NEOLIFE®

NUTRITIONALS

Carotenoids contribute to antioxidant activity in cellular lipids, support normal cellular growth and renewal, and assist healthy levels of immune cell activity. Carotenoids promote a healthy cardiovascular system, including support for a healthy antioxidant response paired to LDL cholesterol. Dietary intake of the carotenoids lutein and zeaxanthin have been shown to support clear, healthy vision.*

Flavonoids promote antioxidant activity, cellular health, and normal tissue growth and renewal throughout the body.*

Cruciferous compounds - sulforaphane and indole-carbinol (from broccoli and other crucifer extracts) and D-limonene (from oranges) support enzyme activity linked to normal cell growth and renewal, especially of breast and prostate tissues. Soy provides isoflavones (e.g. genistein), that help maintain healthy hormonal activity.*
