### NOTE

---

Mushroom heaters are best used for open outdoor or canopied areas.

Mushroom heaters may not be used in fully-enclosed spaces such as four-walled tents.

We recommend Heat Cannons for enclosed tents and spaces.

A Heat Cannon is a forced air propane heater that sits outside the tent and blows hot air into the tent via ducts under the tent walls.

Heaters cancelled within 5 days of delivery date are subject to a 35% reserve charge (\$26 per heater)
