

Mozilla Thunderbird 2

This lesson will guide you through setting up your Hover e-mail in Mozilla Thunderbird as a POP3 account.

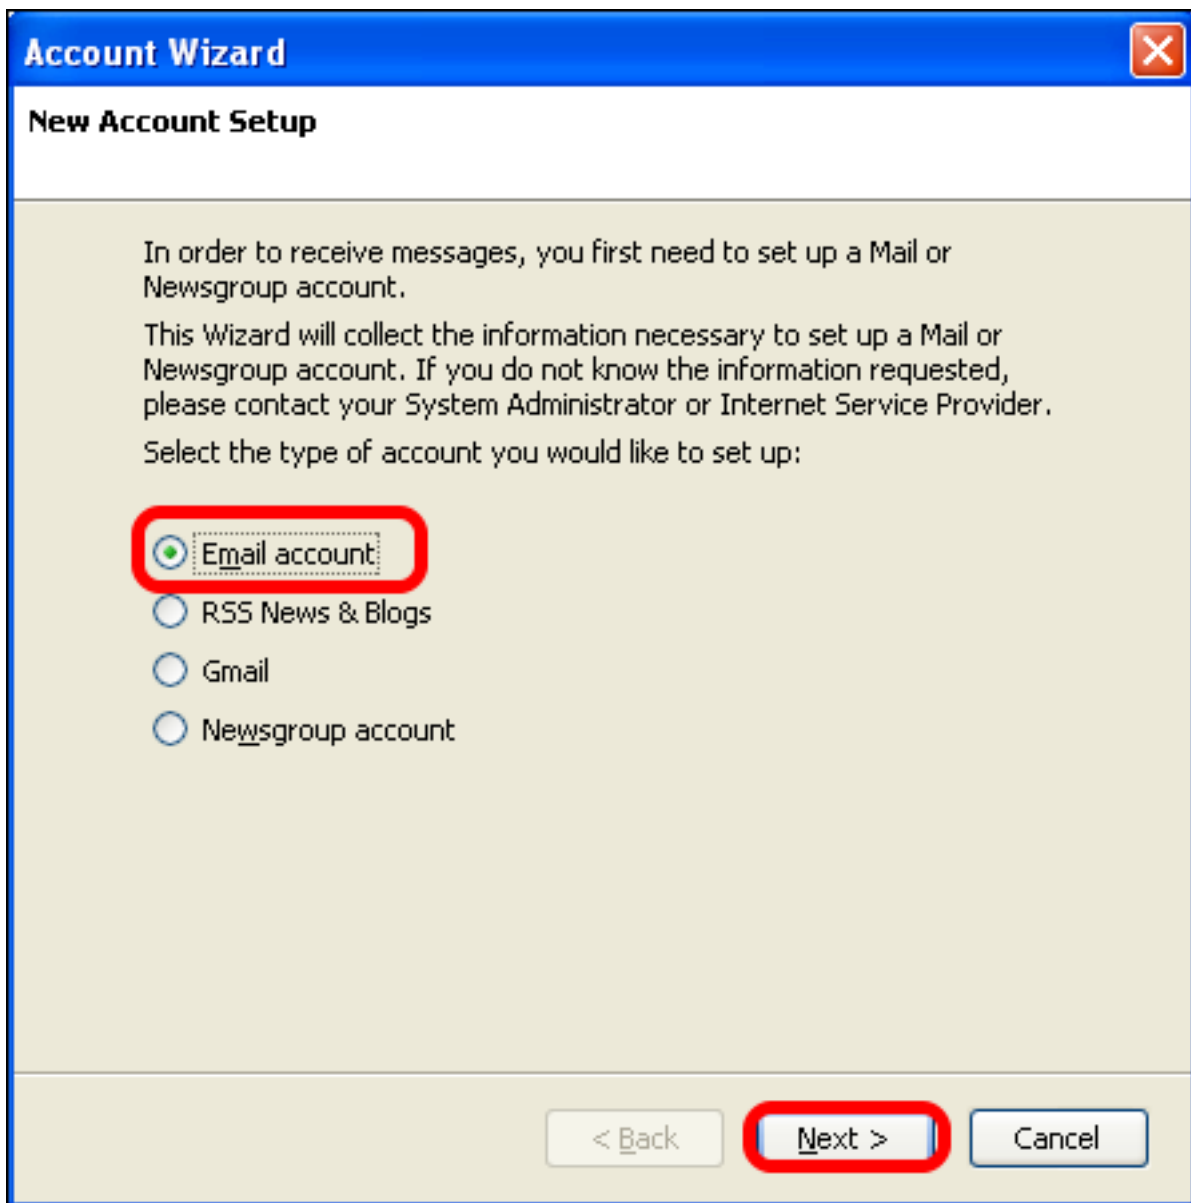

Configure E-mail Account In Thunderbird

Click on Tools and select Account Settings.

Click on Add Account.

Select "Email account" and click Next.

Account Wizard ✕

Identity

Each account has an identity, which is the information that identifies you to others when they receive your messages.

Enter the name you would like to appear in the "From" field of your outgoing messages (for example, "John Smith").

Your Name:

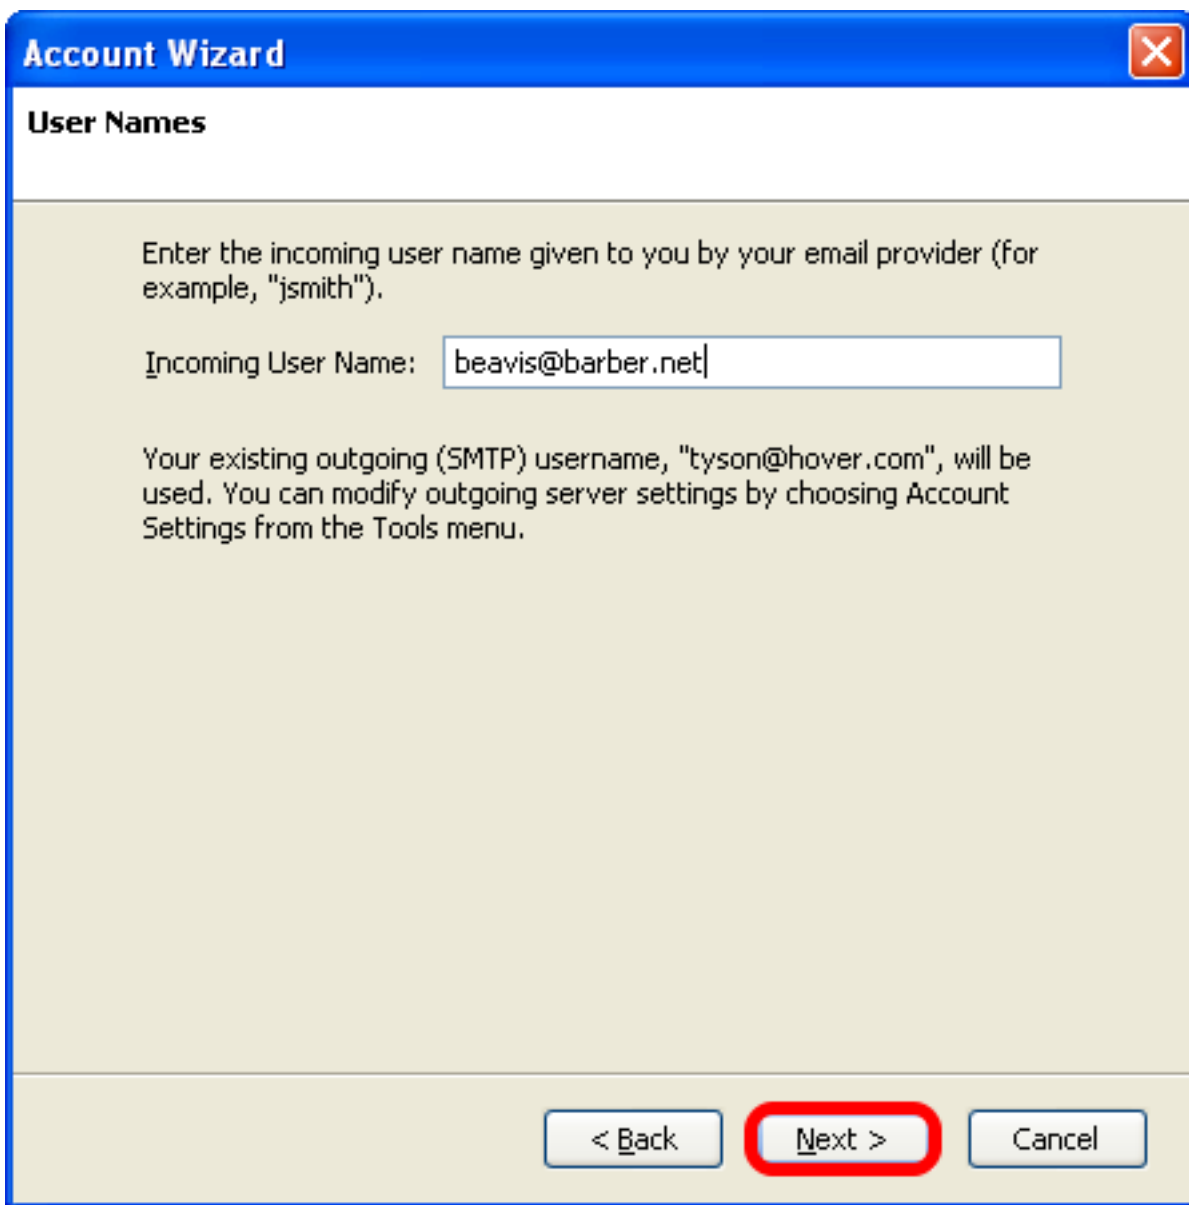

Enter your email address. This is the address others will use to send email to you (for example, "user@example.net").

Email Address:

Enter your name and e-mail address then click Next.

Select POP as the account type then enter mail.hover.com as the Incoming Server and click Next.

Enter your full e-mail address as the Incoming User Name then click Next.

Account Wizard ✕

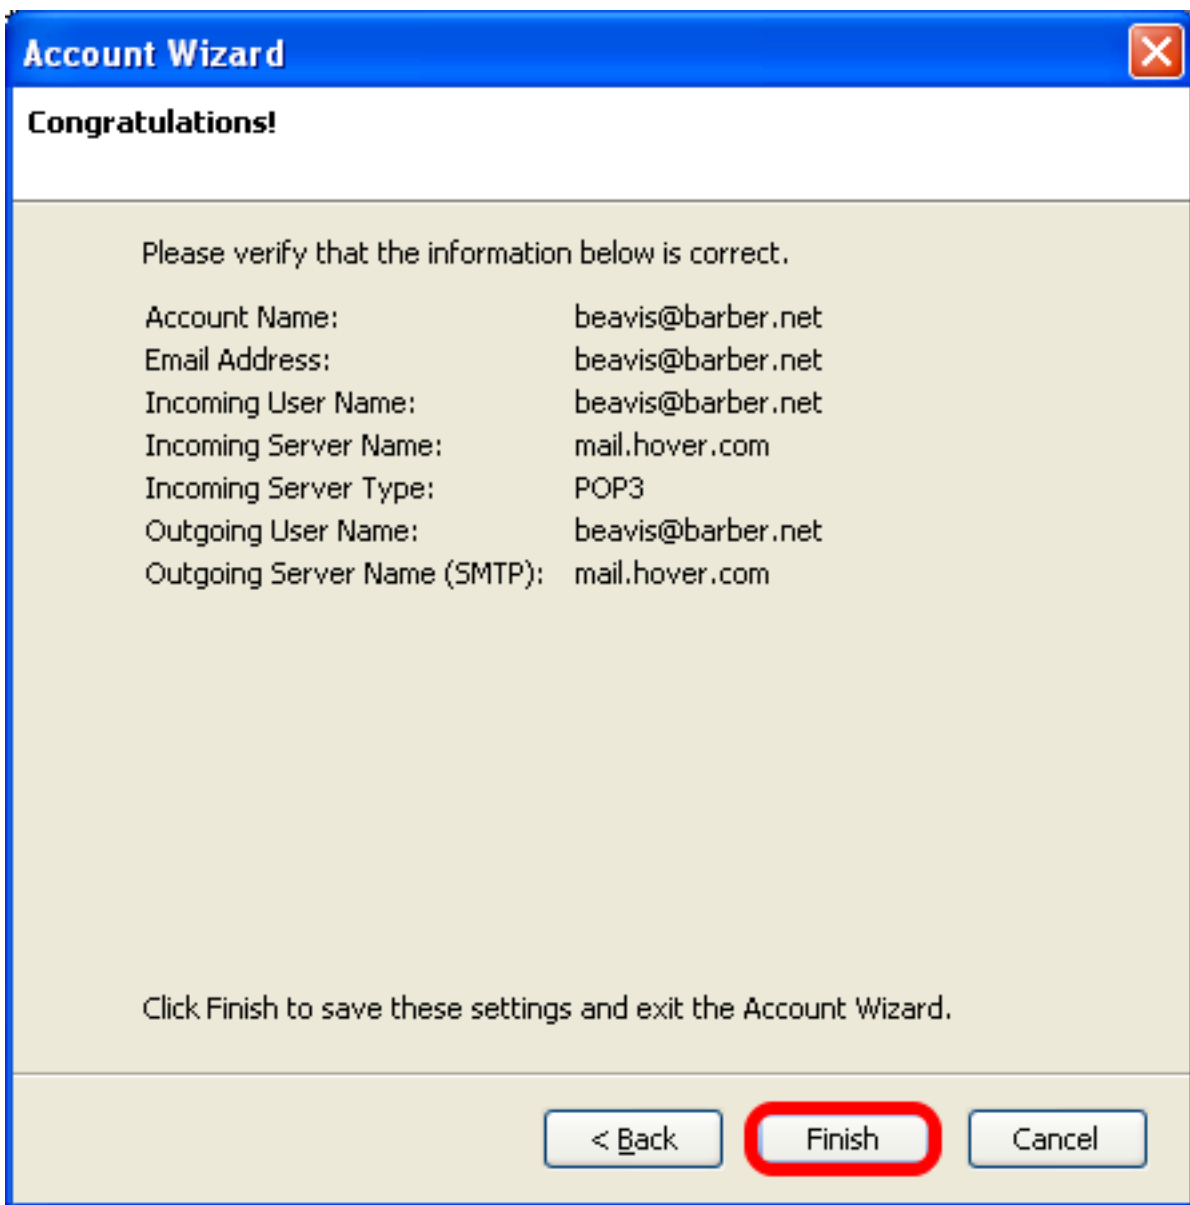

Account Name

Enter the name by which you would like to refer to this account (for example, "Work Account", "Home Account" or "News Account").

Account Name:

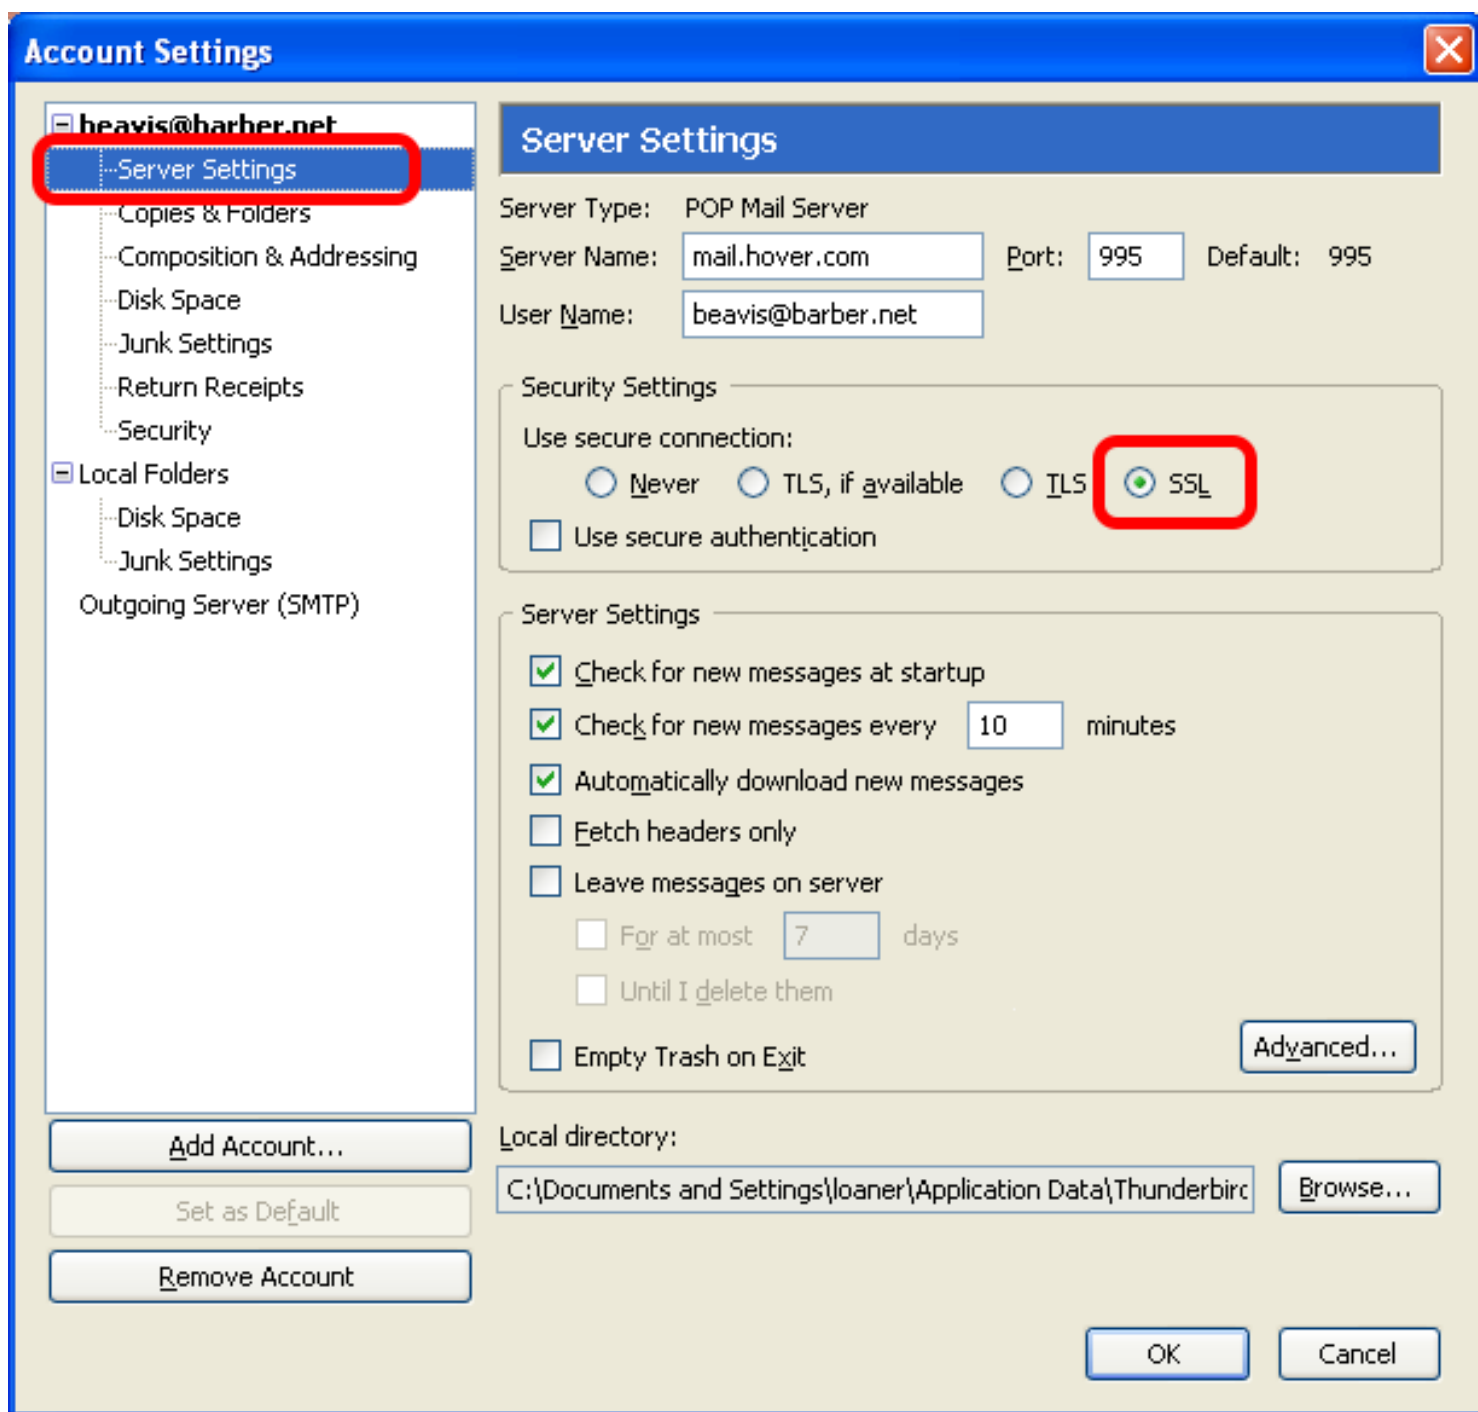

< Back **Next >** Cancel

Enter a name for your account then click Next again.

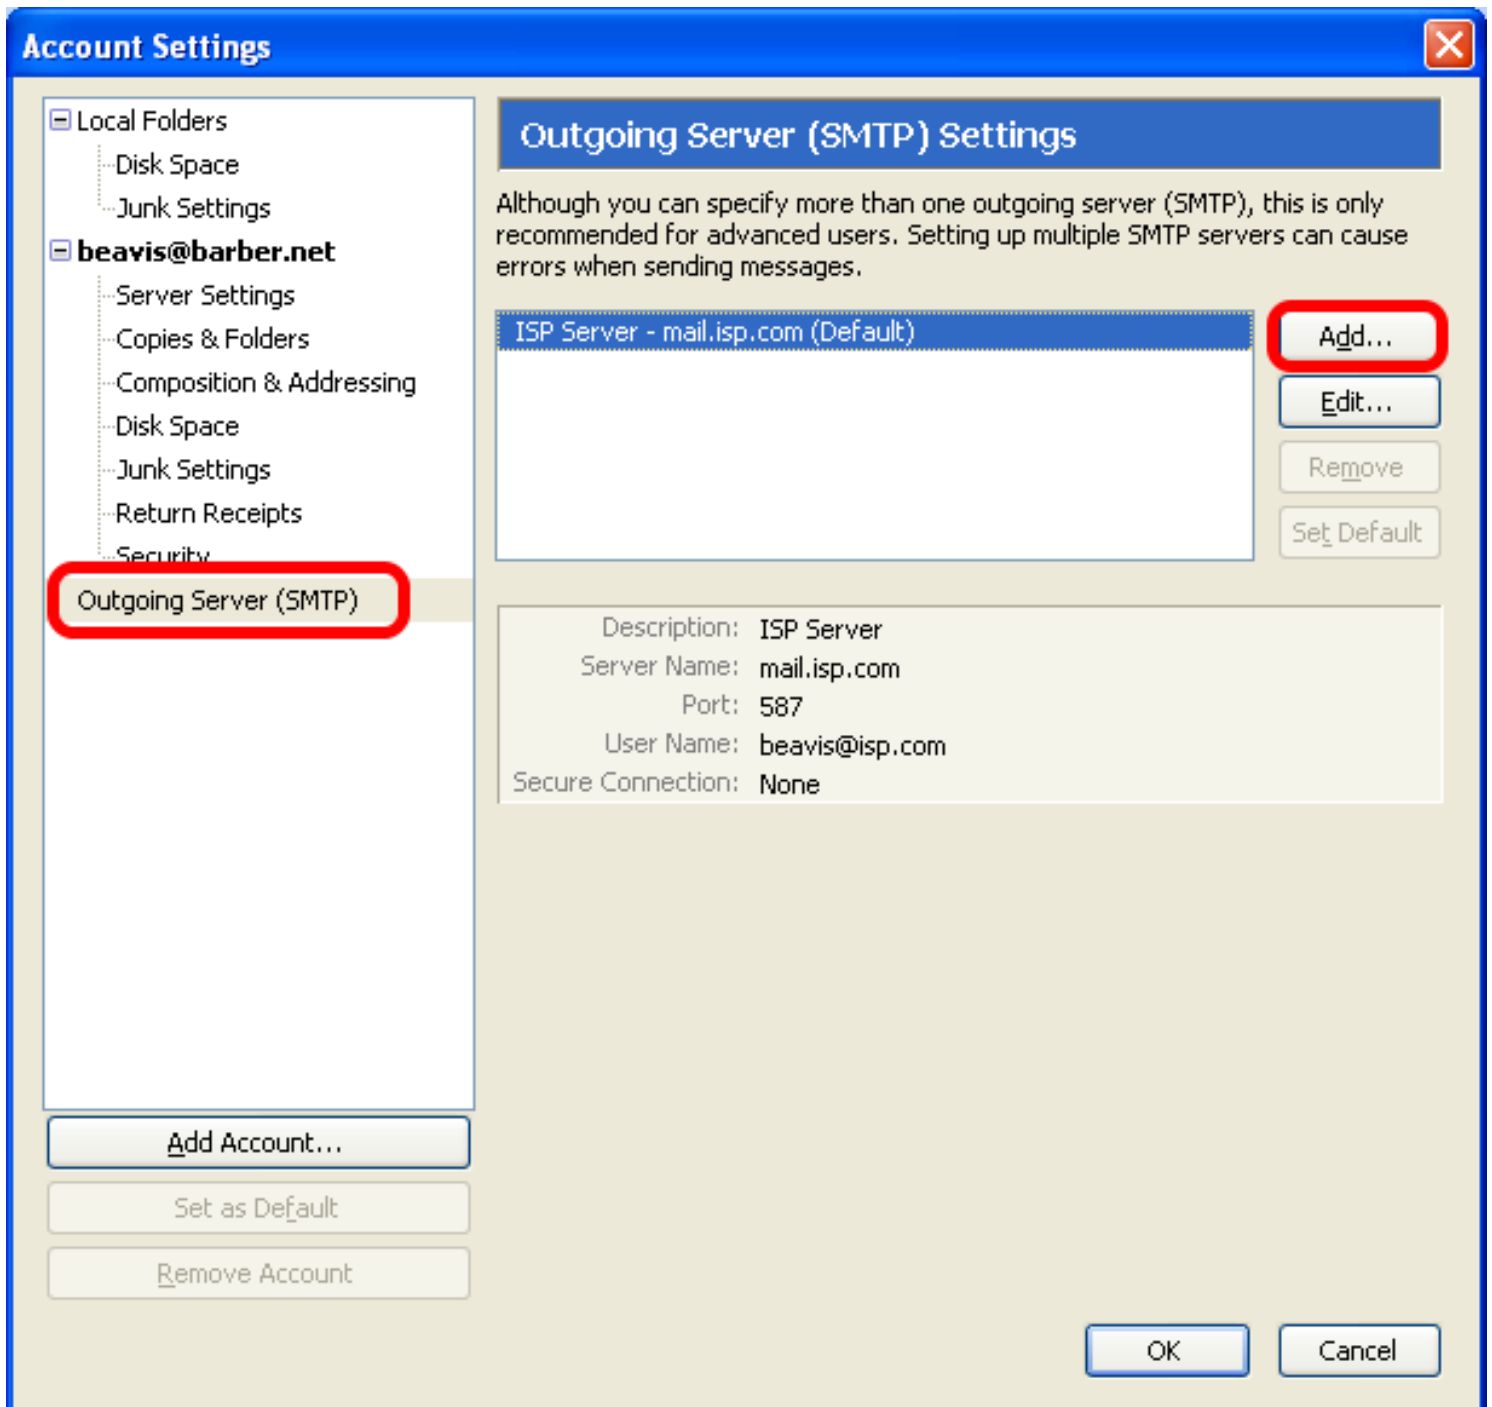

Click Finish.

Enable SSL

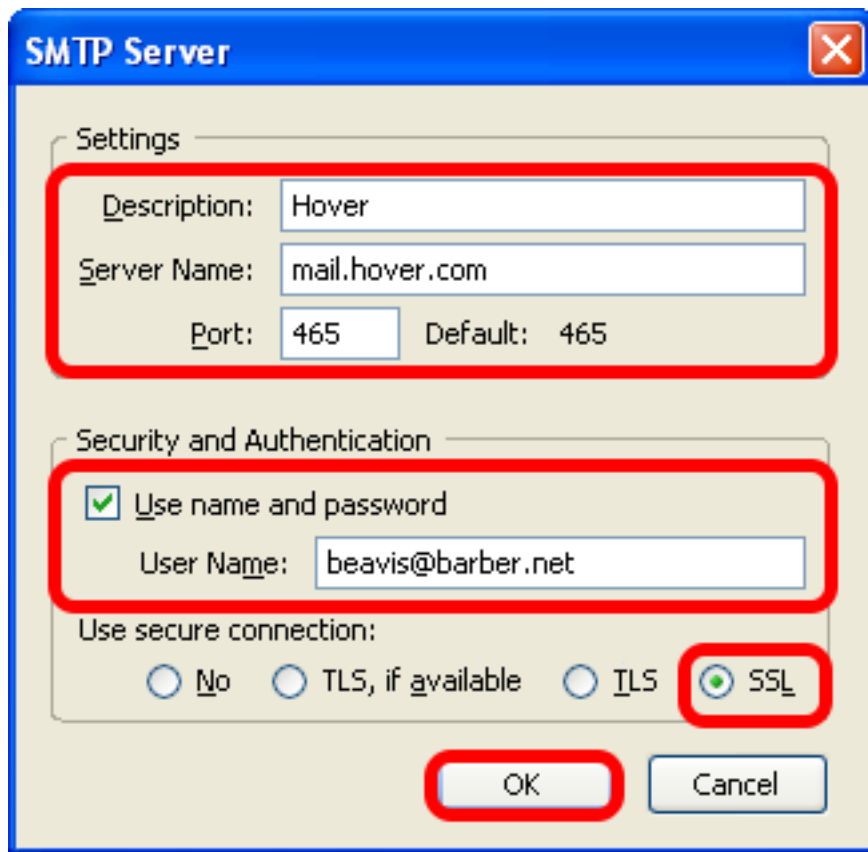

Select Server Settings under the new account and select SSL under the Security Settings.

Add Outgoing Server (SMTP)

Select Outgoing Server (SMTP) then click on Add.

Enter the following settings:

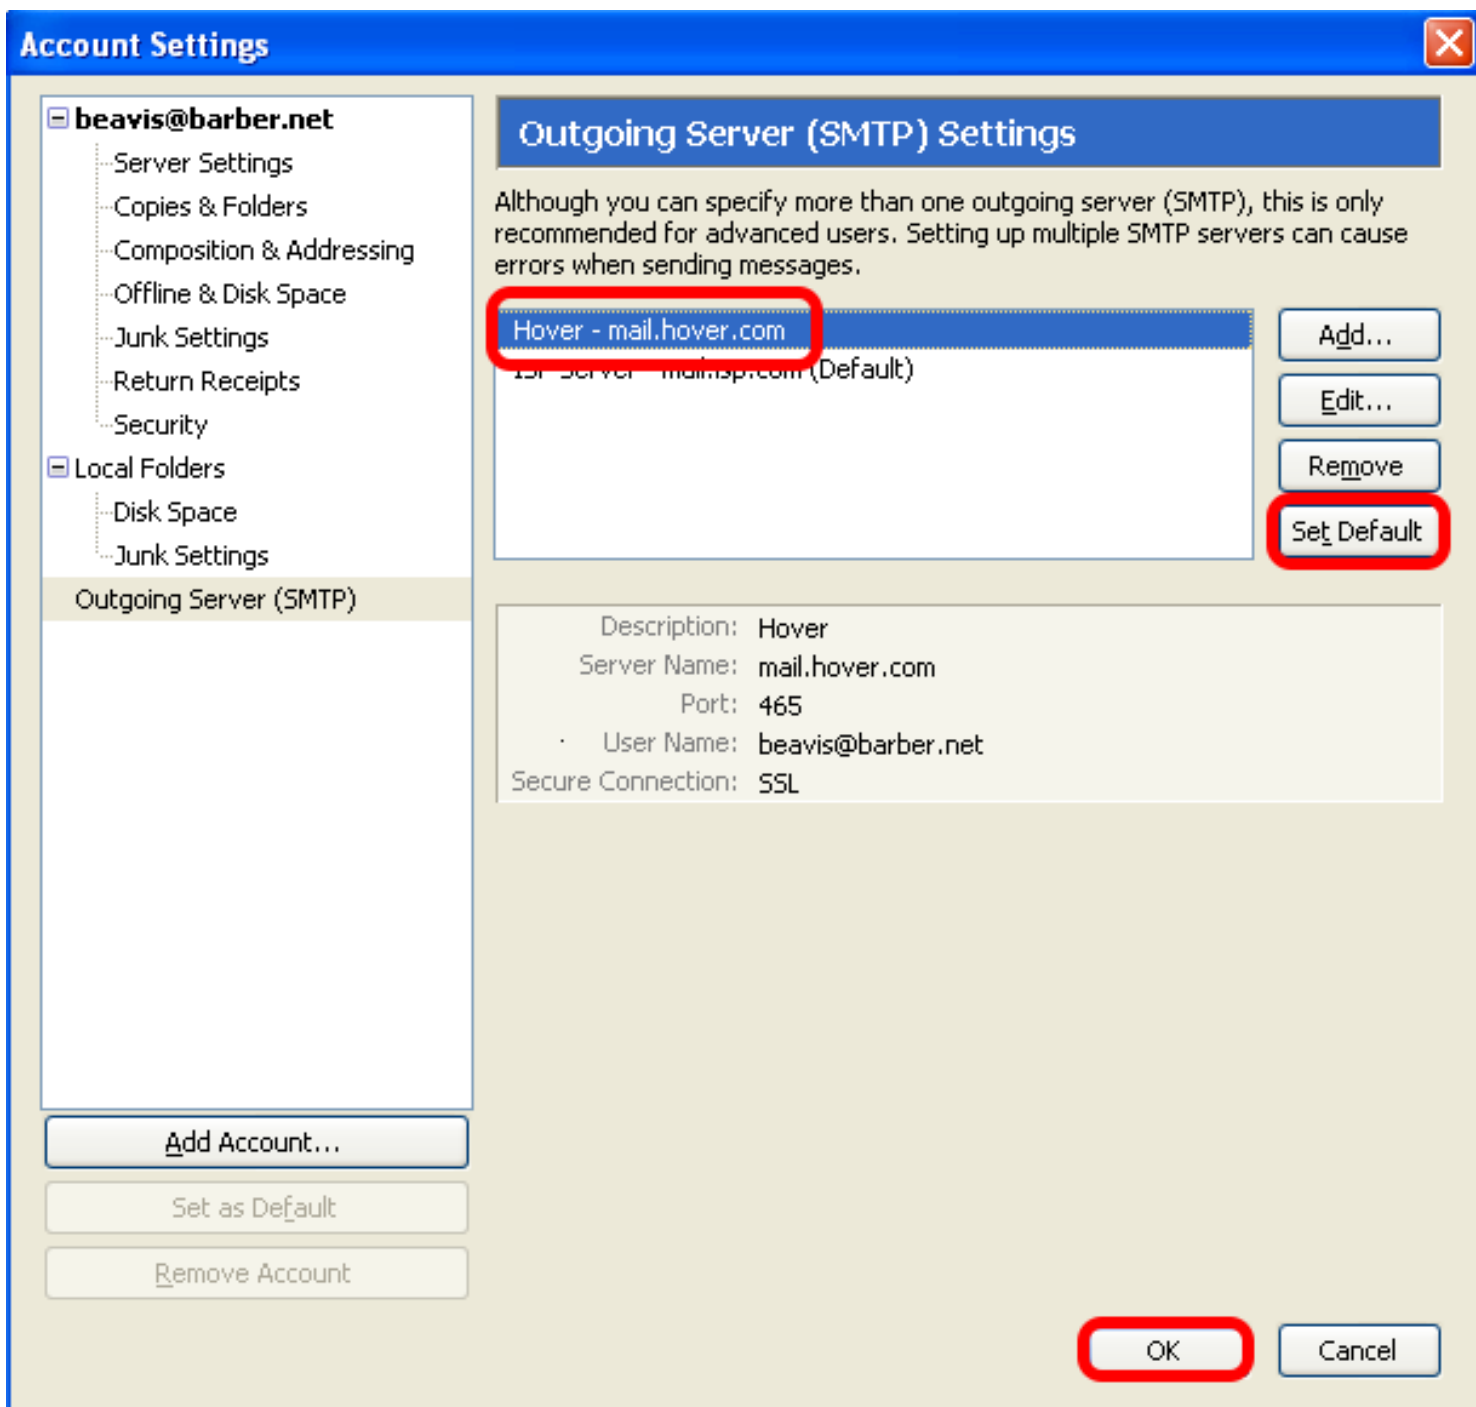

Description: Hover

Server Name: mail.hover.com

Port: 465

Under "Security and Authentication" put a check next to "Use name and password" and enter your full e-mail address as the user name.

Select SSL then click OK.

If you have more than one outgoing server configured in Thunderbird Hover should be set as the default server. To do this, highlight your Hover account and click on Set Default and click OK to save the settings.

Your account is now configured in Thunderbird!
