

# Lavaca School District

## Home Screening Reminder:

We want to remind parents about some protocols we ALL must follow to help keep each other safe as we return to school. Parents/guardians should screen their children using the following questions each morning before students leave for school:

- Have you had a fever of 100.4 within the last 48 hours?
- Have you had close contact with a person infected with COVID-19?
- Do you have an unexplained cough, difficulty breathing, shortness of breath, sore throat, and/or loss of taste or smell with or without fever?

It is also very important for parents to contact the school if your child or any member of the child's household tests positive for COVID-19 so that proper contact tracing can be done. ***The COVID Hotline number is 479-719-4796.*** We recognize the challenges that we all face this school year, but please know that Lavaca School District will do our very best to help our students be academically successful in the safest manner possible.

If a student or employee tests positive or has been within 6 feet for 15 min with a positive person, please call hotline number. The hotline is open 7 days a week. At this time, only positive cases need to be reported to the hotline. Please have testing done if you experience any symptoms of COVID-19 with or without fever.
