

Fiber Stone *Collection*

Orlandi has always been known to present a unique collection of garden accessories. Instead of waiting decades for nature's process of wind, sun, rain, and erosion, we have perfected our own method to achieve this same beauty by Fiber Stone.

Fiber Stone is a mixture of stone cast directly into the surface then reinforced with a fiberglass backing. Next it is carefully stained to give the appearance of age. Each piece is unique with its own imperfections that add beauty to this handmade product. The resulting product is lightweight, safe for outdoor use, and less fragile than concrete.

We take pride in our designs and craftsmanship, and give special attention to detail. We are confident that both you and your customers will receive our high standards of quality.
