

A-SERIES SUBWOOFERS
AND CENTER SPEAKERS.
**ASW 650, ASW 250
AND A 225C.**

ASW650
ASW250
A225C

Are you setting out to build a truly powerful home theater? Or are you simply demanding the weight and authority of the lowest musical tones for your HiFi enjoyment? Either way, the A-Series subwoofers will satisfy your wishes. Each model incorporates a 10-DCD magnet structure, a voice coil with generous thermal capacity and stiff treated pulp cone.

A-SERIES SUBWOOFERS AND CENTER SPEAKERS.

ASW 650, ASW 250 AND A 225C.

For the listener building a potent home theatre or just demanding the heavy authority of the lowest musical tones, the A-Series subwoofers deliver a tremendous energy.

Each model is designed around a 10" DCD magnet structure. Thanks to these self-amplified models, our engineers were able to add another smart feature: active electronics. Additionally, every Boston subwoofer includes Basstrac, a proprietary circuit that maximizes bass output while avoiding overload at the same time. Consequently, these subwoofers can play loud and low all day without distress, delivering naturally dynamic audio.

Available Colors

High-Gloss Black and Satin Cherry

- High-contrast finish with scratch resistant high gloss panels for stunning good looks
- Boston's BassTrac® circuitry for more bass without distortion
- Advanced ceramic/glass fiber polymer woofer with Deep Channel® Design (DCD) deliver more bass response from less amplifier power
- Acoustically tuned ports for improved low frequency response
- LFE and Line Level Inputs for connection flexibility
