

QR Pay

Secure, contactless payment processing

With QR Pay, customers can pay their bill by simply scanning a unique code with their smartphone and completing the transaction through their phone. It's integrated with your point-of-sale or property management system for a seamless payment experience.

How does it work?

1

QR Code

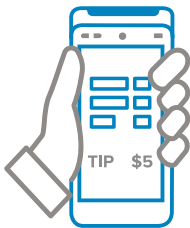

A unique QR code will be printed on each receipt or displayed on the payment device screen

2

Scan the Code

Customer will scan the code with their smartphone and the bill opens in their phone's web browser

3

Add Tip & Check Out

Customer can pay with Apple Pay, Google Pay, or enter their card info, then add a tip and check out

4

Check Is Closed

QR Pay is integrated with the POS system, so the check is automatically closed when payment is completed

Perfect for various business types

Table Service
Restaurants

Quick Service/
Counter Service

Retail

Hotels
