SOMEONE CALL SECURITY
BOB PROCTOR

Here we are back again!

Let me share something with you that you that could help you avoid the trap that I was once fell into, it was a while ago but it was a trap and I was caught in it. Do you know many years ago, when I first read Think and Grow Rich, I was sitting in a fire hall, I was earning four thousand dollars a year and I owed six thousand. The chief of the whole fire department was earning only eleven five and that book inspired me to set a goal.

I started cleaning offices and do you know, I was soon cleaning offices in Toronto, Montreal, Boston, Cleveland, Atlanta, London, England, but the truth was, I was earning more money every month than the chief was earning all year and I still held on to that fire hall job.

And although I did love being on fire department for a long time, right up until I started to read Think and Grow Rich and I began to develop a serious entrepreneurial urge. From that point on I didn’t particularly like being on the fire department. And I wanted to break out and be on my own and work for myself, yet, I was afraid to quit. Now think about that, I thought it represented security. It was a false security, real security is always inside thing, if you haven’t got it there, you have not got it.

I was afraid to do the thing I really wanted to do. Are you ever like that, holding yourself back from doing what you really want to do?

I want you to spread your wings, over the next five minutes ask yourself, what do I really want to do? Am I scared to try? Am I holding on to something, am I holding myself back? Is it the security I’m holding onto? Break through that terror barrier. Claw your way through if need be. Go do what you really love. Think about it. Spend five minutes, thinking about what you really love to do, then write all the things you’d really love to do down. Then, spend all day thinking about it.

Remember, security comes from inside. If you thought it comes from a job, and you lost your job, you would be totally demoralized.

So, what you really want to do? Spend five minutes thinking about it and do it. Quit holding yourself back with false ideas in our mind. Life is short. It can be a wonderful trip and it will be when you start doing thing you really want to do.

This is Bob Proctor, thank you.
