FINIAL / BELL CAP

The precision molded heavy gauge plastic finial cap provides decorative appeal. Our Bell cap not shown provides for easy storage of the umbrella.

## PUSH BUTTON TILT

Our manual push button tilt feature allows you to position the umbrella at 35° and 45°. A simple press of the inner-locking push button system tilts the umbrella in place.

## UMBRELLA POLES

Each one of our poles uses the finest Weatherguard powder coating system. Our poles are made of extruded aluminum for years of maintenance free service.

## NOTCH/RUNNER

For maximum strength and durability, Avanti uses a polypropylene notch and runner which is self lubricating and eliminates scoring of the pole permitting a much smoother umbrella opening.

## FABRICS

We offer high quality USA and Asian fabrics. Please refer to our swatch books where you'll find over 80 fabrics to choose from.
