Data:

1. **COMPREHENSIVE NEEDS ASSESSMENT:** We formed ACSIP Leadership Teams and analyzed the test scores from the 2011 administration of the 3rd through 5th grade Augmented Benchmark and ITBS Exams. We examined the results for both the combined population and EACH subpopulation. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. (J-1) In addition, we studied our attendance, disciplinary, and achievement data over the past three years. We reviewed all the data for the purpose of determining student learning and behavioral needs. We looked at the trend data, from NORMES and TLI, in order to better identify the areas of need and help align classroom instruction with the curriculum frameworks, in literacy and mathematics. We examined our routines, customs, norms, and expectations in order to dig deeper for the root cause why more of our students are not achieving to their full potential. Our supporting data statements show the discrepancies in achievement, among our various populations. We are modifying our curriculum, instruction, assessment, and professional development practices to better meet the needs of our populations. Our data analysis led us to prioritize these areas: Special Education Literacy; Special Education Mathematics. We will select interventions, and use funds, that put us in the best position to address these needs. In addition, we meet in teams weekly and as an entire staff as needed so that we can review formative, real time classroom performance data for the purpose of making decisions regarding direction, and focus, of our classroom instruction. Priority 2: Improving Mathematics

Supporting Data: 1. COMPREHENSIVE NEEDS ASSESSMENT: We formed ACSIP Leadership Teams and analyzed the test scores from the 2011 administration of the third through fifth grade Augmented Benchmark

and ITBS exams. We examined the results for both the combined population and EACH subpopulation. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. In addition, we studied our attendance, disciplinary, and achievement data over the past three years. We disaggregated all the data for the purpose of determining student learning and behavioral needs. We looked at the trend data, from NORMES and TLI, in order to better identify the areas of need and help align classroom instruction with the curriculum frameworks in literacy and mathematics. We examined our routines, customs, norms, and expectations in order to dig deeper for the root cause why more of our students are not achieving to their full potential. Our supporting data statements show the discrepancies in achievement, among our various populations. We are modifying our curriculum, instruction, assessment, and professional development practices to better meet the needs of all our populations. Our data analysis led us to prioritize these areas: special education literacy gr. 3-5 and special education mathematics gr. 3-5. We will select interventions, and use funds, that put us in the best position to address these needs. In addition, we meet in PLC teams weekly and as an entire faculty as needed so that we can review formative, real time classroom performance data for the purpose of making decisions regarding the direction, and focus, of our classroom instruction. - Priority 3: Students participating in the BMI activity show a need to improve their cardiovascular, muscular strength/endurance, and flexibility activity.
- Supporting Data:
- BMI (Body Mass Index): In 2010-2011, 4th Grade BMI results for the Berryville Intermediate School showed that 46.5% of males and 66.3% of females were either overweight or obese. We compared this percentage to the current 5th graders for 2011-2012 school year, which is our best source of comparison for the same group of students. Our findings were that 57.3% of males and 45.5% of females were either overweight or obese. In 2009-2010, BMI results for the Berryville Intermediate School showed that 28.7% of males and 34.7% of females were either overweight or obese. In, 2008-2009, BMI results for the Berryville Intermediate School showed that 39.5% of males and 36.5% of females were either overweight or obese. In 2007-08, BMI results for the Berryville Elementary showed that 40.2% of males and 37.7% of females participating were either at risk or currently overweight. In 2006-2007, BMI results for Berryville Elementary showed that 38.2% of males and 37.1% of females participating were either at risk or currently overweight. In 2005-06, BMI results for the Berryville Elementary showed that 39.5% of males and 37.8% of females participating were either at risk or currently overweight. In 2004-05, BMI results for the Berryville Elementary showed that 40.2% of males and 37.7% of females participating were either at risk or currently overweight.
 - A four-year longitudinal comparison of the 2007-2008, 2008-2009, 2009-2010, and 2010-2011 school year disciplinary reports for the Berryville Intermediate School revealed that: Disorderly Conduct reports were 41 (07-08), 46 (08-09), 47 (09-10), 61 (10-11); Insubordination reports

- were 8 (07-08), 10 (08-09), 27 (09-10), 41 (10-11); Bullying reports were 20 (07-08), 3 (08-09), 14 (09-10), 10 (10-11); Fighting reports were 12 (07-08), 5 (08-09), 5 (09-10), 5 (10-11); Dangerous Contraband reports were 2 (07-08), 1 (08-09), 1 (09-10), 3 (10-11); Destruction of School Property/Vandalism were 1 (07-09), 1 (08-09), 0 (09-10), 0 (10-11); and Truancy were 3 (07-08), 0 (08-09), 0 (09-10), 0 (10-11). Total discipline for 2009-2010 was 94, compared to 120 for 2010-2011, and increase of 26 incidences.
3. Free/Reduced: In 2010-2011, the Berryville Intermediate free/reduced lunch rate was 63%. In 2009-2010, the Berryville Intermediate free/reduced lunch rate was 63%. In 2008-2009, the Berryville Intermediate had a free/reduced lunch rate of 59.3%. In 2007-08, the Berryville Elementary had a free/reduced lunch rate of 58.1%. In 2006-07, the Berryville Elementary had a free/reduced lunch rate of 58.1%. In 2005-06, the Berryville Elementary had a free/reduced lunch rate of 57.8%. The data indicates that the Intermediate School is stable with a slight increase in the percentage of free/reduced lunch students.
 4. Intermediate Attendance Rate: In 2010-2011, the attendance rate for the building was 94.93%. In 2009-2010, the attendance rate for the building was 94.88%. In 2008, the attendance rate for the building was 95.1%. In 2007, the attendance rate for the building was 95.2%. In 2006, attendance rate for the building was 95%.

Goal Create an environment where students will show an increase in health and wellness.

Benchmark The BMI will show a 5% increase in the healthy or underweight category. The attendance rate will remain at an acceptable compliance level. Total discipline referrals will decrease by ten incidents.

Intervention: Berryville Intermediate will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.
