

ENZYME DIGESTIVE AID

Digestion, the second of the Six Stages of Nutrition, is the process by which complex foods are broken down into simpler substances that the body uses for energy and tissue building. Intestinal enzymes are required to complete the digestive process, but poor eating practices—such as eating too much, too fast—can overburden the intestinal enzyme supply. The result may be incomplete digestion accompanied by distressful symptoms. Neolife's intestine-targeted Enzyme Digestive Aid is a high-potency, comprehensive mixture of plant-derived enzymes for protein, fat, and carbohydrate digestion, enhanced by ox bile and dehydrocholic acid. Our Targeted Delivery Technology uses a special "enteric coating" to protect tablet contents from destruction by stomach acid and assure that active enzymes reach your intestines, where they support optimal digestion.*

Neolife Scientific
Advisory Board

#3520 180 Tablets

Why Enzyme Supplements?

- **To support optimal digestion of proteins, carbohydrates, and fats.**
- **To help maximize nutrient availability and absorption.**
- **To help alleviate** distressful symptoms of indigestion at times when irregular or unhealthy eating patterns overburden the body's enzyme supply.

Our Solution: Enzyme Digestive Aid

- **Broad-spectrum activity.** Different plant-sourced enzymes cover the broad range of pH activity normally found in the intestinal tract. Protease aids protein digestion, amylases help carbohydrate digestion, and lipase, bile salts, and dehydrocholic acid enhance fat digestion.
- **Targeted delivery technology.** Our special "enteric coating" protects enzymes against stomach acid to guarantee delivery of active agents to the intestines.
- **Non-habit-forming.**
- **Addresses causes of improper occasional intestinal digestion,** not just symptoms.*

SUGGESTED USE: 2 to 4 tablets daily, immediately before or with meals.

Supplement Facts		
Serving Size: 4 Tablets	Servings Per Container: 45	
	Amount Per Serving	% Daily Value
Protease	40 mg	†
Lipase	140 mg	†
Amylase	200 mg	†
Papain	200 mg	†
Ox Bile	300 mg	†
Dehydrocholic acid	70 mg	†
† Daily Value not established		

OTHER INGREDIENTS: Dicalcium phosphate, microcrystalline cellulose, magnesium silicate, stearic acid, calcium sulfate, food glaze, powdered cellulose, hydroxypropyl methylcellulose,

A high potency, comprehensive enzymatic digestant that supplements the body's natural secretion of enzymes. Includes naturally occurring plant-derived enzymes that provide a broad range of activity across the full pH spectrum normally found in the intestinal tract. Tablets are enteric coated to protect contents from stomach acid and ensure enzyme release in the intestines.

Protease catalyzes protein into amino acids. Amylase aids carbohydrate breakdown into saccharides. Lipase, bile salts and dehydrocholic acid help prepare dietary lipids for absorption. Ox bile and dehydrocholic acid facilitate lipase activity and support thorough fat digestion. These digestive agents promote healthy, stress-free digestion and optimum nutrient availability.*

Store in a cool, dry place, away from direct sunlight.

Packaged with safety seal.
