Dear Mr Scott Benjamin,

Re. Accommodation at SIEC – Camp Sites

Visitors are considered to occupy a camp site if they are utilising a power outlet or sleeping on site (e.g. in sleeping accommodation such as a float, trailer, tent, marquee, vehicle, etc).

If additional power outlets are used, charges will apply accordingly for additional camp sites. For example, if two power outlets are being used, charges will apply for two camp sites.

A maximum of two forms of sleeping accommodation (e.g. a tent and a float) may occupy a single camp site. Providing they are only using one power outlet between them, charges will only apply for one camp site.

The number of camp sites utilised is calculated and recorded each day by a member of the Organising Committee and a Security Officer.

Note:

- Trade stand operators who sleep in their vehicles will be charged for a camp site
- Marquees and cars will not be charged unless there are people sleeping in them.

Yours sincerely
