

STERLING

SURGICAL HOSPITAL

Below are averages of the top surgical and ancillary charges for Sterling Surgical Hospital. Since hospital billing can be confusing, The Department of Health and Hospital felt it was best to publish chargemaster content on their website. However, your case may be different. Each patient's charges can differ based on physician orders, which are driven by your diagnosis, previous medical history, complications from the procedure or many other potential factors. Also, what you are charged is not what the hospital will be paid. That depends on your insurance plan and what contractual relationship the facility has with your plan. If you have any questions regarding the hospital pricing, please contact 985-690-8200
