

# CCSD #1 Technology Department

Welcome, prospective teachers, to Crook County School District #1. We thank you for considering a position with our district and further applaud you for your interest in the technology we have and support. To facilitate learning within our schools as well as a commitment to fulfilling the district's mission statement, the CCSD #1 Tech Department strives to own and maintain technology, software and training that is up-to-date and user friendly to staff and students.

Please keep in mind that technology varies by building and department. We also strive for advancement within the technology field and are open to new technologies (hardware and software) when district policies, procedures and network allow.

With that said, here is a quick overview of how our district looks from the tech side:

- We are not a 1:1 district, however student to computer ratio is less than 2:1
- Student to iPad ratio is approximately 4:1
- Computers: Windows PC - running Windows 10
- PowerSchool - Student Information System

The technology team has a regular, weekly schedule established for visiting each building in the district to provide timely service and support for tech issues. As an added support to staff, each building has technology facilitators on staff available to assist quickly with tech matters.
