

## Parent and Family Engagement

The Forrest City School District recognizes that parents play a critical role in the success of their children. We commit to encouraging parents to be full partners in their child's education. By working together, we believe that all children can excel. The district has created parent and family engagement plans at both the district level and school level. These plans, which are reviewed annual by a parent committee, display the district's commitment in fostering effective parent and family engagement through the following components: communication, volunteering, involvement at home and school, inclusion in decision-making, and collaboration with community. We hope that you will take a few minutes to review the parent and family engagement plans. Should you have any questions, please do not hesitate to call LaSandra Bean at 870-633-1485.
