

PREPARTICIPATION PHYSICAL EVALUATION -- PHYSICAL EXAMINATION

Student's Name _____ Sex _____ Age _____ Date of Birth _____

Height _____ Weight _____ % Body fat (optional) _____ Pulse _____ BP _____ / _____ (_____/_____, ____/_____)
brachial blood pressure while sitting

Vision: R 20/____ L 20/____ Corrected: Y N Pupils: Equal Unequal

As a minimum requirement, this Physical Examination Form must be completed prior to junior high athletic participation and again prior to first and third years of high school athletic participation. It *must* be completed if there are yes answers to specific questions on the student's MEDICAL HISTORY FORM on the reverse side. * Local district policy may require an annual physical exam.

	NORMAL	ABNORMAL FINDINGS	INITIALS*
MEDICAL			
Appearance

CLEARANCE

Cleared
 Cleared after completing evaluation/rehabilitation for: _____

Not cleared for: _____ Reason: _____

Recommendations: _____

The following information must be filled in and signed by either a Physician, a Physician Assistant licensed by a State Board of Physician Assistant Examiners, a Registered Nurse recognized as an Advanced Practice Nurse by the Board of Nurse Examiners, or a Doctor of Chiropractic. Examination forms signed by any other health care practitioner, will not be accepted.

Name (print/type) _____ Date of Examination: _____

Address: _____

Phone Number: _____

Signature: _____

Must be completed before a student participates in any practice, before, during or after school, (both in-season and out-of-season) or games/matches.

PREPARTICIPATION PHYSICAL EVALUATION -- MEDICAL HISTORY

2017

This **MEDICAL HISTORY FORM** must be completed *annually* by parent (or guardian) and student in order for the student to participate in athletic activities. These questions are designed to determine if the student has developed any condition which would make it hazardous to participate in an athletic event.

Student's Name: (print) _____ Sex _____ Age _____ Date of Birth _____
 Address _____ Phone _____
 Grade _____ School _____
 Personal Physician _____ Phone _____
 In case of emergency, contact:
 Name _____ Relationship _____ Phone (H) _____ (W) _____

Explain "Yes" answers in the box below*. Circle questions you don't know the answers to.

- | | Yes | No |
|--|--------------------------|--------------------------|
| 1. Have you had a medical illness or injury since your last check up or sports physical? | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Have you been hospitalized overnight in the past year?
Have you ever had surgery? | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Have you ever had prior testing for the heart ordered by a physician?
Have you ever passed out during or after exercise?
Have you ever had chest pain during or after exercise?
Do you get tired more quickly than your friends do during exercise?
Have you ever had racing of your heart or skipped heartbeats?
Have you had high blood pressure or high cholesterol?
Have you ever been told you have a heart murmur?
Has any family member or relative died of heart problems or of sudden unexpected death before age 50?
Has any family member been diagnosed with enlarged heart, (dilated cardiomyopathy), hypertrophic cardiomyopathy, long QT syndrome or other ion channelopathy (Brugada syndrome, etc), Marfan's syndrome, or abnormal heart rhythm?
Have you had a severe viral infection (for example, myocarditis or mononucleosis) within the last month?
Has a physician ever denied or restricted your participation in sports for any heart problems? | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Have you ever had a head injury or concussion?
Have you ever been knocked out, become unconscious, or lost your memory?
If yes, how many times? _____
When was your last concussion? _____
How severe was each one? (Explain below)
Have you ever had a seizure?
Do you have frequent or severe headaches?
Have you ever had numbness or tingling in your arms, hands, legs or feet?
Have you ever had a stinger, burner, or pinched nerve? | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Are you missing any paired organs? | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Are you under a doctor's care? | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. Are you currently taking any prescription or non-prescription (over-the-counter) medication or pills or using an inhaler? | <input type="checkbox"/> | <input type="checkbox"/> |
| 8. Do you have any allergies (for example, to pollen, medicine, food, or stinging insects)? | <input type="checkbox"/> | <input type="checkbox"/> |
| 9. Have you ever been dizzy during or after exercise? | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. Do you have any current skin problems (for example, itching, rashes, acne, warts, fungus, or blisters)? | <input type="checkbox"/> | <input type="checkbox"/> |
| 11. Have you ever become ill from exercising in the heat? | <input type="checkbox"/> | <input type="checkbox"/> |
| 12. Have you had any problems with your eyes or vision? | <input type="checkbox"/> | <input type="checkbox"/> |

- | | Yes | No |
|---|----------------------------------|------------------------------------|
| 13. Have you ever gotten unexpectedly short of breath with exercise?
Do you have asthma?
Do you have seasonal allergies that require medical treatment? | <input type="checkbox"/> | <input type="checkbox"/> |
| 14. Do you use any special protective or corrective equipment or devices that aren't usually used for your sport or position (for example, knee brace, special neck roll, foot orthotics, retainer on your teeth, hearing aid)? | <input type="checkbox"/> | <input type="checkbox"/> |
| 15. Have you ever had a sprain, strain, or swelling after injury?
Have you broken or fractured any bones or dislocated any joints?
Have you had any other problems with pain or swelling in muscles, tendons, bones, or joints?
If yes, check appropriate box and explain below: | <input type="checkbox"/> | <input type="checkbox"/> |
| <input type="checkbox"/> Head | <input type="checkbox"/> Elbow | <input type="checkbox"/> Hip |
| <input type="checkbox"/> Neck | <input type="checkbox"/> Forearm | <input type="checkbox"/> Thigh |
| <input type="checkbox"/> Back | <input type="checkbox"/> Wrist | <input type="checkbox"/> Knee |
| <input type="checkbox"/> Chest | <input type="checkbox"/> Hand | <input type="checkbox"/> Shin/Calf |
| <input type="checkbox"/> Shoulder | <input type="checkbox"/> Finger | <input type="checkbox"/> Ankle |
| <input type="checkbox"/> Upper Arm | <input type="checkbox"/> Foot | |
| 16. Do you want to weigh more or less than you do now? | <input type="checkbox"/> | <input type="checkbox"/> |
| 17. Do you feel stressed out? | <input type="checkbox"/> | <input type="checkbox"/> |
| 18. Have you ever been diagnosed with or treated for sickle cell trait or sickle cell disease? | <input type="checkbox"/> | <input type="checkbox"/> |

Females Only

19. When was your first menstrual period? _____
 When was your most recent menstrual period? _____
 How much time do you usually have from the start of one period to the start of another? _____
 How many periods have you had in the last year? _____
 What was the longest time between periods in the last year? _____

Males Only

20. Do you have two testicles? _____
 21. Do you have any testicular swelling or masses? _____

An individual answering in the affirmative to any question relating to a possible cardiovascular health issue (question three above), as identified on the form, should be restricted from further participation until the individual is examined and cleared by a physician, physician assistant, chiropractor, or nurse practitioner.

****EXPLAIN 'YES' ANSWERS IN THE BOX BELOW (attach another sheet if necessary):**

It is understood that even though protective equipment is worn by the athlete, whenever needed, the possibility of an accident still remains. Neither the University Interscholastic League nor the school assumes any responsibility in case an accident occurs.

If, in the judgment of any representative of the school, the above student should need immediate care and treatment as a result of any injury or sickness, I do hereby request, authorize, and consent to such care and treatment as may be given said student by any physician, athletic trainer, nurse or school representative. I do hereby agree to indemnify and save harmless the school and any school or hospital representative from any claim by any person on account of such care and treatment of said student.

If, between this date and the beginning of athletic competition, any illness or injury should occur that may limit this student's participation, I agree to notify the school authorities of such illness or injury.

I hereby state that, to the best of my knowledge, my answers to the above questions are complete and correct. Failure to provide truthful responses could subject the student in question to penalties determined by the UIL.

Student Signature: _____ Parent/Guardian Signature: _____ Date: _____

Any Yes answer to questions 1, 2, 3, 4, 5, or 6 requires further medical evaluation which may include a physical examination. Written clearance from a physician, physician assistant, chiropractor, or nurse practitioner is required before any participation in UIL practices, games or matches. **THIS FORM MUST BE ON FILE PRIOR TO PARTICIPATION IN ANY PRACTICE, SCRIMMAGE OR CONTEST BEFORE, DURING OR AFTER SCHOOL.**

For School Use Only:

This Medical History Form was reviewed by: Printed Name _____ Date _____ Signature _____

University Interscholastic League

Parent and Student Agreement/Acknowledgement Form Anabolic Steroid Use and Random Steroid Testing

- Texas state law prohibits possessing, dispensing, delivering or administering a steroid in a manner not allowed by state law.
- Texas state law also provides that body building, muscle enhancement or the increase in muscle bulk or strength through the use of a steroid by a person who is in good health is not a valid medical purpose.
- Texas state law requires that only a licensed practitioner with prescriptive authority may prescribe a steroid for a person.
- Any violation of state law concerning steroids is a criminal offense punishable by confinement in jail or imprisonment in the Texas Department of Criminal Justice.

STUDENT ACKNOWLEDGEMENT AND AGREEMENT

As a prerequisite to participation in UIL athletic activities, I agree that I will not use anabolic steroids as defined in the UIL Anabolic Steroid Testing Program Protocol. I have read this form and understand that I may be asked to submit to testing for the presence of anabolic steroids in my body, and I do hereby agree to submit to such testing and analysis by a certified laboratory. I further understand and agree that the results of the steroid testing may be provided to certain individuals in my high school as specified in the UIL Anabolic Steroid Testing Program Protocol which is available on the UIL website at www.uiltexas.org. I understand and agree that the results of steroid testing will be held confidential to the extent required by law. I understand that failure to provide accurate and truthful information could subject me to penalties as determined by UIL.

Student Name (Print): _____ Grade (9-12) _____

Student Signature: _____ Date: _____

PARENT/GUARDIAN CERTIFICATION AND ACKNOWLEDGEMENT

As a prerequisite to participation by my student in UIL athletic activities, I certify and acknowledge that I have read this form and understand that my student must refrain from anabolic steroid use and may be asked to submit to testing for the presence of anabolic steroids in his/her body. I do hereby agree to submit my child to such testing and analysis by a certified laboratory. I further understand and agree that the results of the steroid testing may be provided to certain individuals in my student's high school as specified in the UIL Anabolic Steroid Testing Program Protocol which is available on the UIL website at www.uiltexas.org. I understand and agree that the results of steroid testing will be held confidential to the extent required by law. I understand that failure to provide accurate and truthful information could subject my student to penalties as determined by UIL.

School Year (to be completed annually) _____

SUDDEN CARDIAC ARREST (SCA) AWARENESS FORM

The Basic Facts on

Sudden Cardiac Arrest

Website Resources:

American Heart Association:
www.heart.org

Lead Author: Arnold Fenrich, MD
and Benjamin Levine, MD

Additional Reviewers: UIL Medical
Advisory Committee

Revised 2016

What is Sudden Cardiac Arrest?

- Occurs suddenly and often without warning.
- An electrical malfunction (short-circuit) causes the bottom chambers of the heart (ventricles) to beat dangerously fast (ventricular tachycardia or fibrillation) and disrupts the pumping ability of the heart.
- The heart cannot pump blood to the brain, lungs and other organs of the body.
- The person loses consciousness (passes out) and has no pulse.
- Death occurs within minutes if not treated immediately.

What causes Sudden Cardiac Arrest?

- **Inherited** (passed on from family) conditions present at birth of the heart muscle:
- **Hypertrophic Cardiomyopathy** – hypertrophy (thickening) of the left ventricle; the most common cause of sudden cardiac arrest in athletes in the U.S.

- **Arrhythmicogenic Right Ventricular Cardiomyopathy** – replacement of part of the right ventricle by fat and scar; the most common cause of sudden cardiac arrest in Italy.
- **Marfan Syndrome** – a disorder of the structure of blood vessels that makes them prone to rupture; often associated with very long arms and unusually flexible joints.

Inherited conditions present at birth of the electrical system:

- **Long QT Syndrome** – abnormality in the ion channels (electrical system) of the heart.

Catecholaminergic Polymorphic

Ventricular Tachycardia and Brugada Syndrome – other types of electrical abnormalities that are rare but run in families.

Noninherited (not passed on from the family, but still present at birth) conditions:

- **Coronary Artery Abnormalities** – abnormality of the blood vessels that supply blood to the heart muscle. This is the second most common cause of sudden cardiac arrest in athletes in the U.S.

Aortic valve abnormalities – failure of the aortic valve (the valve between the heart and the aorta) to develop properly; usually causes a loud heart murmur.

Non-compaction Cardiomyopathy – a condition where the heart muscle does not develop normally.

Wolf-Parkinson-White Syndrome – an extra conducting fiber is present in the heart's electrical system and can increase the risk of arrhythmias.

Conditions not present at birth but acquired later in life:

Commotio Cordis – concussion of the heart that can occur from being hit in the chest by a ball, puck, or fist.

Myocarditis – infection or inflammation of the heart, usually caused by a virus.

Recreational/Performance-Enhancing drug use.

Idiopathic: Sometimes the underlying cause of the Sudden Cardiac Arrest is unknown, even after autopsy.

What are the symptoms/warning signs of Sudden Cardiac Arrest?

- Fainting/blackouts (especially during exercise)
- Dizziness
- Unusual fatigue/weakness
- Chest pain
- Shortness of breath
- Nausea/vomiting
- Palpitations (heart is beating unusually fast or skipping beats)
- Family history of sudden cardiac arrest at age < 50

ANY of these symptoms and warning signs that occur while exercising may necessitate further evaluation from your physician before returning to practice or a game.

What is the treatment for Sudden Cardiac Arrest?

- Time is critical and an immediate response is vital.
- **CALL 911**
- **Begin CPR**
- **Use an Automated External Defibrillator (AED)**

What are ways to screen for Sudden Cardiac Arrest?

The American Heart Association recommends a pre-participation history and physical including 14 important cardiac elements.

The UIL Pre-Participation Physical Evaluation – Medical History form includes ALL 14 of these important cardiac elements and is mandatory annually.

What are the current recommendations for screening young athletes?

The University Interscholastic League requires use of the specific Preparticipation Medical History form on a yearly basis. This process begins with the parents and student-athletes answering questions about symptoms during exercise (such as chest pain, dizziness, fainting, palpitations or shortness of breath); and questions about family health history.

It is important to know if any family member died suddenly during physical activity or during a seizure. It is also important to know if anyone in the family under the age of 50 had an unexplained sudden death such as drowning or car accidents. This information must be provided annually because it is essential to identify those at risk for sudden cardiac death.

The University Interscholastic League requires the Preparticipation Physical Examination form prior to junior high athletic participation and again prior to the 1st and 3rd years of high school participation. The required physical exam includes measurement of blood pressure and a careful listening examination of the heart, especially for murmurs and rhythm abnormalities. If there are no warning signs reported on the health history and no abnormalities discovered on exam, no additional evaluation or testing is recommended for cardiac issues/concerns.

Are there additional options available to screen for cardiac conditions?

Additional screening using an electrocardiogram (ECG) and/or an echocardiogram (Echo) is readily available to all athletes from their personal physicians, but is not mandatory, and is generally not recommended by either the American Heart Association (AHA) or the American College of Cardiology (ACC). Limitations of additional screening include the possibility (~10%) of "false positives", which leads to unnecessary stress for the student and parent or guardian as well as unnecessary restriction from athletic participation. There is also a possibility of "false negatives", since not all cardiac conditions will be identified by additional screening.

When should a student athlete see a heart specialist?

If a qualified examiner has concerns, a referral to a child heart specialist, a pediatric cardiologist, is recommended. This specialist may perform a more thorough evaluation, including an electrocardiogram (ECG), which is a graph of the electrical activity of the heart. An echocardiogram, which is an ultrasound test to allow for direct visualization of the heart structure, may also be done. The specialist may also order a treadmill exercise test and/or a monitor to enable a longer recording of the heart rhythm. None of the testing is invasive or uncomfortable.

Can Sudden Cardiac Arrest be prevented just through proper screening?

A proper evaluation (Preparticipation Physical Evaluation – Medical History) should find many, but not all, conditions that could cause sudden death in the athlete. This is because some diseases are difficult to uncover and may only develop later in life. Others can develop following a normal screening evaluation, such as an infection of the heart muscle from a virus. This is why a medical history and a review of the family health history need to be performed on a yearly basis. With proper screening and evaluation, most cases can be identified and prevented.

Why have an AED on site during sporting events

The only effective treatment for ventricular fibrillation is immediate use of an automated external defibrillator (AED). An AED can restore the heart back into a normal rhythm. An AED is also life-saving for ventricular fibrillation caused by a blow to the chest over the heart (commotio cordis). Texas Senate Bill 7 requires that at any school sponsored athletic event or team practice in Texas public high schools the following must be available:

- An AED is in an unlocked location on school property within a reasonable proximity to the athletic field or gymnasium
- All coaches, athletic trainers, PE teacher, nurses, band directors and cheerleader sponsors are certified in cardiopulmonary resuscitation (CPR) and the use of the AED.

➤ Each school has a developed safety procedure to respond to a medical emergency involving a cardiac arrest.

The American Academy of Pediatrics recommends the AED should be placed in a central location that is accessible and ideally no more than a 1 to 1 1/2 minute walk from any location and that a call is made to activate 911 emergency system while the AED is being retrieved.

CONCUSSION ACKNOWLEDGEMENT FORM

Name of Student _____

Definition of Concussion - means a complex pathophysiological process affecting the brain caused by a traumatic physical force or impact to the head or body, which may: (A) include temporary or prolonged altered brain function resulting in physical, cognitive, or emotional symptoms or altered sleep patterns; and (B) involve loss of consciousness.

Prevention - Teach and practice safe play & proper technique.

- Follow the rules of play.
- Make sure the required protective equipment is worn for all practices and games.
- Protective equipment must fit properly and be inspected on a regular basis.

Signs and Symptoms of Concussion - The signs and symptoms of concussion may include but are not limited to: Headache, appears to be dazed or stunned, tinnitus (ringing in the ears), fatigue, slurred speech, nausea or vomiting, dizziness, loss of balance, blurry vision, sensitive to light or noise, feel foggy or groggy, memory loss, or confusion.

Oversight - Each district shall appoint and approve a Concussion Oversight Team (COT). The COT shall include at least one physician and an athletic trainer if one is employed by the school district. Other members may include: Advanced Practice Nurse, neuropsychologist or a physician's assistant. The COT is charged with developing the Return to Play protocol based on peer reviewed scientific evidence.

Treatment of Concussion - The student-athlete/cheerleader shall be removed from practice or participation immediately if suspected to have sustained a concussion. Every student-athlete/cheerleader suspected of sustaining a concussion shall be seen by a physician before they may return to athletic or cheerleading participation. The treatment for concussion is cognitive rest. Students should limit external stimulation such as watching television, playing video games, sending text messages, use of computer, and bright lights. When all signs and symptoms of concussion have cleared and the student has received written clearance from a physician, the student-athlete/cheerleader may begin their district's Return to Play protocol as determined by the Concussion Oversight Team.

Return to Play - According to the Texas Education Code, Section 38.157:

A student removed from an interscholastic athletics practice or competition (including per UIL rule, cheerleading) under Section 38.156 may not be permitted to practice or participate again following the force or impact believed to have caused the concussion until:

- (1) the student has been evaluated, using established medical protocols based on peer-reviewed scientific evidence, by a treating physician chosen by the student or the student's parent or guardian or another person with legal authority to make medical decisions for the student;
- (2) the student has successfully completed each requirement of the return-to-play protocol established under Section 38.153 necessary for the student to return to play;
- (3) the treating physician has provided a written statement indicating that, in the physician's professional judgment, it is safe for the student to return to play; and
- (4) the student and the student's parent or guardian or another person with legal authority to make medical decisions for the student:
 - (A) have acknowledged that the student has completed the requirements of the return-to-play protocol necessary for the student to return to play;
 - (B) have provided the treating physician's written statement under Subdivision (3) to the person responsible for compliance with the return-to-play protocol under Subsection (c) and the person who has supervisory responsibilities under Subsection (c); and
 - (C) have signed a consent form indicating that the person signing:
 - (i) has been informed concerning and consents to the student participating in returning to play in accordance with the return-to-play protocol;
 - (ii) understands the risks associated with the student returning to play and will comply with any ongoing requirements in the return-to-play protocol;
 - (iii) consents to the disclosure to appropriate persons, consistent with the Health Insurance Portability and Accountability Act of 1996 (Pub. L. No. 104-191), of the treating physician's written statement under Subdivision (3) and, if any, the return-to-play recommendations of the treating physician; and
 - (iv) understands the immunity provisions under Section 38.159.

Eustace Emergency Medical Authorization Form

Student's Name _____ Grade _____ Phone _____

Address _____ City _____ Zip _____

PURPOSE: To enable parents and guardians to authorize the provision of emergency treatment for children who become ill or injured while under school authority, when parents or guardians cannot be contacted. This form will accompany student on all games.

Parents/Guardians:

Mother's name _____ Phone Home _____ Cell _____

Father's name _____ Phone #s Home _____ Cell _____

Alternative emergency contacts: (Local people to contact if parents cannot be reached; and have your permission to check out your child or make medical decisions.)

Name _____ Phone _____ Relationship _____

Name _____ Phone _____ Relationship _____

In case of an emergency involving my child and I cannot be reached, I hereby give consent to transport my child to the following medical care providers and hospital, and authorize these providers and hospital to give any reasonable and customary medical and health care deemed necessary.

Doctor _____ Phone _____

Hostipal _____ Phone _____

Student Medical Insurance _____ Plan/Group/I.D. Number _____

If, for any reason, the above listed medical care providers or hospital cannot be reached, I authorize appropriate transportation and medical care of my child to any appropriate medical care provider, hospital, or medical facility. I authorize EHS personnel to make necessary decisions and take appropriate actions in emergency situations on behalf of my student. The authorization does not cover major surgery unless one other doctor/dentist concurs to the need.

Nothing in this section shall be construed to impose liability on any school official or school employee who, in good faith, attempts to comply with this section. It is understood that I will be financially responsible for all emergency care.
