ndover eCademy
students get "All the Best
Parts of School." Andover
eCademy is a K-12 virtual
school that enables students
to take ownership of their
learning. Students may work
quickly through the areas they
understand, take their time in
areas that need extra attention,
and put an emphasis on subjects
that interest them most. Some
of the state's top teachers
work with eCademy families
through our blended learning

Our kids were kind of bored in their traditional school. They weren't being challenged enough. But with eCademy, we can put an emphasis on the subjects they are interested in, like science and robotics, and music. With its personalized learning, my kids love to learn again!"

— Parent of eCademy Elementary School students

environment, combining the benefits of the virtual and traditional classrooms. Blended learning enhances online learning with opportunities for labs, clubs, field trips, and other face-to-face cooperative learning. eCademy also eliminates many situations that might interfere with your child's education. This combination of benefits has proven to create an environment that leads to a natural love for learning.

# Why Does Andover eCademy Stand Out?

Differences that set Andover eCademy apart from other virtual schools will benefit your student.

#### • BLENDED LEARNING ENVIRONMENT

eCademy has actual brick-and-mortar classrooms where students can come and take part in regular group lectures and activities led by our teachers. These faceto-face sessions help augment the online learning with hands-on labs, field trips and other cooperative learning activities, while also providing students opportunities for social interaction.

### • PART OF THE USD 385 ANDOVER SCHOOL DISTRICT

The award-winning Andover school district is one of the top districts in the state and well known for graduating high-achieving, well-rounded students.

#### OUTSTANDING ON-SITE TEACHERS

eCademy attracts accredited teachers who are technology-oriented and progressive in applying the most modern educational techniques and systems. Many of our teachers chose to join eCademy because our approach enables them to teach more in one-on-one settings and provide more personal attention. That attention extends to our students' parents/learning coaches as well.

#### • TOP CURRICULUM

eCademy provides a curriculum regarded as the best available. It is known for engaging students and encouraging their desire for further exploration. This curriculum meets College and Career Readiness Standards, and embeds these standards into each lesson.

#### • ACADEMIC SUCCESS

eCademy students consistently perform above local, state and national averages in assessment reports. The academic honors and college scholarships earned by eCademy students show their success has no limitations.

Why Students Excel at eCademy

FLEXIBLE SCHEDULE: Students can perform their schoolwork on a schedule that fits their family's needs. They can also spend more time on difficult lessons, or work quickly through subjects learned easily. This flexibility also allows students opportunities to succeed in and out of the classroom. For instance eCademy students have been involved in gymnastics, equestrian competitions, acting and other activities that require daytime involvement. Although eCademy students are allowed a flexible schedule, deadlines are assigned for lessons and tests to ensure standards are maintained.

**TEACHER SUPPORT:** Andover eCademy teachers are all highly qualified and Kansas certified. Teachers monitor student progress and proactively interact with students and parents. They provide weekly live lessons and work to motivate and encourage students. Teachers are available for questions and support via phone, Skype, message boards, email, and face-to-face interaction.

**TECHNOLOGY:** A full-size laptop computer is available to each student for accessing their online lessons and completing assignments.

**VIRTUAL SESSIONS:** Teachers meet with students weekly to provide educational support, prepare students for state and other curriculum assessments, and to supplement the curriculum with engaging, interactive lessons.

**IN-HOUSE DAYS:** Teachers hold regular in-house sessions that provide students opportunities for face-to-face interaction with teachers and other students. These sessions are used for classroom presentations/lectures, interactive activities, science labs, writing workshops, field trips, and social events.

virtual options: Because eCademy students live throughout Kansas, not all students are able to participate in our in-house activities. For these students, eCademy offers virtual sessions in most secondary courses, as well as multiple sessions each week for elementary level students. Virtual options are typically provided for the in-house activities, intervention strategies, and Special Education services.

My son is learning to speak
Japanese, does extended
studies of social studies and
science on his own, and is doing
wonderfully. Plus, since he is
not spending eight hours a day
worried about how to handle social
situations with classmates, he is
able to focus on learning."

— Parent of eCademy Middle
School student

**ENRICHMENT:** For students interested in the arts, science, technology, sports and other extracurricular activities, eCademy helps connect students with their home district schools for participation.

**COLLEGE CREDITS:** High school students have the opportunity to enroll in college courses for dual credit for both high school and college. It is even possible for a student to take enough college coursework to earn an Associates Degree while still attending eCademy.

# eCademy Prepares Parents for Success, Too!

As a learning coach, you get to be part of your child's success story. Most parents considering home school for their children question whether they themselves are up to the challenge. However, if you are committed to your child's success, eCademy can provide everything you need to lead your child successfully through his education.

**ORIENTATION:** All parents/learning coaches are required to attend an orientation session, where they are taken step-by-step through the eCademy process. This vital session will provide answers to all your questions.

**WORKSHOPS:** Held periodically throughout the school year, these sessions address timely issues and offer tips and ideas for getting students through skills they may have trouble mastering.

**DIRECT ACCESS TO TEACHERS:** Teachers are available to answer questions and address your concerns via phone call, email, or personal appointment.

**ECADEMY MANUAL:** Everything from how to use the technology to state requirements is covered in this all-inclusive manual.

**ONLINE SUPPORT:** eCademy provides many online learning/teaching resources.

I can't say it has been easy, but it has been one of the best decisions I've made. I feel like I have a partnership with eCademy. They've truly invested in my child's success. Her teacher communicates with me daily. She is available when we need help in teaching and for encouragement."

— Parent of eCademy Elementary school student

# As your student progresses, your role transitions:

**ELEMENTARY SCHOOL:** Each elementary school student must have an at-home "Learning Coach" that provides daily teaching/instruction and follows student progress closely. eCademy teachers work closely with learning coaches to answer questions, provide teaching tips and advice, and help solve any issues that arise. Learning coaches are also provided a copy of the *Learning Coach Guide* that takes them through every step of teaching a lesson. In other words, eCademy supports our learning coaches every step of the way.

**MIDDLE SCHOOL:** At this level, parents take on a role of "Learning Mentor." They still monitor student activity and progress, but much of the instruction is provided by the online curriculum.

**HIGH SCHOOL:** At this level, students largely proceed with studies on their own. They have direct access to eCademy teachers for questions and instruction. Parents serve in a "Learning Advisor" role by monitoring schedules, progress, and advising students how to find resources.

# Frequently Asked Questions about eCademy

### **Q:** What does "virtual education" mean at eCademy?

A: Students and their learning coaches receive instruction and have access to lessons and course assessments online.

#### **Q:** What does "blended environment" mean?

A: eCademy provides a combination of virtual and traditional education. Students receive most lessons and instruction online. In addition, we have in-house days in which students can come to a brick-and-mortar classroom for in-person interaction with teachers and other students. This blend exposes students to the best parts of both styles of education.

# Q: I don't have a degree in teaching. What kind of help can I expect as my child's learning coach?

A: eCademy provides an orientation session and a Learning Coach Guide with step-by-step instructions on how to teach each lesson. eCademy teachers are available to answer any questions, provide teaching tips and offer ideas for motivation and encouragement. Never hesitate to contact the eCademy teachers. eCademy also holds regular workshops for learning coaches, and provides online resources for tips and ideas.

#### **Q:** Can I check on my child's progress online?

**A:** Yes, you can log in 24/7 and monitor your student's grades and progress with lessons.

#### Q: How flexible is the schedule?

A: Through eCademy, families often are able to complete daily lessons in less time than they would in a traditional school, leaving more time for enrichment, field trips, social opportunities and family activities. From time to time, families may even take a break from daily lessons. However, eCademy requires lessons and assessments to be accomplished in a specific time frame. This helps students maintain a regular education routine and "keep up with the rest of the class."

### Q: Do I have to provide a computer for my child?

A: No. eCademy has laptop computers available for any student to check out upon payment of a deposit. We also have an on-site technology director to ensure any tech issues can be resolved quickly.

# **Q:** We don't live near Andover and I can't bring my child to all the in-house sessions. Are there any options?

**A:** Yes. eCademy can arrange virtual options for students unable to attend inhouse opportunities.

### **Q:** My child is interested in sports and music. Are those available?

**A:** For students who want to participate in enrichment activities such as athletics, the arts, and science/technology, eCademy will help facilitate participation at your home district public school.

### **Q:** What types of clubs and school activities are available?

A: Arts and Crafts club for elementary school, Photography Club for middle school, and Book Club for high school are just some of the extracurricular activities in which eCademy students participate. For a current list, visit andoverecademy.

### **Q:** How does a virtual school take field trips?

A: As part of in-house activities, teachers sometimes plan field trips to places such as the Sedgwick County Zoo, Exploration Place, Old Cowtown, and other museums. These are excellent opportunities for students to socialize with their peers while learning outside the classroom.

# There's No Such Thing as a *Typical* eCademy Family.

One eCademy student is a gymnast who competes throughout the nation. One family has a child with medical issues requiring daily treatments. One student excels in mathematics and wants to work ahead. One student needs to work and wants to start earning a college degree. One family wants to be able to spend more time together.

There are many reasons why families all over Kansas enroll their children in Andover eCademy virtual school, but they all have a few things in common.

- eCademy families desire for their children to be inspired by their education, molding explorers with a zest for achievement.
- eCademy families are highly involved in their children's education. When it's a priority at home, it becomes a priority for life.
- eCademy families appreciate being deeply involved in each other's lives on a daily basis.

Every year, eCademy students achieve successes they may not have experienced in traditional schools. The tailored attention, Individual Education Plans, personalized instruction and encouragement students receive from their learning coaches and teachers often unlock strengths that were waiting to emerge, and help them build up skills in weak areas.

Best of all, the students really like being part of eCademy! The virtual experience often takes away stressors and distractions that limit students' successes. The educational experience becomes a joy, and our students discover a love of learning.

After testing showed that my son was gifted, rather than challenged, we enrolled him in eCademy. Now he's taking advanced classes with challenge work, and working a grade ahead in math. He and I are excited that he'll be able to take courses he excels in at a college level."

— Parent of eCademy High School student

## Try Us Out!

You and your child can even give eCademy a "test drive" to see how well it fits you!

- Shadow another student
- Attend an Orientation Session
- Speak with Teachers or eCademy Parents
