## Experience

---

### UI Engineer - Experticity

January 2015 - August 2016

Built and maintained the front-end on a variety of apps for Experticity's business intelligence team and e-commerce team. Main projects included building a new client portal for analytics (d3.js) and building a new store app (Angular).

### Data Visualization Developer

September 2013 - January 2015

Contract development for a variety of data visualization projects. Clients included The World Bank, The Orange County Register and EDUCAUSE.

### Data Visualization Specialist - EDUCAUSE

January 2012 - September 2013

Led the static and interactive graphics creation for ECAR, the analytics and research team at EDUCAUSE. Created graphics for research publications dealing with information technology in higher education.

### Data Journalist - The Las Vegas Sun

October 2008 - September 2011

Created interactive maps, data visualizations, games and other interactives to enrich and enhance storytelling. Innovated new ways for readers to interact with information in online publications. Other responsibilities included developing and maintaining media players that integrated with a CMS.
