

Case Study 2:

“I am happy, my children have safe drinking water at home and school”

Mr. Soung Kun, the Samaki Primary School Director, excitedly told, i am so happy. My children have access to safe drinking water at home and school”.

The primary school director Mr. Soung Kun (37) told with so sadness that he used to see students drink water from the pond behind of the school. “It’s so common practice. I was looking for a way to support.

Water for Life: School children before and after the GEF

Now I am so happy that my children have access to safe drinking water. I am grateful to Save the Earth Cambodia and GEF SGP UNDP Cambodia.

I told all my students to let their parents to have water filter at their own”. Children promoted it to their parents. “I have been encouraging them to let each of their family have a water filter”.

Samaki Primary School Director Mr. Soung Kun, happy with Neing Noug Trees (Tick-Timber) as well. Save the Earth provided 500 for the school campus. He requested for more 2000 and the District asked for 100,000 for his public institutions. There is a great need. We are looking forward to have a partner who can support us with hundred thousands of seedlings to green the community and reduce disaster risks. Save the Earth is expecting to have a partner to support ‘Million Tree Plantation’ plantation programme for Cambodia.
