

1

We do not typically have a suggested photo size for your slideshows since responsive designs change the size of the image based on the device make sure your images are landscape orientation, do not crop off the width or the height, and do not upload images that are over 600KB.

\*TIP\* for ADA compliancy do not place text on top of your images before uploading to your site.

2

For images that have a large file size (over 600KB) you'll need to visit [www.compressor.io/compress](http://www.compressor.io/compress)

3

Upload your image to, download it, and upload to your Gabbart site by going to your:

- File Cabinet
- Homepage Design
- Browse / Save
