JANN'S
NETCRAFT

Colorado Blade Sizing

SPINNER BLADES

All of our plated blades are stamped from marine grade rustproof brass.

FINISH

Blade finish works with the shape of the blade to reflect light. A smooth finish blade reflects light from only one point of the blade. Hammered blades reflect light from most of their surface.

SIZE

Plays a part in how deep the lure will run. Large blades give more lift to a lure than small blades so large blade lures will run shallower than small blade lures.

SHAPE

The shape of the spinner blade determines how fast and how far from the shaft a blade will spin. Shape also affects how easy a blade is to start.

COLOR

Blades are made in different colors to help you fit your bait to the fishing conditions. Weather, water clarity, and water temperature all play a part in what the fish hit.

ROUND RUBBER SKIRT MATERIAL

Gives your baits more action than other types of lure dressing. While most material is limp, this rubber has spring to it. Silicone coating eliminates both sticking and the need to apply color dulling talc. No talc gives the brightest colors. Comes in easy-to-use strips about 1" wide. **Mix colors to receive quantity prices!**

**SKIP CUT SILICONE SKIRT MATERIAL**

Silicone rubber is known for its bright colors and non-stick surface. To use, pull slit material through a skirt collar making sure uncut tabs are positioned at the end of the skirt. Cut off end tabs to free skirt legs. Use 1 slit piece per skirt. Material makes skirts up to 5¼" long. About 12' by 42 strands per 2 oz. bundle. We estimate 190 skirts per pound.

**VINYL LURE AND JIG FINISH**

Can be dipped, brushed or sprayed. The vinyl qualities of this finish make it chip resistant. Good adhesion to raw lead. Drying time between coats is about 10 minutes. Will not be softened by most soft plastics. White must be used as an undercoat for all pearl, glow and fluorescent colors. 2 coats of white are needed for a good job. Apply a coat of clear to your lure for a gloss finish. Material can be thinned using only our special thinner.

The Best way to Apply Powder Paint!

FB-3

POWDER PAINT FLUID BED

A fluid bed gently mixes air into your powder paint eliminating the need to stir your paint to keep it from packing together. This gives you complete control of coating thickness. Jig eyes usually stay open and blade actions aren't changed. The FB-3 is a single dip bed that is ideal for short or custom runs. The unit comes complete with one replaceable dipping cup and air supply. Additional cups may be purchased for quick color changes. Output can be as high as 250 lures an hour.

When jigging in tough conditions, most fish will be hooked on a stinger treble hook. Simply loop the monofilament eye onto the lure hook and slide the red tubing to fasten. Available in sizes 8 (008) and 10 (010).

Order No. 812-711- Price: \$3.09/5 pack

BUCKTAIL TREBLE HOOKS

Tied on a 2X strong tin plated treble hook. Can be used on fresh and salt water lures. Open eye for easy changing. Simply crimp shut with pliers.

Wooden handles provided with every mold.
The mold is cast with a hard, warp resistant aluminum alloy.

The mold faces are MACHINED SMOOTH and FLAT, (not just ground or pressed) and then individually hand fitted together.

The hinges are machined to fit and then tightly pinned to assure a precision line-up.

Each mold is individually checked for proper hook and insert fit. The style and size of any insert required is listed on each mold.

++Mold can be modified to accept .051" wire

(A) PRODUCTION POT

A good choice for luremakers casting jigs, weight forward lures, and small sinkers. Precise lever control of the spout allows just the right amount of lead to enter the mold. The adjustable thermostat permits you to keep the lead at the proper temperature. This mold has enough clearance to accept both Do-It and Hilts molds. Holds up to 10lb. of lead. 110 volts AC. 2 year factory warranty.

Order No. 410-500 Price: \$51.59

(B) MAGNUM MELTER

Ladle pouring is the best way to pour large sinkers and many jig and lure molds. This large 20 lb. capacity melter raises lead to working temperature in about 20 minutes. Calibrated thermostat maintains proper temperature. 2 year factory warranty. 700 watts, 110 volt AC.

Order No. 410-507 Price: \$52.79

(C) PRO 4-20 MELTER

This bottom pour furnace is designed to handle sinkers up to 5 oz.! Adjustable lever control of the spout allows just the right amount of lead to enter the mold. The adjustable thermostat permits you to keep the lead at the proper temperature. 4" clearance with mold guide. Not well suited for pouring spinnerbait molds or any other mold with wire protruding from the top. 700 watts, 110 volts AC. 20 lb. capacity. 2-year factory warranty.

Order No. 410-501 Price: \$75.95

(D) PRECISION MELTER

High speed melter with an infinite Heat control. Takes less than 15 minutes to melt 4 pounds of metal. 500 watts AC only. 110 Volts. 2 year factory warranty.

Prey Lures are made by bass fishermen for bass fishermen. They are proven bass catchers on the Great Lakes, Santee-Cooper Reservoir, Lake Mead, Lake Guntersville, Sam Rayburn Reservoir, Lake Okeechobee and Lake Castaic. These baits are effective when drop shotting, snap jigging, Carolina rigging, Erie dragging and Texas rigging.

PREY 3½" SALTY SHOT SHAKER

This bait was designed for drop shotting and finesse fishing. When rigged as a drop shot bait this lure will have plenty of action with just the lightest twitch. When the bite is tough try Texas rigging it or use a small jig head.

Order No. 540-403- Price: \$3.69/8 pack

PREY 2½" CHUBBY GRUB

This hand poured bait screams drop shot. Nose hook with an Owner #1 or 1/0 mosquito hook or a Daiichi #1 Standout hook. The short flat tail will move at the slightest twitch. This bait is also effective when bounced or dragged on a sparkie jig head.

Order No. 540-401- Price: \$3.69/10 pack

PREY 4" SALTY SUPER STIK

So you thought Senko style baits had great action. Wait until you fish this hand poured Super Stik. The slit tail gives this bait a unique action not seen before. Texas rig it with no weight, twitching it slightly as you move it through the water.

GRAPHITE ROD BLANKS Made in U.S.A.

These high quality blanks are made of SC^{II}, SC^{III} and SC^V graphite. Actions are computer designed to get the best performance from this space age material.

Integrated Poly Curve Technology (IPC)

IPC technology allows St. Croix to make rod blanks on one continuous curve from butt to tip. With IPC, there are no weak spots - just crisp, clean casts like you've never experienced before.

SC^V

Built with St. Croix's revolutionary IPC tooling process, the SC^V graphite blanks redefine high performance. Actions are fast, powerful and smooth. Casting accuracy is unequalled. Sensitivity is extraordinary. Advanced carbon scrim SC^V blanks weigh up to 20% less than competitive models.

ST. CROIX Warranty

St. Croix rod blanks are carefully crafted and individually inspected to assure that the highest quality standards are met. However, should failure occur due to defects in materials or workmanship, the rod blank will be repaired or replaced (at St. Croix's option) for no charge, during the warranty period. This warranty is limited to the repair or replacement of rod blanks only and does not cover consequential or incidental damages. SC^{II} rod blanks are guaranteed by the manufacturer for a period of 2 years. SC^{III} and SC^V rod blanks have a lifetime guarantee.

G·loomis®

ROD BLANKS

GLX

SLATE (IMX)

IMX has the highest modulus and strain rate in the industry. Up to 59% more efficient and 40% lighter than a comparable graphite model.

Mahogany(GL3)

Higher modulus and strain rate until now only found in more expensive rod blanks. Tough high impact resin system improves durability.

Accurately Measure 2 Part Epoxy Finish

Two part epoxy finishes should be warmed in hot tap water for 5 minutes before measuring. When measuring rod finish using syringes, fill and empty the syringe once before loading to remove any air pockets in the syringe.

ORDERING THE CORRECT CUTOUT SEAT...

Most casting reel seats are mounted about 10" from the rod butt and the blank tapers about .060" in that first 10". Subtract .060" from the butt size listed in our catalog and choose the I.D. size closest to the number you obtain. The seat can be reamed slightly to fit.

Example: Rod Butt Size .520": .520" - .060" = .460"
Use the .453" reel seat and ream to fit.

SALTWATER REEL SEATS

Made from marine brass, then triple chrome plated. Two part construction, open at both ends. Ferrule design allows you to separate handle from rod section. Reel seats include double nuts for secure reel locking.

CX PREMIUM FLUOROCARBON LINE

Combines copolymer and fluorocarbon technologies. Low memory and improved limpness make it ideal for use on both spinning and baitcasting reels. The fluorocarbon-silicone coating stops water absorption, so cold water and weather have little effect on line performance. Less stretch than other lines for increased sensitivity to detect subtle strikes. Available in Clear Fluorescent (040) and Moss Green (009).
