+Wire sizes and connections must conform with the fuse size and rating of the appliance in accordance with the American National Electrical Code ANSI / NFPA No. 70-latest edition, or with Canadian CSA Standard C22.1, Canadian Electrical Code, Part 1, and local codes and ordinances.

NOTES:

1. Base must be capable of supporting 300 pounds.
2. Cutout depth is critical to the proper installation of the built-in oven. If the oven decorative trim does not butt against the cabinet, or if noise is heard on convection models, verify the dimension to assure it is the required depth.
3. For a cutout height greater than $49\frac{1}{4}"$, add one 2" wide wood shim of appropriate height to each side of the opening under the appliance rails.
