

Curriculum

The A.C.N. Program course curriculum skillfully blends the ever-evolving wisdom of wellness with leading edge scientific research. The A.C.N. Program curriculum is current, informative, and innovative in nature. Students receive hands-on exposure to holistic nutrition and herbal medicine, through courses presented by highly experienced and professional educators in the field of Clinical Nutrition. The program was designed to meet today's challenges and organized to offer comprehensive training with an easily managed program for the busy health care professional, staff or student.

To complete the program with a minimum of 100 hours, you choose seminar courses to attend from the A.C.N. Program course schedule. You may customize your own program schedule based on topic interest and locations suitable for you from a comprehensive list of courses. Study materials are included at each seminar course. The ACN Certification Program is totally self-paced with no deadline for completion. Upon completion, Texas Chiropractic College will issue a Certificate of Proficiency and transcript to chiropractors and a Certificate of Attainment and transcript for all other practitioners, staff, and students. In addition, your Southern California Standard Process representative, will award you with an engraved Wall Plaque, acknowledging your completion of the A.C.N. Program' with a passing score on the final exam. You will receive study summaries that will make it easy for you to prepare for the exam in the comfort of your own home or office. The A.C.N. Program offers comprehensive training and an easily managed program for the busy health care professional, staff or Student.

The A.C.N. Program is being sponsored through Southern California University of Health Sciences and your Standard Process representative.

ACN NUTRITION PRO

Certificate in Applied Clinical Nutrition

The Certificate in Applied Clinical Nutrition is (ACN) is intended for the Clinician who wishes to develop personal and professional skills in holistic nutritional strategies and apply them in practice. The ACN program offers an education in whole food nutrition and herbal medicine. The ACN Program offers the opportunity for study with some of the best clinicians in the country in how to use whole food nutrition and natural therapies in your practice.

The important role of the evolving field of Clinical Nutrition in remedial and preventive health care is supported by a growing body of scientific research. More people are seeking natural healthcare approaches that prescription medicines failed to correct. With this rising interest in health and whole food science people are looking for knowledgeable educated partners to guide them towards a well researched, nutritionally sound way of living. Applied Clinical Nutritionists provide such a role and are educated partners qualified to create a personalized health plan for their clients. Applied Clinical Nutritionists provide such a role and are educated partners qualified to create a personalized health plan for their clients.

The ACN Program focuses on the role of clinical nutrition as a preventative, adjunctive and alternative strategy for intervention in the disease process. While earning your ACN credentials, you will be learning the science of using natural whole foods, whole food nutritional supplements and herbs to detoxify, rebuild, and balance the whole person. The program emphasizes whole foods and whole food nutritional supplementation. Standard Process has been providing highly concentrated therapeutic whole food formulations since 1929 and are often used by our educators in their clinical practice and mentioned in program seminars.

Research shows us that given proper nutrition, the right nutrients, the human body has an amazing ability to repair and heal itself. Whole food supplements supply our bodies with nutrients we are not getting from our diet and complete the nutritional gap.
