

Entourage 11.4.0

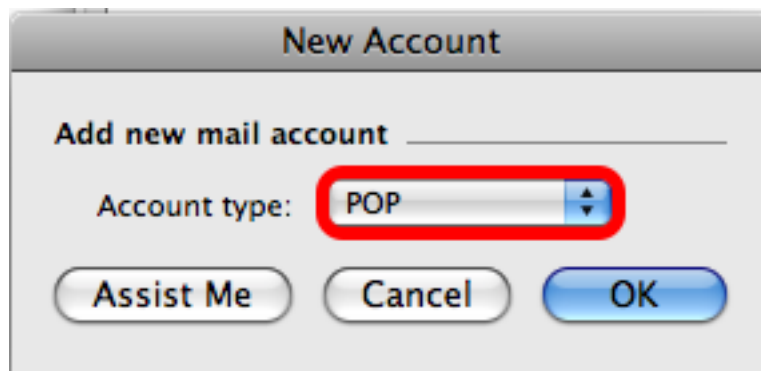

This tutorial will guide you through configuring your Hover email account in Entourage using POP3.

Click on the Entourage menu and select Account Settings.

Click on New.

Select POP as the account type then click OK.

Edit Account

Account Settings Options Security

Account name: beavis@barber.net

Include this account in my "Send & Receive All" schedule

Personal information

Name: Beavis Barber

E-mail address: beavis@barber.net

Receiving mail

Account ID: beavis@barber.net

POP server: mail.hover.com

Password:

Save password in my Mac OS keychain

[Click here for advanced receiving options](#)

Sending mail

SMTP server: mail.hover.com

[Click here for advanced sending options](#)

Cancel OK

Enter the following settings:

Account name: enter your email address

Name: enter your name as you want it to appear on your outgoing messages

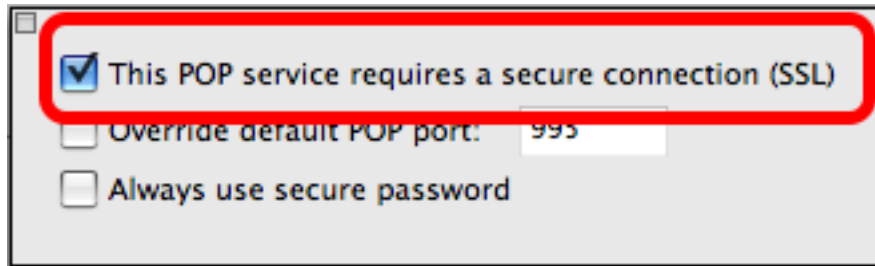

E-mail address: enter your Hover email address

Account ID: enter your Hover email address

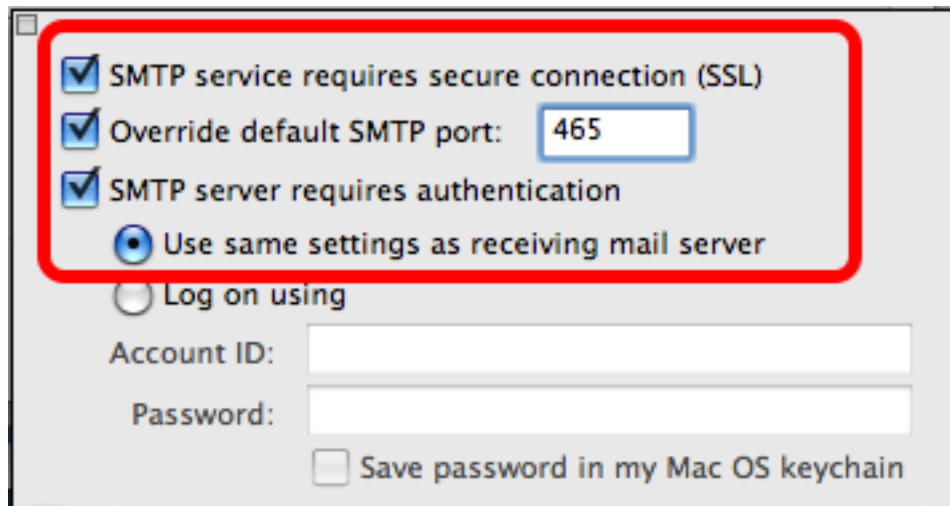

POP server: mail.hover.com

Password: enter your Hover email password

SMTP server: mail.hover.com

Click on "Click here for advanced receiving options" then put a check next to "This POP service requires a secure connection (SSL)."

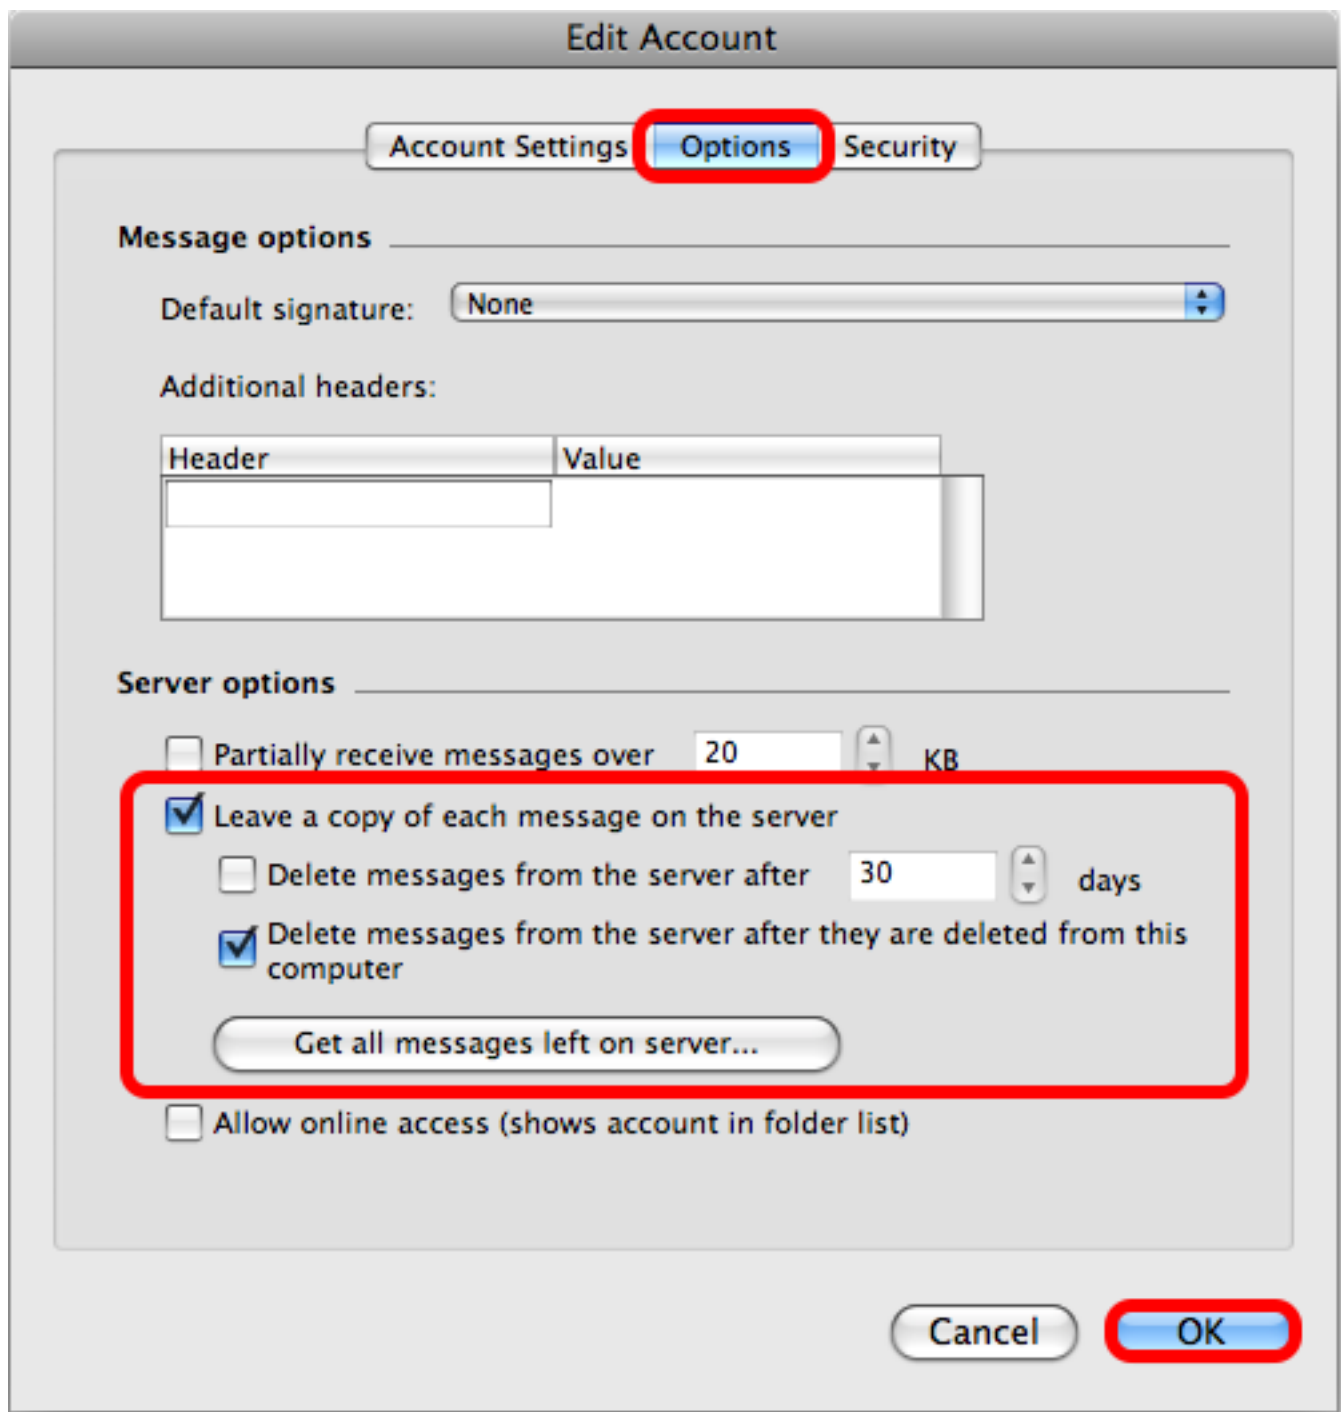

Click on "Click here for advanced sending options" then put a check next to each of the following options:

SMTP service requires secure connection (SSL)

Override default SMTP port - enter port 465

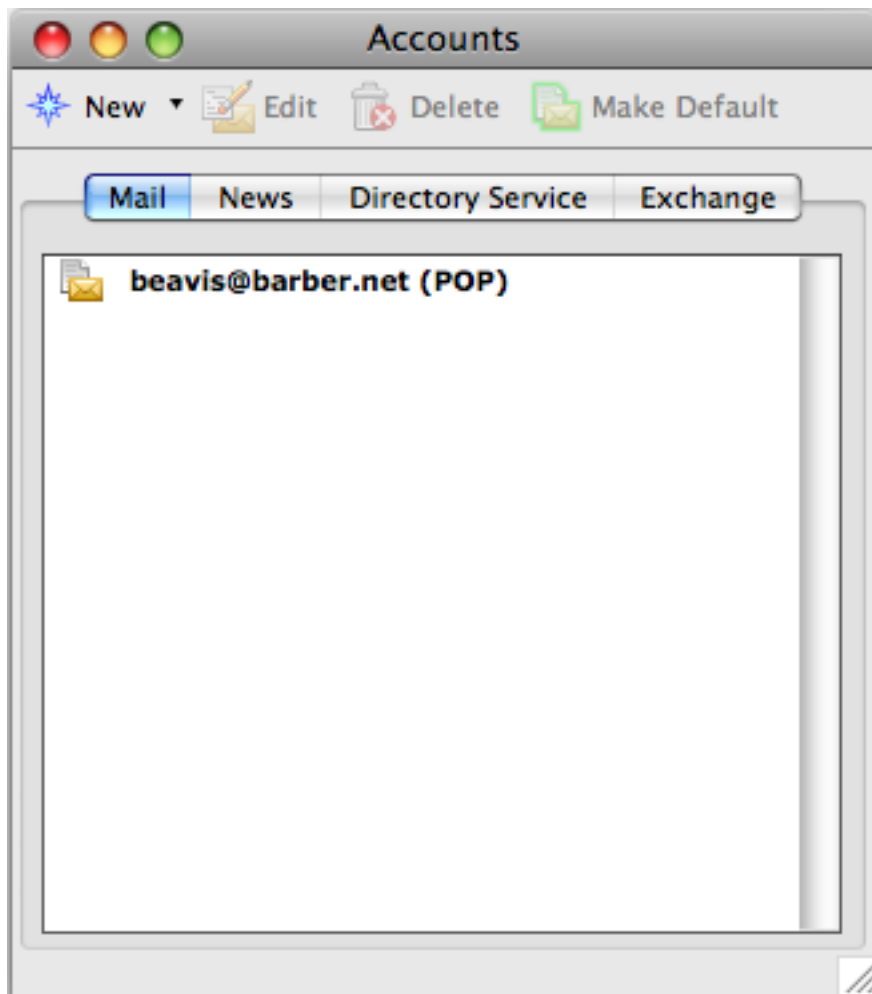

SMTP server requires authentication - select "Use same settings as receiving mail server"

After entering all of the account settings, click on Options.

Under Options there is an option to "Leave a copy of each message on the server." You should select this option if you want to receive email on more than one computer, keep a back up of messages on our server, or if you want to be able to access old email messages remotely using webmail.

Click OK when finished.

The new account will be listed in the Accounts window. You can close the window.

The account configuration is complete!
