

COLON HYDROTHERAPY

What the Medical Doctors are saying:

“Colon hydrotherapy eliminates from the bowel the accumulated waste material which may get absorbed. If this absorption takes place, it overwhelms the other purification organs such as the liver, the kidneys, the skin, and the lungs. The toxin deposition which becomes lodged throughout the body’s tissues and cells becomes capable of triggering a variety of illnesses,” says rheumatologist Dr. Arthur E. Brawer, MD.

“I am very well acquainted with the colon’s functions, and my true belief is that colon hydrotherapy is the perfect cleansing medium for preparing the patient for colonoscopy. It’s a much better way of getting the human colon ready for an operation than having a patient swallow a gallon of that presurgery solution known as ‘Colon-Go-Lytely.’” “Moreover, seriously ill patients tend to be chronically constipated which results in generalized toxemia. It turns out that colon hydrotherapy is the gentlest and most effective treatment for a constipation problem. “I also believe that normally healthy people will find it valuable to take colon hydrotherapy every couple of months in order to experience how well one feels when the colon is truly empty. It’s a fact that most people fail to fully evacuate the colon, something they don’t realize. People undergoing colon hydrotherapy on a prevention basis, are quite surprised at how much waste is removed by the procedure.” “Without reservation, my wish is to see it become an established procedure for many kinds of gastrointestinal problems. If medical centers, hospitals, and clinics installed colon hydrotherapy departments, they would find such departments just as efficacious for patients as their present treatment areas which are devoted to physiotherapy,” “Such is my belief, and I do endorse this therapeutic program.” Leonard Smith, MD

“Colon hydrotherapy is the perfect specific procedure to eliminate constipation and restore normal bowel function. My approach to medical practice is to balance the GI tract using stool testing. I find various pathologies relating to bacteria, yeast, parasites, and other organisms of this nature. A lot of disease comes from imbalances in the colon, as manifested by inflammatory bowel disease, ulcerative colitis, autoimmune diseases, allergies, multiple sclerosis, and certainly constipation. Such imbalances can be corrected by means of colon hydrotherapy, herbal supplements, and diet.” “There is no question about the huge difference a health professional can bring to the patient by utilizing colon hydrotherapy plus other complementary and alternative methods of healing.” says Dr. Paul Flashner, MD. former general surgeon and emergency medicine specialist.

“I have trained and certified colon hydrotherapists working as part of my staff. Under my supervision for the past year-and-a-half they have been treating constipation, abdominal cramps, allergies, and a variety of other conditions, including ten patients with hepatitis C. These hepatitis patients respond to colon hydrotherapy and do well,” assures Dr. Sharda Sharma, MD.

“I’ve had a colon hydrotherapy device in my office for 25 year.” “My present staff person who dispenses colon hydrotherapy under my jurisdiction uses it for all types of patient difficulties. The basic concepts of the science has not changed much in the last 25 years; however, the colon hydrotherapy equipment has improved immensely. How the equipment works so effectively is nothing short of astounding. Registered with the FDA, current colon hydrotherapy equipment is safe. It contains temperature-controlled water mixing and back flow prevention valves, plus pressure and temperature sensors, and built-in chemical sanitizing units. Water purification units frequently are installed as well. Disposable single-use rectal tubes, and/or speculae are employed routinely for sterility,” states Michael Gerber, MD, of Reno, Nevada.

“Cleaning the colon markedly assists the functioning of the male bladder and prostate organs. Colon hydrotherapy given to men at two-week intervals for three times to start and then maintained every four weeks for an unlimited

period does resolve prostatitis and benign prostatic hyperplasia.” “From my files, I can offer up several hundred case studies which testify to that fact.” states Emil S. Sayegh, MD.

“I have found over the years that cancer patients who are not doing well usually are toxic and not being cleansed. They certainly are in need of colon hydrotherapy.” “I do recommend that most of my cancer patients take colon hydrotherapy or ‘colonic irrigations’ because they often improve by having such treatment. Liver cancer in particular shows benefit from colon hydrotherapy, but any internal tumors show effectual change too.” “It’s better than an enema, which is merely a lower bowel cleanse, as opposed to a colonic which is a thorough cleanse of the entire bowel. It’s similar to comparing the diagnostic efficacy of a sigmoidoscopy of the short end of the bowel to a colonoscopy which takes in the whole bowel. An enema only goes so far. Colon hydrotherapy is the best cleansing and detoxifier for the gastrointestinal tract that anybody would want. I do promote its use.” advises oncologist and homeopath Douglas Brodie, MD, of Reno, Nevada

“Frequently while performing colonoscopy, I see that the patient is cleaned out from above but below the diverticular still contain fecaliths, those small turds remaining in pockets formed on the gut mucosa. They indicate the presence of an unhealthy colon, and over 50% of Americans possess diverticulosis colae. When inflamed, gastroenterologists called them diverticulitis colae, which can be serious by creating fistulas. Some people then will evacuate through their bladders.” “With patients for whom I perform colonoscopy, about one third of them over the age of fifty who are otherwise cleaned above, still show residual stools sitting in these gut mucosa pockets. Some have held onto the stool pockets for decades. A toxic dumpsite like this is dangerous for them by the elevated concentration of poisons stored in the dumpsite. Cancer can develop!” “A good cleanout by use of colon hydrotherapy is excellent treatment. I recommend that people undertake colon hydrotherapy for themselves. Clean out the body’s pipes.” “And by all means, I prefer my patients undergo colon hydrotherapy the morning of a colonoscopy. It’s a safe way to cleanse the gut. It’s a healing technique for the relief of irritable bowel syndrome with gas and bloating, chronic constipation, abdominal discomfort, and many other GI tract problems” Says Board certified as a gastroenterologist since 1972, Robert Charm, MD, of Walnut Creek, California

“I support the use of colon hydrotherapy and do occasionally refer my patients to undertake this treatment. It may be the best way to detoxify them.” Frank Shallenberger, MD, HMD, of Carson City, Nevada.

“For some patients with chronic constipation or extensive yeast problems, colon hydrotherapy works advantageously to get rid of the physical load of pathology in the gastrointestinal tract. This treatment stimulates the liver and gets rid of the debris that’s sticking to the mucosa. The last time I referred a patient to take colon hydrotherapy was just yesterday. There’s hardly a week that goes by which does not see me utilize this treatment for one or more patients.” W. John Diamond, MD, medical director of the Triad Medical Center in Reno, Nevada and coauthor of An Alternative Medicine Definitive Guide to Cancer

“Colon hydrotherapy is an excellent detoxifier for the overindulgence of alcohol and drug addictions of all kinds. Residues of drugs and other agents in the tissues are eliminated with colon hydrotherapy,” states Dr. James P. Carter, MD, DrPH, MS, of Mandeville, Louisiana. Dr. Carter is Professor and Head of the Nutrition Section at Tulane University School of Medicine
