

MangoSuite Features

Get everyone at work collaborating in the most natural ways possible-and see how much more gets done. Stop sending attachments in email. Always know where to find the latest version of a doc- just access your team site! With control over who has access, you can give coworkers, clients or both a one-stop shop for managing, organizing and sharing all types and sizes of business documents via the cloud.

10 Ways to use MangoSuite

Connect with experts. Have a question and unsure of who to ask? Post up a message and get the answers from your company experts.

Search the company brain. All conversations, files, and profiles are fully achievable and searchable

Securely share and store files of any size. No need to get stuck emailing large files or worrying about where the most recent version of a document is.

Get up to speed fast. Easy to read activity feeds give you a manageable at-a-glance way to get informed of all the going's on relevant to you

One click collaboration. One click launches a one-on-one chat or a group chat session so you can review docs in real-time and edit on-the-fly

Capture and manage ideas. Easily capture, refine and provide feedback to manage the life cycle of new and existing ideas from colleagues

Create Accountability and transparency. You'll have better visibility and gain insight on core business activities, challenges and accomplishments.

Connect and collaborate from near and far. MangoApps transcends geographical obstacles by allowing you to connect via mobile, web, and desktop clients

Engage in focused communication. Short status updates provide critical updates in a succinct and digestible communication.

Implement change based on data. Use analytics and detailed reports to improve workflow.
