MORE THAN A HOLSTER

Developed in Israel for the world's military and police services. Proven in lethal force encounters, the Fobus Concealed Carry Holster is a revolutionary step forward in holster design and technology. Fobus is the original manufacturer of injection molded polymer holsters. With this experience, Fobus is the leader in high-density polymer, with more models that fit the most handguns in the market place.

Comfort is vital when carrying concealed. Fobus designers have delivered a holster that weighs approximately two ounces. These holsters are close fitting, have a low profile, rubberized paddle for comfort and a steel reinforced rivet attachment system for durability. They are rugged, reliable and virtually maintenance free. Fobus holsters utilize a passive retention system that allows for rapid presentation.

The Fobus Holster 100% Lifetime Warranty assures your satisfaction is guaranteed.

SUPERIOR DESIGN

With the most comfortable paddle on the market and a holster that weighs approximately two ounces, Fobus has delivered a low profile, IDPA approved comfortable holster for all-day concealed carry.

PASSIVE RETENTION

Unique passive retention system securely retains the weapon while allowing instant presentation. Fluid upward presentation provides the fastest draw possible.

RUBBERIZED PADDLE

For increased comfort and stability, Fobus has incorporated a soft rubber backing on the majority of paddle holsters. This backing adds 40% more flexibility in the paddle and reduces holster movement.

REINFORCED RIVETS

An improvement in the design for rugged reliability, Fobus has reinforced the rivets, providing additional strength to the holster by utilizing steel strips which the rivets are fastened.

ROTO-HOLSTER™

CUSTOM ADJUSTMENT

The unique Fobus Roto-Holster™ system allows the user to utilize a patented locking adjustment system. The user has the ability to customize their cant (angle) with 40 different positions encompassing 360 degrees working for cross-draw, driver, small of the back and strong-side carry.

Each Fobus Roto-Holster™ utilizes the same features made famous by our standard line of holsters. With a flexible two-piece design the user can easily interchange any of the roto accessories. The Roto-Holster™ system is available for most current holster models. See fit chart for exact models.

360° ROTATION

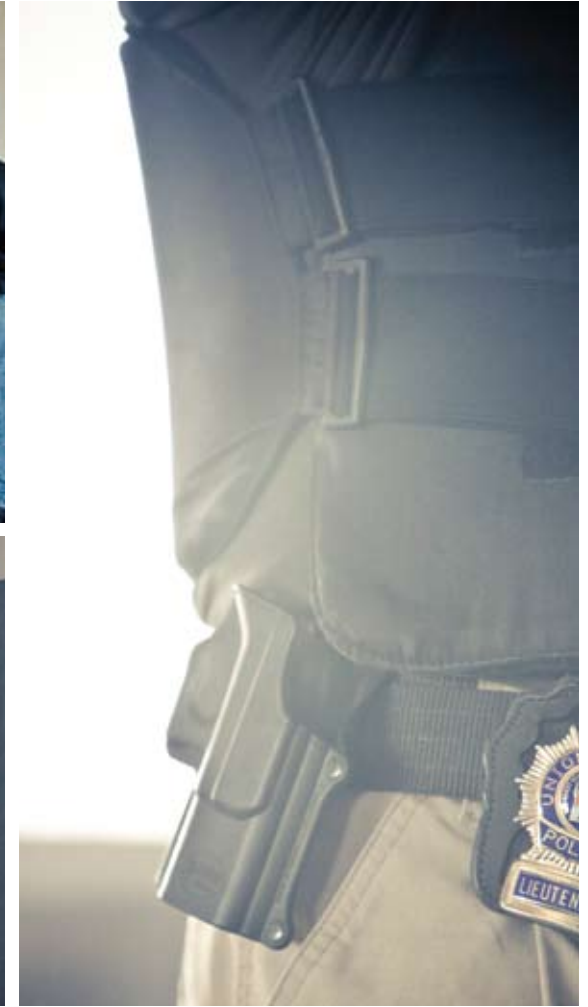

Patented locking adjustment system provides 40 possible positions incorporating 360 degrees. Simply loosen the Phillips head attachment screw, adjust and tighten for secure hold.

CONTOURED PADDLE

A new roto one piece paddle and belt design allows for a lower profile and added strength. The paddle utilizes the same rubberized backing that adds 40 percent more flexibility in the paddle and reduces holster position slippage.

INTERCHANGEABLE

With a flexible two-piece design the user can easily interchange any of the roto accessories. Simply loosen the Phillips head attachment screw, remove current attachment, replace with any roto accessory and tighten for a secure hold.

REINFORCED RIVET ATTACHMENT | NTOA MEMBER TESTED AND RECOMMENDED

Setting the standard for concealed carry was our objective. State of the art design, injection molding and high density polymer have created a holster which cannot be duplicated in leather or any other material.

The next step in the evolution of holster design. One piece holster body construction with adjustable retention allows the user to customize the ease of presentation, functioning in conjunction with the proven Fobus passive retention design.

LEVEL II LEVER ACTION | holster

ONE-PIECE HOLSTER BODY CONSTRUCTION | TOP MOUNTED THUMB ACTIVATED LEVER WITH LARGE PURCHASE AREA
| NATURAL DRAW INSTANTLY RELEASES HANDGUN FROM HOLSTER | ROTO-HOLSTER™ SYSTEM

Unlike other Level II holsters, there is no need to alter your presentation or grip. With a simple, smooth and quick motion the handgun is released, utilizing a natural draw stroke. A new and innovative way for providing quick access and Level II retention. The thumb falls naturally on the release lever and upon re-holstering a revolutionary retention concept engages the trigger guard to keep the handgun secure. Roto-Holster™ design allows for custom cant (angle) adjustment by the user.

Holster includes both a paddle and belt attachment.

COMPACT | holster

RETENTION ADJUSTMENT SCREW (EXCEPT GLOCK MODEL) | LIGHTWEIGHT COMPACT DESIGN | LOW PROFILE DESIGN FOR
