

ACIDOPHILUS PLUS

Beneficial ("good") intestinal bacteria promote health, discourage the growth of disease-causing ("bad") bacteria and pathogenic fungi, and improve the balance of microbes which normally inhabit our intestines. Many beneficial bacteria transform naturally occurring sugars, especially lactose, into lactic acid, promoting a more balanced and stable intestinal environment. As one of the most abundant sources of lactose is milk, these beneficial bacteria have been used for thousands of years to produce yogurt, cheese, and fermented milks. Both science and folklore support healthful roles for these foods. NeoLife's supplement of beneficial bacteria, Acidophilus Plus, combines potency with technology to guarantee that live organisms survive the stomach acid and reach the intestines to deliver five billion viable organisms capable of supporting optimal digestive tract function.

#3524 – 60 Capsules

Why Beneficial Bacteria?

- **Beneficial bacteria help maintain a healthy balance** of a variety of microorganisms in the intestines.
- **Beneficial bacteria help produce vitamins** and, through an indirect mechanism, boost resistance to infection and disease.
- Cultured dairy products (yogurt, cheese, fermented milks), produced through the actions of beneficial bacteria, have been **used throughout the world for centuries to support health.***

Our Solution: Acidophilus Plus

- **Whole-food-derived.** Contains beneficial bacteria isolated from cultured dairy foods to support a healthful balance of microorganisms in the gastrointestinal tract.*

- **Broad-spectrum.** Delivers five types of beneficial, lactic acid-producing bacteria: *Lactobacillus acidophilus*, *Lactobacillus bulgaricus*, *Lactobacillus casei*, *Bifidobacterium bifidum*, and *Streptococcus thermophilus*
- **Concentrated.** As many beneficial bacteria as 10 servings of yogurt or five servings of acidophilus milk!
- **Potency guaranteed.** Each capsule is filled with five billion live organisms and protected for delivery to the intestines.
- **Active cultures.** Exclusive Gel-Gard protection system assures that the maximum number of live bacteria survive the stomach acid and reach the site of action, the intestines.
- **Convenient.** Each bottle contains a 60 day supply.

SUGGESTED USE: 1 capsule daily.

Supplement Facts	
Serving Size: 1 Capsule	
Amount Per Serving	
Lactobacillus Plus Proprietary Blend	104 mg †
<i>Lactobacillus acidophilus; Bifidobacterium bifidum; Lactobacillus bulgaricus; Streptococcus thermophilus; Lactobacillus casei</i>	
† Daily Value not established	

OTHER INGREDIENTS: Potato starch, gelatin, glucose, sodium alginate, water, magnesium stearate and titanium dioxide.

Intestinal probiotics aid normal digestive functions and promote healthy immune system responses.*

Filled with 5 billion beneficial live cultures, the contents of each capsule are shielded from harsh stomach acid by NeoLife's unique "Gel-Gard" Enteric Protection System.

BANDED AND PACKAGED WITH SAFETY SEAL FOR YOUR PROTECTION.

DO NOT USE IF EITHER SEAL IS MISSING OR BROKEN.

Store in a cool, dry place, away from direct sunlight.

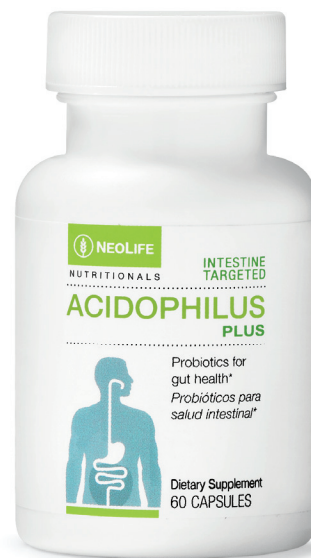

REFRIGERATE AFTER OPENING.

ACIDOPHILUS PLUS

Las bacterias intestinales benéficas ("buenas") promueven la buena salud, evitan el desarrollo de bacterias que causan enfermedades ("malas") y hongos patógenos; y además, mejoran el equilibrio de los microorganismos que normalmente habitan en nuestro intestino. Muchas bacterias benéficas transforman los azúcares de origen natural, en especial la lactosa, en ácido láctico, promoviendo un ambiente intestinal más estable y equilibrado. Ya que una de las fuentes más abundantes de lactosa es la leche, estas bacterias benéficas se han utilizado durante miles de años para producir yogurt, queso y leches fermentadas. Tanto la ciencia como la tradición apoyan las funciones saludables de estos alimentos. Acidophilus Plus, el suplemento de bacterias benéficas de NeoLife, combina potencia con tecnología para garantizar que los organismos vivos sobrevivan al ácido del estómago y lleguen a los intestinos llevando cinco mil millones de microorganismos viables capaces de apoyar la óptima función del tracto digestivo.

#3524 60 Cápsulas

¿Por qué se necesita bacteria benéfica?

- Las bacterias benéficas ayudan a mantener un equilibrio saludable de una variedad de microorganismos en los intestinos.
- Las bacterias benéficas ayudan a producir vitaminas y, a través de un mecanismo indirecto, estimulan el aumento de la resistencia frente a infecciones y enfermedades.
- Los productos lácteos cultivados (yogurt, queso, leches fermentadas), que se producen mediante las acciones de las bacterias benéficas, se han utilizado en todo el mundo y durante siglos para apoyar a la salud.*

Our Solution: Acidophilus Plus

- Suplemento derivado de alimentos integrales. Contiene bacterias benéficas aisladas a partir de alimentos lácteos cultivados para apoyar un equilibrio saludable de microorganismos en el tracto gastrointestinal.*

- Amplio espectro. Lleva al intestino cinco tipos de bacterias benéficas, productoras de ácido láctico: *Lactobacillus acidophilus*, *Lactobacillus bulgaricus*, *Lactobacillus casei*, *Bifidobacterium bifidum*, y *Streptococcus thermophilus*.
- Concentrado. ¡Equivale a tantas bacterias benéficas como si hubiese ingerido 10 porciones de yogurt o cinco porciones de leche fermentada con *Lactobacillus acidophilus*!
- Potencia garantizada. Cada cápsula está llena de cinco mil millones de organismos vivos y protegida para que estos lleguen a los intestinos.
- Cultivos activos. Con el exclusivo sistema de protección Gel-Gard que garantiza que el máximo número de bacterias vivas sobrevivan al ácido del estómago y lleguen al sitio de acción, es decir a los intestinos.
- Conveniente. Cada botella contiene un suministro para 60 días.
