

Setting up your Parent/Guardian PowerSchool Account

The ability to login and see your students grades, lunch account balance and much more has always been a part of PowerSchool. This summer, PowerSchool made a major update to the system with a lot of new features. The biggest parent/guardian change is the single login. You can now use one login and password to see all of your students info.

Just like in the past, you will need a login and password, but you must now setup the account.

1. Make sure you have your old PowerSchool login and password
2. Using your favorite internet browser, go to usd243.powerschool.com/
3. Click on Create Account
4. Enter the User Info requested
5. You will need the old login and password for each of your students. If you need that, contact your school office
6. Enter the students name and login/password info for each student
7. You can enter all of your students on this one account provided you have 7 students or less.
8. Be sure to click “Enter” at bottom of the page

If you have questions refer to your school web site or call your school office.
