

# Close the door – smoke kills!

## Shut the fire in!

If you have a fire in your own apartment – get out and **close the front door behind you**. The fire and smoke will then not spread out into the stairwell as quickly. **RING 112**.

## Never go out into a smoky stairwell!

If there is a fire in another apartment and there is smoke in the stairwell – stay in your apartment and **keep your front door closed!** Smoke is lethal and kills quickly, two breaths is enough, **RING 112**.

The rescue services will help you out – let them know that you are there.

Your apartment can keep out fire and smoke for 30-60 minutes.

Don't forget to check that your fire alarm works. We recommend that you get a fire extinguisher with at least 6 kg of powder.
