

NEOLIFE® SUPER-B THRESHOLD CONTROLLED

Water-soluble and always present in foods in a group, B-complex vitamins perform interrelated functions that are crucial to helping the body transform the food we eat into the energy we need to live. Super-B provides 10 members of the B-vitamin “family” in balanced ratios as they occur naturally in whole foods.

#3321, 180 Tablets

Why a B-Vitamin Supplement?

- **An essential group of interrelated nutrients, B-vitamins are involved in all energy production.**
- **B-vitamins are water-soluble and must be supplied daily in the diet.** B-vitamins are not synthesized or stored in the body in sufficient quantities to meet daily nutritional needs.
- **Most people consume an inadequate amount of B-vitamins,** especially folic acid and vitamin B₆. Because the entire family of B-vitamins is usually found in the same foodstuffs, a deficiency of several factors is more common than a deficiency of a single factor.
- **B-vitamin requirements may be increased by stress, infection, or other physical conditions** which elevate metabolism or interfere with absorption. Larger amounts are needed during growth, pregnancy, and nursing. Medications, alcohol, caffeine, and oral contraceptives can destroy B-vitamins.
- Adequate amounts of folic acid in a healthy diet may **reduce the risk of having a child with neural tube defects.**
- **B-vitamins play an important role in promoting a healthy cardiovascular system** and are crucial to immune response and mental acuity.*

Our Solution: Super-B Threshold Controlled

- **Exclusive biologically-bound yeast.** Unique whole-food source provides B-vitamins in naturally-occurring ratios.
- **Complete.** Contains 10 members of the dietary essential B-vitamin family.
- **High-potency formula** provides maximum metabolic support to help meet high nutrient demands during exercise and periods of stress.*
- **Sustained release of B-complex nutrients** over a period of six hours.
- **Natural protein glaze** protects nutrient potency.

SUPER-B THRESHOLD CONTROLLED

SUGGESTED USE: 1 tablet daily.

Supplement Facts

Serving Size: 1 Tablet

	Amount Per Serving	% Daily Value
Thiamine (as thiamine mononitrate and from yeast)	15 mg	1000%
Riboflavin (as riboflavin and from yeast)	15 mg	882%
Niacin (as niacinamide and from yeast)	100 mg	500%
Vitamin B ₆ (as pyridoxine hydrochloride and from yeast)	15 mg	750%
Folic Acid	0.4 mg	100%
Vitamin B ₁₂ (as cyanocobalamin)	15 mcg	250%
Biotin	0.2 mg	66%
Pantothenic Acid (as calcium pantothenate and from yeast)	30 mg	300%
Inositol (as inositol and from soy lecithin)	100 mg	†
Desiccated Liver	100 mg	†
Choline (as choline bitartrate and from yeast)	50 mg	†
Rutin	20 mg	†

† Daily Value not established

OTHER INGREDIENTS: Stearic acid, hydroxypropyl methylcellulose, microcrystalline cellulose, silicon dioxide, food glaze and magnesium silicate.

B vitamins promote the active conversion of food into energy and assist in synthesis and reenergizing of cells and tissues throughout the body. B vitamins support healthy neuronal functioning and assist with healthy mood and mental clarity.*

NeoLife begins with nutritional yeast (*Saccharomyces cerevisiae*), and through unique processes of growth, harvest and drying, B vitamins are "biologically bound" to create a natural hi-potency B-complex raw material. Ingredients blended with liver and soy lecithin provide the entire family of B vitamins in balanced whole food ratios. NeoLife's Threshold Controlled formula helps maintain elevated blood levels of B vitamins with a slow release over six hours.

Store in a cool, dry place, away from direct sunlight.

Packaged with safety seal.

NEOLIFE® SUPER-B THRESHOLD CONTROLLED

Solubles en agua y siempre presentes en los alimentos en un grupo, las vitaminas del complejo B realizan funciones relacionadas entre sí que son cruciales para ayudar a que el cuerpo transforme los alimentos que comemos en la energía que necesitamos para vivir. Súper-B proporciona los 10 miembros de la "familia" de la vitamina B en proporciones equilibradas de la manera en que se producen naturalmente en los alimentos integrales.

¿Por Qué un Suplemento de Vitamina B?

- Siendo un grupo esencial de nutrientes, las vitaminas del grupo B están implicadas en toda la producción de energía.
- Las vitaminas B son solubles en agua y tienen que ser suministradas diariamente en la dieta. Las vitaminas B no son sintetizadas o almacenadas en el cuerpo en cantidades suficientes como para satisfacer las necesidades nutricionales diarias.
- La mayoría de las personas consumen una cantidad insuficiente de vitaminas B, especialmente ácido fólico y vitamina B6. Debido a que toda la familia de las vitaminas B se encuentra generalmente en los mismos productos alimenticios, la deficiencia de varios factores es más común que la deficiencia de un solo factor.
- Los requerimientos de vitamina B pueden verse aumentados debido al estrés, infecciones u otras afecciones físicas que elevan el metabolismo o interfieren con su absorción. Se necesitan cantidades más grandes durante el crecimiento, el embarazo y la lactancia. Los medicamentos, el alcohol, la cafeína y los anticonceptivos orales pueden destruir las vitaminas del grupo B.
- Las cantidades adecuadas del ácido fólico en la dieta pueden reducir el riesgo de tener un hijo con defectos del tubo neural.
- Las vitaminas del grupo B juegan un papel importante en la promoción de un sistema cardiovascular saludable y son cruciales para la respuesta inmunológica y la agudeza mental.*

Nuestra Solución: Super-B Threshold Controlled

- Levadura exclusiva ligada biológicamente. Fuente única de alimento integral que suministra vitaminas B en proporciones producidas de forma natural.
- Completo. Contiene los 10 miembros de la familia de la vitamina B esenciales para la alimentación.
- Fórmula de alta potencia que proporciona un apoyo metabólico máximo para ayudar a satisfacer la alta demanda de nutrientes durante el ejercicio y los períodos de estrés.*
- Liberación sostenida de nutrientes del complejo B durante un período de seis horas.
- Glaseado natural de proteínas que protege la potencia de los nutrientes.
