

## Design style

---

### Suits your style, any style you might have.

No matter what style you have (or going to have) there will be a perfect Natural Wooden Floor complimenting it.

Minimalism design just asks for a prime grade with unobtrusive, simple grain. Small boards without bevelled edges will create a smooth harmonious surface, without looking unnatural.

And Country kitchens will benefit from rich warm colours, from honey Oak with lots of knots to the wide variation in colour of a Rustic Iroco/Kambala floor.

Modern apartments with modern clean furniture will go perfectly with a light coloured wood: European or Canadian Maple, warm pinkish Steamed Beech or the pale Ash.

But nothing can beat the good-old Oak floor: suits any design style, be it minimalism, contemporary, county, Art-Deco or Georgian and Edwardian. Oak has a rich choice in grades where for instances the prime grade will compliment contemporary and minimalism and where the extra rustic will enhance your County-style design.

What ever your style: keep an eye on the era of your property; make sure your decoration matches it, especially when you're thinking of moving up on the property ladder.

Natural Wooden Flooring creates a clean, uncluttered feel too. They can transform a living space, bringing calm and order where chaos once reigned! Choose a wooden floor that works well with your existing interior design and vary the species or the colouring to suit a room's function. Feel free to browse in [our showroom](#) to help selecting the wood and or colour best suited for your style.

**Who else wants a robust floor covering that becomes more beautiful over time?**

A wide selection of natural wooden flooring: [From Basic Oak to Bespoke](#) can be found in our [secure webshop](#)
