Lead Consumer Notice (CN) TCEQ Form 20680
Texas Commission on Environmental Quality

PWS ID #: TX 1670013 DATE: 10/31/16

PWS NAME: Mullin ISD

ANALYTICAL RESULT FOR LEAD TAP WATER MONITORING

Our public water supply system is required to periodically collect tap water samples to determine the lead levels in our system. Your residence was selected for this monitoring as part of our system's sampling plan. This notice is provided to you with the analytical results of the tap water sample collected at your home.

Sample address: P.O. Box 128, Mullin, Texas 76864

Sample collection date: 10/10/2016

Analytical Lead result, in mg/L (milligrams per liter): All below Maximum Concentration limits, See attached data.

Definitions

Action Level (AL): The action level is a concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a public water system must follow. The lead action level is 0.015 mg/L.

What are the health effects of lead and how can I reduce my exposure?

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. MULLIN ISD is responsible for providing drinking water that meets all federal and state standards, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using the water and using only cold water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. When replacing your bathroom or kitchen faucet, consider a "lead-free" faucet that meets NSF/ANSI Standard 61 Annex G, which is less than 0.25% lead by weight.

Who can I contact at my water system for more information?

Phone number at our public water supply system: 325-985-3374

E-mail address at our public water supply system: jclawson@mullinisd.net

Lead Consumer Notice (CN) Certification Form

PWS ID #: TX _____ 1670013 _____

PWS NAME: _____ Mullin ISD _____

Monitoring period to which the notice applies:	3rd Quarter 2016
Date(s) results were received from laboratory:	10/13/2016
Date(s) results were provided to consumers:	11/2/2016

The water system named above hereby certifies that its lead consumer notice has been provided to each person it serves at the specific sampling site from which the sample was tested. The water system also certifies that these results and the following information were provided to such persons within 30 days of receiving the test results from the laboratory:

- Individual tap results from lead tap water monitoring carried out under the requirements of 30 TAC §290.117(j).
- An explanation of the health effects of lead.
- Steps that consumers can take to reduce exposure to lead in drinking water.
- Contact Information for our water utility.
- The maximum contaminant level goals and action levels for lead, and the definitions of these two terms.
